Publication Guide

Scope

This Illustrative Directors' Report and Financial Statements is based on a company not in existence, Flying Colours Berhad, incorporated and domiciled in Malaysia, and listed on the Main Market of Bursa Malaysia Securities Berhad with financial year ended 31 December 2022.

The names of people and entities included in this publication are not real. Any resemblance to any person or entity is purely coincidental.

In preparing this publication, we have strived to create a realistic set of financial statements for a corporate entity whose activities include property development, agriculture, service concession, manufacturing and investment holding. In the effort to present a wide variety of scenarios, many assumptions on the figures are made, some of these figures are not designed to reconcile with other figures that appear in this publication and in certain cases, no figures are presented in the disclosures.

The disclosures contained herein are made based on a hypothetical group of companies and certain assumptions have been made about the applicability of the MFRSs. The disclosures are not meant to be exhaustive. Readers should refer to the relevant standards and regulations for specific disclosure requirements.

Flying Colours Berhad has adopted all MFRSs that are effective as at 1 January 2022.

This publication is for the circulation to the staff, clients and associates of Baker Tilly Malaysia at their request and is not for public circulation.

Purpose

This publication serves to provide practical illustration and guide on the presentation and disclosure requirements of MFRSs and Companies Act 2016 in the financial statements of a group of companies.

Commentary

Throughout this publication, commentary is provided where additional matters may need to be considered in relation to a particular disclosure. The commentary is provided in grey boxes towards the end of each note/page.

Alternative accounting policies

Certain MFRSs allow a choice between two different accounting treatments for the same transaction and event. In such circumstances, an organisation must exercise professional judgement and care, and decide on the appropriate accounting treatment to be applied based on the entity's specific circumstances.

Contact us

This publication is prepared as a general guidance only and therefore should not be relied upon as a substitute for seeking professional advice concerning the appropriate accounting treatments or ensuring compliance with the MFRSs. Users are encouraged to consult Baker Tilly Malaysia when in doubt. A list of the Baker Tilly offices in Malaysia is provided on the back page of this publication.

Message from the Group Managing Partner

Andrew Heng

Since mid-2022, the economy has slowly been steaming away and companies are now looking optimistically at growth and growth opportunities, leveraging from the lessons learnt and technologies adopted over the last two years. Essentially, companies are now stronger and better positioned to face the challenges ahead.

For accountants, the good news is that there have been no major amendments to the accounting standards this year, giving us a much-needed breather from having to keep up with the myriad of changes in recent years. Accountants can therefore focus their efforts on helping their companies grow in spite of the looming recession.

At Baker Tilly, we continue to play our part in shaping the accountancy profession through the sharing of our knowledge via our Illustrative Directors' Report and Financial Statements. As there have been no major amendments to the accounting standards in year 2022, this 7th edition of our Illustrative Directors' Report and Financial Statements, "Flying Colours Berhad", sees the Quality Assurance and Technical team fine-tuning the examples provided therein, as well as minor updates based on the Malaysian Institute of Accountants latest guidelines.

As we continue to share our knowledge through the Illustrative Directors' Report and Financial Statements, we hope that it will continue to bring about consistency and improve the overall quality of financial statements.

Dato' Lock Peng Kuan

Year 2022 saw a break from the constant major changes to the accounting standards. This little breather means that the preparers of financial statements have had a bit more time to digest and consolidate their understanding of all the changes over the last few years. This is important to ensure that accountants have time to familiarise themselves with the changes to the accounting standards.

Even though there have been no major changes, our Quality Assurance and Technical (QAT) team has kept the momentum and continued to ensure that our Illustrative Directors' Report and Financial Statements, "Flying Colours Berhad", is kept comprehensive, up-to-date and fine-tuned, as many preparers of financial statements have found the Illustrative Directors' Report and Financial Statements a very useful.

As with our previous editions, this 7th edition of "Flying Colours Berhad" also provides, among others, useful illustrations and examples on the various disclosures required by the accounting standards. We hope that you will continue to find this Illustrative Directors' Report and Financial Statements useful and informative.

Message from the Partner of Quality Assurance and Technical

Esther Cheah

The Quality Assurance and Technical team of Baker Tilly Malaysia is pleased to present the 7th edition of Flying Colours Berhad, our Illustrative Directors' Report and Financial Statements prepared in accordance with the Malaysian Financial Reporting Standards (MFRS).

As with our previous editions, significant amount of time and effort has been invested in the development of our 7th edition of Flying Colours Berhad.

While there has been no major changes to the accounting standards in year 2022, we have kept the momentum going and taken time to fine-tune the Illustrative Directors' Report and Financial Statements to ensure that it continues to be up-to-date year-on-year.

As proponents that the quality of the financial statements creates value through enhanced comparability and transparency, we continue to be committed in providing guidance and assistance in matters relating to the interpretation and application of the relevant accounting standards. We believe that this helps build stakeholder confidence that translates into higher reputation and trust. Although it is not possible to envisage every possible event and circumstances, or to provide illustrations for all scenarios that apply to regulated or specialised industries, we hope that this Illustrative Directors' Report and Financial Statements will still be an informative guide for organisations in the preparation of the financial statements generally.

(Incorporated in Malaysia)

REPORTS AND FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2022

FLYING COLOURS BERHAD (Incorporated in Malaysia)

Reference

DIRECTORS' REPORT

S252(1)

The directors hereby submit their report together with the audited financial statements of the Group and of the Company for the financial year ended 31 December 2022.

PRINCIPAL ACTIVITIES

S253(1)(b)

The principal activities of the Company are investment holding, property development and provision of construction services. The principal activities of its subsidiaries include property development, provision of construction services, oil palm cultivation and processing of crude palm oil and palm kernel, milling of crude palm oil and palm kernel, small equipment leasing, production of plastic mould products, fast food business and operation of power plant.

5Sch(I)(7)

There have been no significant changes in the nature of these activities during the financial year except for the two service concession arrangements entered, one is with the State Government of Penang in Malaysia to construct and operate the convention center and the other is with the State Government of Shenzhen in China to build and operate a power plant to supply electricity to consumers in a designated area.

5Sch(I)(1)(a) RESULTS

	Group RM'000	Company RM'000
Profit/(loss) for the financial year, net of tax		
Continuing operationsDiscontinued operation	133,900 (2,800)	43,700
	131,100	43,700
Attributable to:		
Owners of the Company Non-controlling interests	118,200 12,900	43,700
	131,100	43,700

DIVIDENDS 1

5Sch(I)(1)(f)

The amount of dividend declared and paid by the Company since the end of the previous financial year were as follows:

	RM'000
Single tier final dividend of 5.26 sen per ordinary share in respect of the financial year ended 31 December 2021, paid on 20 April 2022	10,000
Single tier interim dividend of 3.45 sen per ordinary share in respect of the financial year ended 31 December 2022, paid on 18 June 2022	10,000

DIRECTORS' REPORT (CONTINUED)

DIVIDENDS (CONTINUED)

101.137(a)

At the forthcoming Annual General Meeting, a single tier final dividend of 5.17 sen per ordinary share, amounting to RM15,000,000 in respect of the current financial year, based on the number of outstanding ordinary shares in issue (net of treasury shares) as at 31 December 2022, will be proposed for the shareholders approval. The financial statements for the current financial year do not reflect this proposed dividend. Such dividend, if approved by the shareholders, will be accounted for in equity as an appropriation of retained earnings in the financial year ending 31 December 2023.

RESERVES OR PROVISIONS

5Sch(I)(1)(b)

There were no material transfers to or from reserves or provisions during the financial year other than a shown below.

[Disclosure of amounts and particulars of any material transfers to or from reserves or provisions.]

BAD AND DOUBTFUL DEBTS

5Sch(I)(1)(g)

Before the financial statements of the Group and of the Company were prepared, the directors took reasonable steps to ascertain that action had been taken in relation to the writing off of bad debts and the making of allowance for doubtful debts and had satisfied themselves that all known bad debts had been written off and that adequate allowance had been made for doubtful debts.

5Sch(I)(1)(h)

At the date of this report, the directors are not aware of any circumstances which would render the amount written off for bad debts or the amount of allowance for doubtful debts in the financial statements of the Group and of the Company inadequate to any substantial extent.

CURRENT ASSETS

5Sch(I)(1)(i)

Before the financial statements of the Group and of the Company were prepared , the directors took reasonable steps to ensure that any current assets which were unlikely to be realised in the ordinary course of business including their values as shown in the accounting records of the Group and of the Company had been written down to an amount which they might be expected so to realise.

5Sch(I)(1)(j)(i)

At the date of this report, the directors are not aware of any circumstances which would render the values attributed to the current assets in the financial statements of the Group and of the Company misleading.

Commentary:

If dividend has not been paid or recommended, the illustrative disclosures are as follows:

No dividend has been paid or declared by the Company since the end of the previous financial year.

The directors do not recommend the payment of any dividends in respect of the financial year ended 31 December 2022.

FLYING COLOURS BERHAD (Incorporated in Malaysia)

Reference

DIRECTORS' REPORT (CONTINUED)

VALUATION METHODS

5Sch(I)(1)(j)(ii)

At the date of this report, the directors are not aware of any circumstances which have arisen which render adherence to the existing method of valuation of assets or liabilities of the Group and of the Company misleading or inappropriate.

CONTINGENT AND OTHER LIABILITIES

At the date of this report, there does not exist:

5Sch(I)(1)(k)(i)

(i) any charge on the assets of the Group or of the Company which has arisen since the end of the financial year which secures the liabilities of any other person; and

5Sch(I)(1)(k)(ii)

(ii) any contingent liabilities in respect of the Group or of the Company which has arisen since the end of the financial year.

5Sch(I)(1)(I)

In the opinion of the directors, no contingent or other liability of the Group or of the Company has become enforceable, or is likely to become enforceable, within the period of twelve months after the end of the financial year which will or may affect the ability of the Group or of the Company to meet their obligations as and when they fall due.

CHANGE OF CIRCUMSTANCES

5Sch(I)(1)(m)

At the date of this report, the directors are not aware of any circumstances not otherwise dealt with in this report or the financial statements of the Group and of the Company which would render any amount stated in the financial statements misleading.

Commentary:

In cases where the Group or the Company has material uncertainty on going concern, the illustrative disclosure is as follows:

In the opinion of the directors, other than as described below, no contingent or other liability of the Group or of the Company has become enforceable, or is likely to become enforceable, within the period of twelve months after the end of the financial year which will or may affect the ability of the Group or of the Company to meet their obligations as and when they fall due.

[Description of material uncertainty on going concern]

DIRECTORS' REPORT (CONTINUED)

ITEMS OF MATERIAL AND UNUSUAL NATURE 1

In the opinion of the directors,

5Sch(I)(1)(n)

(i) the results of the operations of the Group and of the Company for the financial year were not substantially affected by any item, transaction or event of a material and unusual nature; and 2

5Sch(I)(1)(o)

(ii) no item, transaction or event of a material and unusual nature has arisen in the interval between the end of the financial year and the date of this report which is likely to affect substantially the results of the operations of the Group and of the Company for the financial year in which this report is made.

AUDITORS' REMUNERATION

5Sch(I)(10)

The auditors' remuneration of the Group and the Company during the financial year were RM 438,000 and RM 150,000 respectively.

5Sch(I)(2)(d)

The Company has agreed to indemnify the auditors of the Company as permitted under Section 289 of the Companies Act 2016 in Malaysia.

5Sch(I)(1)(c)

ISSUE OF SHARES AND DEBENTURES 5 6

During the financial year, the Company:

- (i) issued 25,000,000 new ordinary shares at a price of RM2 per ordinary share as partial discharge of the purchase consideration for the acquisition of the 80% equity interest in PT Halia Palm Oil pursuant to a share sale agreement dated 20 January 2022; and 7
- (ii) issued 75,000,000 new ordinary shares at a price of RM2 per ordinary share for working capital purposes.

The new ordinary shares issued during the financial year rank pari passu in all respects with the existing ordinary shares of the Company.

During the financial year, the Company issued 100,000,000 units of convertible bonds at a price of RM1.05 per unit. Each bond is convertible at any time up to maturity into 10,000,000 ordinary shares at the conversion price of RM2 each, which is at a rate of one ordinary share for every ten convertible bonds held. Unconverted bonds shall become repayable on demand. The bonds mature ten years from the issue date and carry a coupon interest rate of 6.5% payable on 31 December each year.

Commentary:

5Sch(I)(1)(p)

Pursuant to 5Sch(I)(1)(p) of the Companies Act 2016, the directors' report shall disclose any other details as determined by the Registrar.

FLYING COLOURS BERHAD (Incorporated in Malaysia)

Reference

DIRECTORS' REPORT (CONTINUED)

Commentary (continued):

5Sch(I)(1)(n)

Pursuant to 5Sch(I)(1)(n) of the Companies Act 2016, the directors' report shall state whether the results of the Company's operations during the financial year were, in the opinion of the directors, substantially affected by any item, transaction or event of a material and unusual nature and, if so, giving particulars of that item, transaction or event and the amount or the effect of the item, transaction or event, if known or reasonably ascertainable.

In cases where there were items, transactions or events of material and unusual nature that affect the results of the Group's or of the Company's operation (e.g. material impairment losses or one-off transactions/events), entities shall disclose the particulars of that item, transaction or event and the amount or the effect of the item, transaction or event, if known or reasonably ascertainable as illustrated below:

Other than the impairment loss on trade and other receivables of RM XXX, in the opinion of the directors...

5Sch(I)(10)

Pursuant to 5Sch(I)(10) of the Companies Act 2016, the directors' report shall disclose the total amount paid to or receivable by the auditors as remuneration for their services as auditors, inclusive of all fees, percentages or other payments or consideration given by or from the Company or by or from any subsidiary of the Company. The auditors' remuneration includes audit and non-audit service fees.

5Sch(I)(2)(d)

- Pursuant to 5Sch(I)(2)(d) of the Companies Act 2016, the directors' report shall disclose the total amount of any indemnity given to or insurance effected for auditors of the Company.
- 6 In cases where no shares or debentures are issued, the illustrative disclosure is as follows:

During the financial year, no new issue of shares or debentures were made by the Company.

S2

S127

- 6 "Debenture" includes debenture stock, bonds, sukuk, notes and any other securities of a corporation whether constituting a charge on the assets of the corporation or not.
- Illustrative disclosure where the issue price is different with the fair value of shares issued at the date of acquisition.

During the financial year, the Company issued 25,000,000 new ordinary shares at a price of RM2 per ordinary share as partial discharge of the purchase consideration for the acquisition of the 80% equity interest in PT Halia Palm Oil pursuant to a share sale agreement dated 20 January 2022. For the purpose of accounting for the shares consideration, the fair value of RM2.20 per ordinary share as at the date of completion was recorded instead of issue price of RM2 per ordinary share.

TREASURY SHARES

Treasury shares relate to ordinary shares of the Company that are repurchased and held by the Company in accordance with the requirement of Section 127 of the Companies Act 2016 in Malaysia.

There was no repurchase of the Company's issued ordinary shares, nor any resale, cancellation or distribution of treasury shares during the financial year.

S127

DIRECTORS' REPORT (CONTINUED)

TREASURY SHARES (CONTINUED)

As at 31 December 2022, the Company held 10,000,000 treasury shares out of its 300,000,000 issued and paid-up ordinary shares. Such treasury shares are held at a carrying amount of RM20,000,000.

OPTIONS GRANTED OVER UNISSUED SHARES

No options were granted to any person to take up the unissued shares of the Company during the financial year other than the issue of options pursuant to the Employee's Share Option Scheme ("ESOS").

At an Extraordinary General Meeting held on 26 March 2019, the Company's shareholders approved the establishment of an ESOS for directors who have rendered services of three years and above.

5Sch(I)(5) 5Sch(I)(6) The share options granted are vesting immediately and settlement is by issuance of fully paid ordinary shares. The exercise price in each grant is set 10% below the weighted average of the market prices of the Company's ordinary shares in the last five trading days before the grant date. Option may be exercised any time from the date of vesting to the date of expiry.

The options offered for the subscription of unissued ordinary shares and the respective exercise prices are as follows:

			Number of option over ordinary shares				
		Exercise	At 1 January			At 31 December	
Grant date	Expiry date	price	2022	Granted	Exercised	2022	
30 June 2021 31 October 2021	29 June 2026 30 October 2026	RM1.75 RM1.85	5,000,000 5,000,000	-	-	5,000,000 5,000,000	
			10,000,000		-	10,000,000	

DIRECTORS

S253(1)(a)

The directors in office during the financial year and during the period from the end of the financial year to the date of this report are:

Hashid Alim bin Samad* Lo Chun Yin Wong Kah Him*

Ong Kai Jung (Appointed on 4 September 2022) Mohammad Ali bin Akbar (Resigned on 1 December 2022)

Other than as stated above, the names of the directors of the subsidiaries of the Company in office during the financial year and during the period from the end of the financial year to the date of this report are:

Ang Swee Hooi Chen Hua Ting Ali Bin Hushin

^{*} Directors of the Company and certain subsidiaries

FLYING COLOURS BERHAD (Incorporated in Malaysia)

DIRECTORS' REPORT (CONTINUED)

DIRECTORS' INTERESTS

5Sch(I)(1)(e) 5Sch(I)(1)(d)(ii) According to the Register of Directors' Shareholdings required to be kept by the Company under Section 59 of the Companies Act 2016 in Malaysia, the interests of directors in office at the end of the financial year in shares in the Company and its related corporations during the financial year were as follows:

Interests in the Company

	Nu	ımber of ordina	ry shares	
	At 1 January 2022	Bought	31 Sold	At December 2022
Direct interests: Hashid Alim bin Samad	50,000,000	10,000	-	50,010,000
Indirect interests: Hashid Alim bin Samad Lo Chun Yin	15,000,000 ⁽¹⁾ 1,000,000 ⁽²⁾	10,000	<u>-</u> -	15,010,000 ⁽¹⁾ 1,000,000 ⁽²⁾

S8(4) S59(11)(c)

By virtue of his interests in the ordinary shares of the Company and pursuant to Section 8 of the Companies Act 2016 in Malaysia, Hashid Alim bin Samad is deemed to have an interest in the ordinary shares of the subsidiaries to the extent that the Company has an interest.

Other than as stated above, none of the other directors in office at the end of the financial year had any interest in ordinary shares or debentures of the Company and its related corporations during the financial year.

Commentary:

S8(4)(c)

Pursuant to Section 8(4) of the Companies Act 2016, a person shall be deemed to have an interest in the Company when a body corporate holds shares in the Company and that person has a controlling or substantial financial interest of not less than <u>20%</u> of the votes in that body corporate.

DIRECTORS' BENEFITS

5Sch(I)(3) 5Sch(I)(2) Since the end of the previous financial year, no director of the Company has received or become entitled to receive any benefit (other than benefits included in the aggregate amount of emoluments received or due and receivable, by the directors as shown below) by reason of a contract made by the Company or a related corporation with the director or with a firm of which the director is a member, or with a company in which the director has a substantial financial interest. [other than any deemed benefit which arise from transactions as shown below.

Description of any deemed benefit arise.]

⁽¹⁾ Shares held through company in which the director has substantial financial interests.

⁽²⁾ Shares held through spouse and/or children.

DIRECTORS' REPORT (CONTINUED)

DIRECTORS' BENEFITS (CONTINUED)

5Sch(I)(2)(a)

The directors' benefits of the Group and of the Company were as follows:

	Group	Company
	RM'000	RM'000
Directors of the Company		
Executive directors - Fees	2,000	600
- Other emoluments	6,600	2,200
	8,600	2,800
Non-executive directors		
- Fees	XXX	XXX
- Other emoluments	XXX	XXX
	XXX	XXX
Directors of subsidiaries		
Executive Directors		
- Fees	XXX	XXX
- Other emoluments	XXX	XXX
	XXX	XXX
	8,600	2,800

5Sch(I)(1)(d)(i)

Neither during, nor at the end of the financial year, was the Company a party to any arrangements where the object is to enable the directors to acquire benefits by means of the acquisition of shares in, or debentures of the Company or any other body corporate, other than those arising from the share options granted under the ESOS.

INDEMNITY TO DIRECTORS AND OFFICERS 1

5Sch(I)(2)(d)

During the financial year, the total amount of indemnity insurance coverage and insurance premium paid for the directors and officers of the Company were RMXXX and RMXXX respectively.

Commentary:

1

5Sch(I)(2)(d)

Pursuant to 5Sch(I)(2)(d) of the Companies Act 2016, the directors' report shall state the total amount of any indemnity given to or insurance effected for, any director or officer of the Company. The indemnity to auditor of the Company was disclosed under separate heading in page 10.

In cases where no indemnity was given, the illustrative disclosure is as follows:

During the financial year, no indemnity was given to or insurance effected for, any director or officer of the Company.

ULTIMATE HOLDING COMPANY

The directors regard Flying Colours Holdings Sdn Bhd, a company incorporated in Malaysia, as the ultimate holding company of the Company.

DIRECTORS' REPORT (CONTINUED)

S253(3) 5Sch(II)

BUSINESS REVIEW

Commentary:

5Sch(I)(7)

1 5Sch(I)(7) of the Companies Act 2016 states that:

"The directors' report shall specify clearly either in the profit and loss account of the holding company or consolidated profit and loss account of the holding company and its subsidiary companies the name, place of incorporation, principal activities, and percentage of issued share capital held by the holding company in each subsidiary to which that profit and loss account or other document relates."

5Sch(I)(8)

2 5Sch(I)(8) of the Companies Act 2016 states that:

"If the auditors' report on the accounts of a subsidiary company is qualified in any way, the consolidated balance sheet of the holding company, as the case may be, shall contain particulars of the manner in which the report is qualified in so far as the matter which is the subject of the qualification is not covered by the holding company's own accounts and is material from the point of view of its members."

Illustrative disclosure where accounts of any subsidiary company is qualified

Other than those subsidiaries with modified opinions in their auditors' reports as disclosed in Note X to the financial statements, the available auditors' reports on the accounts of the remaining subsidiaries did not contain any qualification.

5Sch(I)(9)

Pursuant to 5Sch(I)(9) of the Companies Act 2016, disclosure shall be made under separate heading in the balance sheet of every subsidiary company the extent of its holding of shares in the holding company and in other related corporations.

S253(3) 5Sch(II)

- 1. Pursuant to S253(3) of the Companies Act 2016, the directors' report may include a business review as set out in 5Sch(II) or any other reporting as prescribed.
 - 2. The business review may, to the extent necessary for an understanding of the development, performance or position of the Company's business, contain:
 - (a) a fair review of the Company's business;
 - (b) a description of the principal risks and uncertainties facing by the Company;
 - (c) a balanced and comprehensive analysis of:
 - (i) the development and performance of the Company's business during the financial year;
 - (ii) the position of the Company's business at the end of that year, consistent with the size and complexity of the business; and
 - (iii) the key performance indicators;
 - (d) information about:
 - (i) environmental matters, including the impact of the Company's business on the environment;
 - (ii) the Company's employees; and
 - (iii) social and community issues, including information about any policies of the Company in relation to those matters and the effectiveness of those policies; and

DIRECTORS' REPORT (CONTINUED)

Commentary: (continued)

S253(3) 5Sch(II)

- 2. The business review may, to the extent necessary for an understanding of the development, performance or position of the Company's business, contain: (continued)
 - (e) subject to paragraph 7 below, information about persons with whom the Company has contractual or other arrangements which are essential to the business of the Company.
- 3. If the review does not contain any of the information mentioned in subparagraphs 2(a), (b), (c) and (d) above, it shall state which of the information it does not contain.
- 4. The review may, where appropriate, include references to, and additional explanations of, amounts included in the Company's financial statements.
- 5. In relation to a group directors' report, this business review has effect as if the references to the Company include references to its subsidiary included in the consolidation.
- 6. Nothing in the business review requires the disclosure of information about impending developments or matters in the course of negotiation if the disclosure would, in the opinion of the directors, be prejudicial to the interests of the Company.
- 7. Nothing in subparagraph 2(e) above requires the disclosure of information about a person if the disclosure would, in the opinion of the directors, be prejudicial to that person and contrary to the public interest.
- 8. For the purposes of this business review, "key performance indicators" means factors by reference to which the development, performance or position of the Company's business can be measured effectively.

STATEMENTS OF FINANCIAL POSITION AS AT 31 DECEMBER 2022 (CONTINUED)

Commentary:

An entity shall present a third statement of financial position as at the beginning of the preceding period based on the following requirements:

Nature		d statement of ncial position	R	elated notes
	Yes?	Required by	Yes?	Required by
(a) First-time adoption of MFRSs	✓	MFRS 1.21	✓	MFRS 1.21
(b) Retrospective application *	✓	MFRS 101.40A	х	MFRS 101.40C
(c) Retrospective restatement *	✓	MFRS 101.40A	х	MFRS 101.40C
(d) Reclassification *	✓	MFRS 101.40A	х	MFRS 101.40C

* An entity shall present a third statement of financial position <u>if and only if</u> the retrospective application, retrospective restatement or reclassification has a material effect on the information in the statement of financial position as at the beginning of the preceding period.

In this illustrative financial statements, the retrospective application of changes in accounting policy is deemed to have a material effect on the information in the statements of financial position as at the beginning of the preceding period to illustrate the third statement of financial position.

- An entity shall present current and non-current assets, and current and non-current liabilities, as separate classifications in its statement of financial position, except when a presentation based on liquidity provides information that is reliable and more relevant. When that exception applies, all assets and liabilities shall be presented in order of liquidity. Nevertheless, an entity is also permitted to present some of its assets and liabilities using a current and non-current classification and others in order of liquidity when this provides information that is reliable and more relevant. The need for a mixed basis of presentation might arise when an entity has diverse operations.
- If an entity does not present right-of-use assets separately in the statement of financial position, it shall include right-of-use assets within the same line item as that within which the corresponding underlying assets would be presented as if they were owned, and disclose which line items in the statement of financial position include those right-of-use assets.

Alternatively, an entity may choose to present right-of-use assets separately in the statement of financial position. Right-of-use assets that meet the definition of investment property are presented in the statement of financial position as investment property.

101.64

16.47(a)

16.47(a) 16.48

STATEMENTS OF FINANCIAL POSITION AS AT 31 DECEMBER 2022 (CONTINUED)

Commentary (continued):

15.91-98

MFRS 15 Revenue from Contracts with Customers is silent on the classification of contract costs, namely costs to obtain a contract and costs to fulfil a contract. Therefore, entities will need to develop an appropriate accounting policy. There is lack of guidance in MFRS on the presentation of costs to obtain a contract.

In view of the nature of costs to obtain a contract, these costs are presented as part of contract costs and its amortisation is included as part of distribution expenses. In contrast, the nature of costs to fulfil a contract is such that they directly affect the entity's performance under the contract. Therefore, costs to fulfil a contract should be presented as a separate class of asset in the statement of financial position and its amortisation within cost of sales.

15.B20-15.B27

MFRS 15 and other standards do not specify where assets for rights to recover products from customers with regard to sale with a right of return should be presented. A refund asset relating to customers' right to return products can be disclosed as a separate line item, 'Right to returned goods asset'. In many cases entities may conclude that it is not necessary to present this balance separately from inventories. In such a case, separate disclosure of this balance should be made in the notes to the financial statements.

15.105; 15.BC320 MFRS 15.105 states that when either party to a contract has performed, an entity shall present the contract in the statement of financial position as a contract asset or a contract liability, depending on the relationship between the entity's performance and the customer's payment.

15.App A

Contract assets refer to an entity's right to consideration in exchange for goods or services that the entity has transferred to a customer when that right is conditioned on something other than the passage of time (for example, the entity's future performance). Any unconditional rights to consideration (i.e. amounts that relate to completed performance obligations for which payment is due under the contract) should be presented separately as a receivable.

15.105

Contract liabilities refer to an entity's obligation to transfer goods or services to a customer for which the entity has received consideration (or the amount is due) from the customer.

15.App A

An entity shall classify an asset as current when the asset is cash or a cash equivalent (as defined in MFRS 107) unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

101.66(d)

If the lessee does not present lease liabilities separately in the statements of financial position, the lessee shall disclose which line item in the statement of financial position that include those liabilities.

16.47(b)

Alternatively, an entity may choose to present lease liabilities separately from other liabilities in the statement of financial position.

133.66	Diluted earnings/(loss) per share attributable to ordinary equity holders of the Company (sen):	37				
	- From continuing operations		45.7	28.9		
133.68	- From discontinued operation		(1.0) *	0.6		
			44.7*	29.5		

133.42 133.43 * Note: An entity uses profit or loss from continuing operations attributable to the owners of the Company as the control number to establish whether potential ordinary shares are dilutive or anti-dilutive. Potential ordinary shares are anti-dilutive when their conversion to ordinary shares would increase earnings per share or decrease loss per share from continuing operations. Since the effect of assumed conversion of potential ordinary shares from continuing operations is dilutive, the effect of the said assumed conversion on loss per share from discontinued operation, although anti-dilutive (as disclosed above), should therefore be calculated.

The accompanying notes form an integral part of these financial statements.

107.31

107.33

MFRS 107 Statement of Cash Flows and other standards do not specify where cash flows from interest and dividends received and paid should be presented. Cash flows from interest and dividends received and paid shall each be disclosed separately in a consistent manner from period to period as either operating, investing or financing activities.

In accordance with MFRS 107, an entity has a policy choice for the classification of interest paid and interest and dividends received in statements of cash flows, either:

- classified as operating cash flows because they enter into the determination of profit or loss; or
- classified as financing cash flows and investing cash flows respectively, because they are costs
 of obtaining financial resources or returns on investments.

The accompanying notes form an integral part of these financial statements.

NOTES TO THE FINANCIAL STATEMENTS

CORPORATE INFORMATION

101.51(a) 101.138(a) Flying Colours Berhad ("the Company") is a public limited liability company, incorporated and domiciled in Malaysia and is listed on the Main Market of Bursa Malaysia Securities Berhad. The registered office of the Company is located at Flying Colours Tower, Level 30, Avenue 5, Bangsar South City, 59200 Kuala Lumpur. The principal place of business of the Company is located at Flying Colours Tower, Level 50, Avenue 5, Bangsar South City, 59200 Kuala Lumpur.

101.138(c) 124.13 5Sch(I)(4)

The immediate and ultimate holding companies are Flying Colours Sdn Bhd and Flying Colours Holdings Sdn Bhd respectively. Both companies are incorporated in Malaysia and produce financial statements for public use.

101.138(b)

The principal activities of the Company are investment holding, property development and provision of construction services. The principal activities of its subsidiaries are disclosed in Note 10.

There have been no significant changes in the nature of these activities during the financial year except for the service concession arrangements entered into with the State Governments as disclosed in Note 9(b).

110.17

The financial statements were authorised for issue by the Board of Directors in accordance with a resolution of the directors on (date).

101.112(a)

2. **BASIS OF PREPARATION**

2.1 **Statement of Compliance**

101.16 101 MY16 1 101.114(c)(i)

The financial statements of the Group and of the Company have been prepared in accordance with Malaysian Financial Reporting Standards ("MFRSs"), the International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

108.28&29

Adoption of amendments/improvements to MFRSs and explanation of change in accounting policy

(a) Adoption of amendments/improvements to MFRSs

The Group and the Company have adopted the following amendments/improvements to MFRSs for the current financial year:

Amendments/Improvements to MFRSs

MFRS 1	First-time Adoption of Malaysian Financial Reporting Standards
MFRS 3	Business Combinations
MFRS 9	Financial Instruments
MFRS 116	Property, Plant and Equipment
MFRS 137	Provisions, Contingent Liabilities and Contingent Assets
MFRS 141	Agriculture

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2. BASIS OF PREPARATION (CONTINUED)

108.28&29

- 2.2 Adoption of amendments/improvements to MFRSs and explanation of change in accounting policy (continued)
 - (a) Adoption of amendments/improvements to MFRSs (continued)

The adoption of the above amendments/improvements to MFRSs did not have any significant effect on the financial statements of the Group and of the Company and did not result in significant changes to the Group's and the Company's existing accounting policies.

Commentary:

When the initial application of the amendments/improvements to MFRSs have significant effect on the financial statements, the illustrative disclosures are as follows:

The adoption of the above amendments/improvements to MFRSs did not have any significant effect on the financial statements of the Group and of the Company, and did not result in significant changes to the Group's and the Company's existing accounting policies, except for those as discussed below.

Amendments to MFRS 9 Financial Instruments

The amendments clarify the fees an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. In determining those fees paid net of fees received, a borrower includes only fees paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf.

The Group and the Company have adopted the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the Group and the Company apply the amendment (the date of initial application).

The effect of applying the amendments to MFRS on the Group's and the Company's financial statements are disclosed as follows: *

Amendments to MFRS 116 Property, Plant and Equipment

The Group and the Company have adopted the amendments to MFRS 116 for the first time in the current year.

The amendments prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the entity is preparing the asset for its intended use. Instead, an entity shall recognise such sales proceeds and related cost in profit or loss.

The effect of applying the amendments to MFRS on the Group's and the Company's financial statements are disclosed as follows: *

When the initial application of the amendments/improvements to MFRSs have significant effect on the financial statements, the illustrative disclosures are as follows (continued):

Amendments to MFRS 137 Provisions, Contingent Liabilities and Contingent Assets

The Group and the Company have adopted the amendments to MFRS 137 for the first time in the current year.

The amendments specify which costs an entity includes in determining the cost of fulfilling a contract for the purpose of assessing whether the contract is onerous. Prior to the application of the amendments, the Group had not identified any contracts as being onerous as the Group included only incremental costs to fulfil a contract when determining whether the contract was onerous. As a result of the amendments, an allocation of other directly related costs have been included by the Group in determining the costs of fulfilling the contracts.

The effect of adoption of the above amendment is as follows:

Impact on statements of financial position as at 1 January 2022 of the Group and of the Company:

	Group Increase/ (Decrease) RM'000	Increase/ (Decrease) RM'000
Assets		
Deferred tax assets	XXX	XXX
Total assets	XXX	xxx
Liabilities Current liabilities		
Provisions	XXX	XXX
Total liabilities	XXX	XXX
Total adjustment on equity		
Retained earnings	(xxx)_	(xxx)_
	(xxx)	(xxx)

- 2.2 Adoption of amendments/improvements to MFRSs and explanation of change in accounting policy (continued)
 - (b) Change in accounting policy 1
 - (i) Accounting policy for investment property

In the previous financial years, investment property was measured at cost less accumulated depreciation and accumulated impairment losses. During the financial year, the accounting policy has been changed to measure the investment property at its fair value with changes in fair value to be recognised in profit or loss. This voluntary change in accounting policy is to appropriately reflect the change of the Group's business model objective in managing its investment property for fair value changes.

The change in accounting policy has been applied retrospectively. The effect of the change in accounting policy has been recognised directly in retained earnings and disclosed in below.

Statements of financial position

	As previously reported RM'000	Adjustments RM'000	As restated RM'000
Group			
At 1 January 2021			
Investment properties Deferred tax liabilities	28,600 (11,800)	10,000 (1,000)	38,600 (12,800)
At 31 December 2021			
Investment properties	30,200	13,000	43,200
Deferred tax liabilities	(17,500)	(1,300)	(18,800)
Company			
At 1 January 2021

2.3 New MFRS and amendments/improvements to MFRSs that have been issued, but yet to be effective (continued)

(b) The Group and the Company plan to adopt the above applicable new MFRS and amendments/improvements to MFRSs when they become effective. A brief discussion on the above significant new MFRS and amendments/improvements to MFRSs are summarised below.

Amendments to MFRS 10 Consolidated Financial Statements and MFRS 128 Investments in Associates and Joint Ventures

These amendments address an acknowledged inconsistency between the requirements in MFRS 10 and those in MFRS 128, in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

The main consequence of the amendments is that a full gain or loss is recognised when a transaction involves a business, as defined in MFRS 3. A partial gain or loss is recognised when a transaction involves assets that do not constitute a business.

Amendments to MFRS 16 Leases

The amendments clarify how an entity should subsequently measure the leaseback liability that arise in a sale and leaseback transaction. Although MFRS 16 includes requirements on how to account for a sale and leaseback at the date the transaction takes place, it has not specified how to measure the sale and leaseback transaction when reporting after that date.

The amendments add subsequent measurement requirements for the right-of-use assets and lease liability arising from a sale and leaseback transaction by clarifying that a seller-lessee in a sale and leaseback transaction shall apply paragraphs 29 to 35 to the right-of-use asset arising from the leaseback and paragraphs 36 to 46 to the lease liability arising from the leaseback. The amendments will not change the accounting for leases other than those arising in a sale and leaseback transaction.

Amendments to MFRS 101 Presentation of Financial Statements

The amendments include specifying that an entity's right to defer settlement of a liability for at least twelve months after the reporting period must have substance and must exist at the end of the reporting period; clarifying that classification of liability is unaffected by the likelihood of the entity to exercise its right to defer settlement of the liability for at least twelve months after the reporting period; clarifying how lending conditions affect classification of a liability; and clarifying requirements for classifying liabilities an entity will or may settle by issuing its own equity instruments.

2. BASIS OF PREPARATION (CONTINUED)

108.30&31

2.3 New MFRS and amendments/improvements to MFRSs that have been issued, but yet to be effective (continued)

(b) The Group and the Company plan to adopt the above applicable new MFRS and amendments/improvements to MFRSs when they become effective. A brief discussion on the above significant new MFRS and amendments/improvements to MFRSs are summarised below. (continued)

Amendments to MFRS 101 Presentation of Financial Statements (continued)

In another amendments, an entity is required to disclose its material accounting policy information rather than significant accounting policies. The amendments, amongst others, also include examples of circumstances in which an entity is likely to consider an accounting policy information to be material to its financial statements. To support this amendments, MFRS Practice Statement 2 was also amended to provide guidance on how to apply the concept of materiality to accounting policy information disclosures. The guidance and examples provided in the MFRS Practice Statement 2 highlight the need to focus on entity-specific information and demonstrate how the four-step materiality process can address standardised (or boilerplate) information and duplication of requirements of MFRSs in the accounting policy information disclosures.

The latest amendments to MFRS 101 clarify how conditions with which an entity must comply within 12 months after the reporting period affect the classification of a liability. As such, the amendments specify that covenants to be complied with after the reporting date do not affect the classification of debt as current or non-current at the reporting date. Instead, the amendments require an entity to disclose information about these covenants in the notes to the financial statements.

Amendments to MFRS 108 Accounting Policies, Changes in Accounting Estimates and Errors

The amendments revise the definition of accounting estimates to clarify how an entity should distinguish changes in accounting policies from changes in accounting estimates. The distinction is important because the changes in accounting estimates are applied prospectively to transactions, other events, or conditions from the date of that change, but changes in accounting policies are generally also applied retrospectively to past transactions and other past events.

Amendments to MFRS 112 Income Taxes

The amendments specify how an entity should account for deferred tax on transactions such as leases and decommissioning obligation.

In specified circumstances, MFRS 112 exempts an entity from recognising deferred tax when it recognises assets or liabilities for the first time. There had been some uncertainties about whether the exemption from recognising deferred tax applied to transactions such as leases and decommissioning obligations – transactions for which an entity recognises both an asset and a liability. The amendments clarify that the exemption does not apply and that entity is required to recognise deferred tax on such transactions.

2.3 New MFRS and amendments/improvements to MFRSs that have been issued, but yet to be effective (continued)

Commentary:

Illustrative disclosure where an entity has quantified the estimated financial impact

Other than the estimated financial impact arising from the adoption of MFRS XX, the detailed analysis on the financial effects of the adoption of other new MFRSs, amendments /improvements to MFRSs, new IC Interpretation ("IC Int") and amendments to IC Int are currently still being assessed by the Group and the Company.

Estimated impact of the adoption of MFRS XX

The impact of the adoption of MFRS XX on the Group's financial statements as at 1 January 20XX is estimated to be, as follows:

	EStilliateu III	ilpact of adoption of	INILUS VV
	Adjustments		
	At 31 December	due to adoption	At 1 January
	20XX-1	of MFRS XX	20XX
	RM'000	RM'000	RM'000
XX	XXX	XXX	XXX
XX	XXX	XXX	XXX
Retained earnings	XXX	XXX	XXX

XXX

Estimated impact of adoption of MERS XX

XXX

The total estimated adjustment (net of tax) to the Group's equity at 1 January 20XX is RMXXX. The main components of the estimated adjustment are as follows:

• ...

Non-controlling interests

XX XX

• ..

The actual impacts of adopting the above standards at 1 January 20XX may change because the Group has not finalised the assessment of the impacts and the new accounting policies are subject to change until the Group presents its first financial statements that include the date of initial application.

Illustrative disclosure where an entity still in the midst to quantify the estimated financial impact

The Group and the Company are currently performing a detailed analysis to determine the election of the practical expedients and to quantify the financial effects arising from the adoption of the new MFRSs, amendments/improvements to MFRSs, new IC Int and amendments to IC Int.

OR

The Group and the Company are currently assessing the impact of initial application of the above applicable amendments/improvements to MFRSs. Nevertheless, the Group and the Company expect that the initial application is unlikely to have material financial impacts to the current period and prior period financial statements of the Group and of the Company.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2. BASIS OF PREPARATION (CONTINUED)

2.4 Functional and presentation currency

The individual financial statements of each entity in the Group are measured using the currency of the primary economic environment in which they operate ("the functional currency"). The consolidated financial statements are presented in Ringgit Malaysia ("RM"), which is also the Company's functional currency, and has been rounded to the nearest thousand, unless otherwise stated.

2.5 Basis of measurement

The financial statements of the Group and of the Company have been prepared on the historical cost basis, except as otherwise disclosed in Note 3.

Commentary:

Illustrative disclosure where an entity has made changes in accounting estimates

2.X Change in method of computation for amortisation of an intangible asset

In the previous financial years, amortisation of an acquired trademark license was computed based on the straight-line basis over the tenure of the trademark license granted by the owner. With effect from 1 January 20XX, amortisation of this intangible asset has been computed based on the units-of-production method over the tenure of the trademark licence. This change in method reflects more accurately the consumption or use of the intangible asset. The effect of the change in method of computation has been applied prospectively, commencing in the current financial year ended 31 December 20XX. This change has resulted in an increase in amortisation expense of RMXXX for the current financial year. It is impracticable to estimate the effect of this change in estimate in future financial years.

Illustrative disclosure when there are significant doubts about going concern but mitigating actions judged sufficient to make going concern appropriate and material uncertainties about going concern remain after considering mitigating actions (Material Uncertainty Related to Going Concern)

Financial statements are prepared on going concern assumption. The disclosure of going concern is by exception. If there are material uncertainties affecting the ability of a reporting entity to continue as a going concern, those uncertainties should be disclosed together with the reasons supporting the preparation of the financial statements as a going concern. Accordingly, the management shall adequately disclose the following:

- the principal events or conditions that may cast significant doubt on the entity's ability to continue as a going concern;
- b) management's plans to deal with these events or conditions; and
- c) the material uncertainty related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern and, therefore, that it may be unable to realise its assets and discharge its liabilities in the normal course of business.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2. BASIS OF PREPARATION (CONTINUED)

Commentary (continued):

Illustrative disclosure when there are significant doubts about going concern but mitigating actions judged sufficient to make going concern appropriate and material uncertainties about going concern remain after considering mitigating actions (Material Uncertainty Related to Going Concern) (continued)

The illustrative disclosure is as follows:

2.X Fundamental accounting principle

The financial statements of the Group have been prepared on the assumption that the Group will continue as a going concern. The application of the going concern basis is based on the assumption that the Group will be able to realise its assets and discharge its liabilities in the normal course of business.

During the financial year ended 31 December 20XX, the Group incurred a net loss of RMXXX and, as of that date, the Group's current liabilities exceeded its current assets by RMXXX. These events or conditions indicate that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern.

The ability of the Group to continue as a going concern will be dependent on:

- (a) ...
- (b) ...
- (c) ...
- (d) ...

In the event that these are not forthcoming, the Group may be unable to realise its assets and discharge its liabilities in the normal course of business. Accordingly, the financial statements of the Group may require adjustments relating to the recoverability and classification of recorded assets and liabilities that may be necessary should the Group be unable to continue as going concern.

The directors of the Company are of the opinion that the preparation of the financial statements of the Group and of the Company on a going concern basis remains appropriate as they believe XXX, and accordingly, realise their assets and discharge their liabilities in the normal course of business.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Unless otherwise stated, the following accounting policies have been applied consistently to all the financial years presented in the financial statements of the Group and of the Company.

3.1 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries. The financial statements of the subsidiaries, associates, and joint ventures used in the preparation of the consolidated financial statements are prepared for the same reporting date as the Company. Consistent accounting policies are applied to like transactions and events in similar circumstances.

(a) Subsidiaries and business combination

Subsidiaries are entities (including structured entities) over which the Group is exposed, or has rights, to variable returns from its involvement with the acquirees and has the ability to affect those returns through its power over the acquirees.

The financial statements of subsidiaries are included in the consolidated financial statements from the date the Group obtains control of the acquirees until the date the Group loses control of the acquirees.

The Group applies the acquisition method to account for business combinations from the acquisition date. 1 2 3

10.20

10.6

10.7

3.4

Commentary:

1 In cases where merger accounting is applied:

The Group applies the acquisition method of accounting except for those business combinations which were accounted for using merger method of accounting. Three subsidiaries (i.e. ABC Sdn Bhd, DEF Sdn Bhd and GHI Sdn Bhd) are consolidated using acquisition method of accounting, the rest of the subsidiaries are accounted for using the merger method of accounting.

A business combination involving entities under common control is a business combination in which all the combining entities or subsidiaries are ultimately controlled by the same party and parties both before and after the business combination, and that control is not transitory. Subsidiaries acquired which have met the criteria for pooling of interest are accounted for using merger accounting principles. Under the merger method of accounting, the results of subsidiaries are presented as if the business combination had been affected throughout the current and previous financial years. The assets and liabilities combined are accounted for based on the carrying amounts from the perspective of the common control shareholder at the date of transfer. On consolidation, the difference between costs of acquisition over the nominal value of share capital of the subsidiaries is taken to merger reserve or merger deficit.

3.B1-B4

101.17(b) 101.112(a) 101.117(b) 101.119

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
 - 3.1 Basis of consolidation (continued)
 - (a) Subsidiaries and business combination (continued)

Commentary (continued):

2 In cases where reorganisation scheme is applied:

Acquisition of entities under a reorganisation scheme does not result in any change in economic substance. Accordingly, the consolidated financial statements of the Company are a continuation of the acquired entity and is accounted for as follows:

- the assets and liabilities of the acquired entity are recognised and measured in the consolidated financial statements at the pre-combination carrying amounts, without restatement to fair value;
- the retained earnings and other equity balances of acquired entity immediately before the business combination are those of the Group; and
- the equity structure, however, reflects the equity structure of the Company and the differences arising from the change in equity structure of the Group will be accounted for in other reserves.
- 3 In cases where reverse acquisition is applied:

On XXX, the Company had entered into a share sales agreement to acquire the entire equity interests in ABC Sdn Bhd. The said acquisition was completed on XXX and ABC Sdn Bhd became a whollyowned subsidiary of the Company.

In substance, ABC Sdn Bhd is the accounting acquirer although legally the Company is regarded as the legal parent and ABC Sdn Bhd is regarded as the legal subsidiary as ABC Sdn Bhd has the power to govern the financial and operating policies of the Company so as to obtain benefits from its activities.

Accordingly, the consolidated financial statements of the Group prepared following a reverse acquisition represent a continuation of the financial statements of ABC Sdn Bhd. Under the reverse acquisition accounting:

- (a) the assets and liabilities of ABC Sdn Bhd are recognised and measured at their precombination carrying value;
- (b) the retained earnings and other equity balances of ABC Sdn Bhd immediately before the business combination are those of the Group;
- (c) the amount recognised as issued equity instruments in the consolidated financial statements is determined by adding to the issued equity interest of ABC Sdn Bhd outstanding immediately before the business combination the cost of combination. However, the equity structure reflects the equity structure of the Company, including the equity interests issued by the Company to effect the combination; and
- (d) the comparative information presented in the consolidated financial statements is that of ABC Sdn Bhd.

3.B19

Reference

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.1 Basis of consolidation (continued)

(a) Subsidiaries and business combination (continued)

For a new acquisition, goodwill is initially measured at cost, being the excess of the following:

- the fair value of the consideration transferred, calculated as the sum of the acquisition-date fair value of assets transferred (including contingent consideration), the liabilities incurred to former owners of the acquiree and the equity instruments issued by the Group. Any amounts that relate to pre-existing relationships or other arrangements before or during the negotiations for the business combination, that are not part of the exchange for the acquiree, will be excluded from the business combination accounting and be accounted for separately; plus
- the recognised amount of any non-controlling interests in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets at the acquisition date (the choice of measurement basis is made on an acquisition-byacquisition basis); plus
- if the business combination is achieved in stages, the acquisition-date fair value of the previously held equity interest in the acquiree; less
- the net fair value of the identifiable assets acquired and the liabilities (including contingent liabilities) assumed at the acquisition date.

The accounting policy for goodwill is set out in Note 3.8(a).

When the excess is negative, a bargain purchase gain is recognised immediately in profit or loss at the acquisition date.

Transaction costs, other than those associated with the issue of debt or equity securities, that the Group incurs in connection with a business combination are expensed as incurred.

If the business combination is achieved in stages, the Group remeasures the previously held equity interest in the acquiree to its acquisition-date fair value, and recognises the resulting gain or loss, if any, in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss or transferred directly to retained earnings on the same basis as would be required if the acquirer had disposed directly of the previously held equity interest.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the business combination occurs, the Group uses provisional fair value amounts for the items for which the accounting is incomplete. The provisional amounts are adjusted to reflect new information obtained about facts and circumstances that existed as of the acquisition date, including additional assets or liabilities identified in the measurement period. The measurement period for completion of the initial accounting ends as soon as the Group receives the information it was seeking about facts and circumstances or learns that more information is not obtainable, subject to the measurement period not exceeding one year from the acquisition date.

3.18

3.34

3.53

0.12

10.B99

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.1 Basis of consolidation (continued)

(a) Subsidiaries and business combination (continued)

Upon the loss of control of a subsidiary, the Group derecognises the assets and liabilities of the former subsidiary, any non-controlling interests and the other components of equity related to the former subsidiary from the consolidated statement of financial position. Any gain or loss arising on the loss of control is recognised in profit or loss. If the Group retains any interest in the former subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently, it is accounted for as an associate, a joint venture or a financial asset.

Changes in the Group's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. The difference between the Group's share of net assets before and after the change, and the fair value of the consideration received or paid, is recognised directly in equity.

(b) Non-controlling interests

Non-controlling interests represent the equity in subsidiaries not attributable, directly or indirectly, to owners of the Company and are presented separately in the consolidated statement of financial position within equity.

Losses attributable to the non-controlling interests are allocated to the non-controlling interests even if the losses exceed the non-controlling interests.

(c) Associates

Associates are entities over which the Group has significant influence, but not control, to the financial and operating policies.

Investment in associates are accounted for in the consolidated financial statements using the equity method.

Under the equity method, the investment in associates are initially recognised at cost. The cost of investment includes transaction costs. Subsequently, the carrying amount is adjusted to recognise changes in the Group's share of net assets of the associate.

When the Group's share of losses exceeds its interest in an associate, the carrying amount of that interest including any long-term investments is reduced to zero, and the recognition of further losses is discontinued except to the extent that the Group has an obligation or has made payments on behalf of the associate.

When the Group ceases to have significant influence over an associate, any retained interest in the former associate at the date when significant influence is lost is measured at fair value and this amount is regarded as the initial carrying amount of a financial asset. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.1 Basis of consolidation (continued)

(c) Associates (continued)

When the Group's interest in an associate decreases but does not result in a loss of significant influence, any retained interest is not remeasured. Any gain or loss arising from the decrease in interest is recognised in profit or loss. Any gains or losses previously recognised in other comprehensive income are also reclassified proportionately to the profit or loss if that gain or loss would be required to be reclassified to profit or loss on the disposal of the related assets or liabilities.

(d) Joint arrangements

Joint arrangements arise when the Group and another party or parties are bound by a contractual arrangement, and the contractual arrangement gives the Group and the other party or parties, joint control of the arrangement. Joint control exists when there is contractually agreed sharing of control of an arrangement whereby decisions about the relevant activities require the unanimous consent of the parties sharing control.

Joint arrangements are classified and accounted for as follows:

- A joint arrangement is classified as a "joint operation" when the Group has rights to the assets and obligations for the liabilities relating to the arrangement. The Group accounts for its share of the assets (including its share of any assets held jointly), the liabilities (including its share of any liabilities incurred jointly), its revenue from the sale of its share of the output arising from the joint operation, its share of the revenue from the sale of the output by the joint operation and its expenses (including its share of any expenses incurred jointly).
- A joint arrangement is classified as "joint venture" when the Group has rights to the net assets of the arrangements. The Group accounts for its interest in the joint venture using the equity method in accordance with MFRS 128 *Investments in* Associates and Joint Ventures.

The Group has assessed the nature of its joint arrangement and determined them to be a joint venture and accounted for its interest in the joint venture using the equity method.

(e) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions are eliminated in preparing the consolidated financial statements.

Unrealised gains arising from transactions with equity-accounted associates and joint ventures are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.2 Separate financial statements

In the Company's statement of financial position, investment in subsidiaries, joint ventures and associates are measured at cost less any accumulated impairment losses, unless the investment is classified as held for sale or distribution. The cost of investment includes transaction costs. 1 The policy for the recognition and measurement of impairment losses shall be applied on the same basis as would be required for impairment of non-financial assets as disclosed in Note 3.16(b).

Contributions to subsidiaries are amounts for which the settlement is neither planned nor likely to occur in the foreseeable future is, in substance, considered as part of the Company's investment in the subsidiaries.

3.3 Foreign currency transactions and operations

(a) Translation of foreign currency transactions

Foreign currency transactions are translated to the respective functional currencies of the Group entities using the exchange rates prevailing at the transaction dates.

At the end of each reporting date, monetary items denominated in foreign currencies are retranslated at the exchange rates prevailing at the reporting date.

Non-monetary items denominated in foreign currencies that are measured at fair value are retranslated at the rates prevailing at the dates the fair values were determined. Non-monetary items denominated in foreign currencies that are measured at historical cost are translated at the historical rates as at the dates of the initial transactions.

Foreign exchange differences arising on settlement or retranslation of monetary items are recognised in profit or loss except for monetary items that are designated as hedging instruments in either a cash flow hedge or a hedge of the Group's net investment of a foreign operation. When settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely to occur in the foreseeable future, exchange differences are recognised in profit or loss in the separate financial statements of the parent company or the individual financial statements of the foreign operation. In the consolidated financial statements, the exchange differences are considered to form part of a net investment in a foreign operation and are recognised initially in other comprehensive income until its disposal, at which time, the cumulative amount is reclassified to profit or loss.

Commentary:

MFRS 127 Separate Financial Statements does not define cost. Cost is, in simple terms, the fair value of consideration paid by the purchaser.

Hence, an entity that uses the cost method in its separate financial statements to account for its investment in a subsidiary, associate or joint ventures should develop and consistently apply an accounting policy to either expense transaction costs in profit or loss, or capitalise them as part of the cost of the investment.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.3 Foreign currency transactions and operations (continued)

(a) Translation of foreign currency transactions (continued)

The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e. translation differences on items whose fair value gain or loss is recognised in other comprehensive income or profit or loss are also recognised in other comprehensive income or profit or loss, respectively).

(b) Translation of foreign operations

The assets and liabilities of foreign operations denominated in the functional currency different from the presentation currency, including goodwill and fair value adjustments arising on acquisition, are translated into the presentation currency at exchange rates prevailing at the reporting date. The income and expenses of foreign operations are translated at exchange rates at the dates of the transactions.

Exchange differences arising on the translation are recognised in other comprehensive income. However, if the foreign operation is a non-wholly owned subsidiary, then the relevant proportionate share of the translation difference is allocated to the non-controlling interests.

When a foreign operation is disposed of such that control, significant influence or joint control is lost, the cumulative amount in foreign exchange translation reserves related to that foreign operation is reclassified to profit or loss. For a partial disposal not involving loss of control of a subsidiary that includes a foreign operation, the proportionate share of cumulative amount in foreign exchange translation reserve is reattributed to non-controlling interests. For partial disposals of associates or joint ventures that do not result in the Group losing significant influence or joint control, the proportionate share of the cumulative amount in foreign exchange translation reserve is reclassified to profit or loss.

3.4 Financial instruments

Financial instruments are recognised in the statements of financial position when, and only when, the Group and the Company become a party to the contractual provisions of the financial instruments.

Except for the trade receivables that do not contain a significant financing component or for which the Group and the Company have applied the practical expedient, the financial instruments are recognised initially at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset and financial liability. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss. Trade receivables that do not contain a significant financing component or for which the Group and the Company have applied the practical expedient are measured at the transaction price determined under MFRS 15 Revenue from Contracts with Customers.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.4 Financial instruments (continued)

An embedded derivative is recognised separately from the host contract and accounted for as a derivative if, and only if, it is not closely related to the economic characteristics and risks of the host contract; it is a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured as fair value through profit or loss. The host contract, in the event an embedded derivative is recognised separately, is accounted for in accordance with the policy applicable to the nature of the host contract.

A derivative embedded within a hybrid contract containing a financial asset host is not accounted for separately. The financial asset host together with the embedded derivative is required to be classified in its entirety as a financial asset at fair value through profit or loss.

(a) Subsequent measurement

The Group and the Company categorise the financial instruments as follows:

(i) Financial assets

For the purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost
- Financial assets at fair value through other comprehensive income with recycling of cumulative gains and losses upon derecognition
- Financial assets designated at fair value through other comprehensive income with no recycling of cumulative gains and losses upon derecognition
- Financial assets at fair value through profit or loss

The classification depends on the entity's business model for managing the financial assets and the contractual cash flows characteristics of the financial assets.

The Group and the Company reclassify financial assets when and only when their business models for managing those assets change.

3.4 Financial instruments (continued)

(a) Subsequent measurement (continued)

The Group and the Company categorise the financial instruments as follows (continued):

(i) Financial assets (continued)

Debt instruments

Subsequent measurement of debt instruments depends on the Group's and the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group and the Company classify their debt instruments:

Amortised cost

Financial assets that are held for collection of contractual cash flows and those cash flows represent solely payments of principal and interest are measured at amortised cost. Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. The policy for the recognition and measurement of impairment is in accordance with Note 3.16(a). Gains and losses are recognised in profit or loss when the financial asset is derecognised, modified or impaired.

Fair value through other comprehensive income ("FVOCI")

Financial assets that are held for collection of contractual cash flows and for selling the financial assets, and the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. For debt instruments at FVOCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in profit or loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in other comprehensive income. The policy for the recognition and measurement of impairment is in accordance with Note 3.16(a). Upon derecognition, the cumulative fair value change recognised in other comprehensive income is recycled to profit or loss.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
 - 3.4 Financial instruments (continued)
 - (a) Subsequent measurement (continued)

The Group and the Company categorise the financial instruments as follows (continued):

(i) Financial assets (continued)

Debt instruments (continued)

Fair value through profit or loss ("FVPL")

Financial assets at FVPL include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortised cost or at FVOCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the statements of financial position at fair value with net changes in fair value recognised in the profit or loss.

Equity instruments

The Group and the Company subsequently measure all equity investments at fair value. Upon initial recognition, the Group and the Company can make an irrevocable election to classify its equity investments that is not held for trading as equity instruments designated at FVOCI. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are not recycled to profit or loss. Dividends are recognised as other income in the profit or loss when the right of payment has been established, except when the Group and the Company benefit from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in other comprehensive income. Equity instruments designated at FVOCI are not subject to impairment assessment.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial instruments (continued) 3.4

(a) Subsequent measurement (continued)

The Group and the Company categorise the financial instruments as follows (continued):

(ii) Financial liabilities

The Group and the Company classify their financial liabilities in the following measurement categories:

- Financial liabilities at fair value through profit or loss
- Financial liabilities at amortised cost

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading, including derivatives (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument) or financial liabilities designated into this category upon initial recognition.

Subsequent to initial recognition, financial liabilities at fair value through profit or loss are measured at fair value with the gain or loss recognised in profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in MFRS 9 Financial Instruments are satisfied. The Group and the Company have not designated any financial liability as at fair value through profit or loss.

Financial liabilities at amortised cost

Subsequent to initial recognition, other financial liabilities are measured at amortised cost using effective interest method. Gains and losses are recognised in profit or loss when the financial liabilities are derecognised and through the amortisation process.

(b) Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Financial guarantee contracts are recognised initially as a liability at fair value, net of transaction costs that are directly attributable to the issuance of the guarantee. Subsequent to initial recognition, the liability is measured at the higher of the amount of the loss allowance determined in accordance with Section 5.5 of MFRS 9 and the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of MFRS 15.

9.App A

9.4.2.1(c) 9.B2.5

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.4 Financial instruments (continued)

(c) Regular way purchase or sale of financial assets

A regular way purchase or sale is a purchase or sale of a financial asset under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

A regular way purchase or sale of financial assets shall be recognised and derecognised, as applicable, using trade date accounting (i.e. the date the Group and the Company commit themselves to purchase or sell an asset).

Trade date accounting refers to:

- the recognition of an asset to be received and the liability to pay for it on the trade date; and
- (ii) derecognition of an asset that is sold, recognition of any gain or loss on disposal and the recognition of a receivable from the buyer for payment on the trade date.

Generally, interest does not start to accrue on the asset and corresponding liability until the settlement date when title passes.

(d) Derecognition

A financial asset or a part of it is derecognised when, and only when:

- the contractual rights to receive cash flows from the financial asset expire; or
- (ii) the Group and the Company have transferred their rights to receive cash flows from the asset or have assumed an obligation to pay the received cash flows in full without material delay to a third party; and either (a) the Group and the Company have transferred substantially all the risks and rewards of the asset, or (b) the Group and the Company have neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

The Group and the Company evaluate if, and to what extent, they have retained the risks and rewards of ownership. When they have neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group and the Company continue to recognise the transferred asset to the extent of their continuing involvement. In that case, the Group and the Company also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group and the Company have retained.

Commentary:

0

According to MFRS 9.B3.1.3, opting for either trade date accounting or settlement date accounting is a policy choice. An entity shall apply the same method consistently for all purchases and sales of financial assets that are classified in the same way. Refer the accounting policy for settlement date accounting in MFRS 9.B3.1.6.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.4 Financial instruments (continued)

(d) Derecognition (continued)

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group and the Company could be required to repay.

On derecognition of a financial asset, the difference between the carrying amount (measured at the date of derecognition) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss.

A financial liability or a part of it is derecognised when, and only when, the obligation specified in the contract is discharged, cancelled or expired. On derecognition of a financial liability, the difference between the carrying amount and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

(e) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is presented in the statements of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity shall not offset the transferred asset and the associated liability.

(f) Derivatives

The Group and the Company use interest swap contracts to hedge the exposure of floating interest rate. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to the profit or loss.

(g) Hedge accounting

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedge when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedge when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedge of a net investment in a foreign operation

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.4 Financial instruments (continued)

(g) Hedge accounting (continued)

At the inception of a hedge relationship, the Group and the Company formally designate and document the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group and the Company will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group and the Company actually hedge and the quantity of the hedging instrument that the Group and the Company actually use to hedge that quantity of hedged item.

Fair value hedge

The change in the fair value of a hedging instrument is recognised in the profit or loss as other expense (or other comprehensive income, if the hedging instrument hedges an equity instruments for which the Group and the Company have elected to present changes in fair value in other comprehensive income). The change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item and is also recognised in the profit or loss as other expense. If the hedged item is an equity instrument for which the Group and the Company have elected to present changes in fair value in other comprehensive income, those amount remain in other comprehensive income.

For fair value hedges relating to items carried at amortised cost, any adjustment to carrying value is amortised through profit or loss over the remaining term of the hedge using the effective interest rate method. The effective interest rate amortisation may begin as soon as an adjustment exists and no later than when the hedged item ceases to be adjusted for changes in its fair value attributable to the risk being hedged. The amortisation is based on a recalculated effective interest rate at the date of amortisation begins.

If the hedged item is derecognised, the unamortised fair value is recognised immediately in profit or loss.

When an unrecognised firm commitment is designated as a hedged item, the subsequent cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognised as an asset or liability with a corresponding gain or loss recognised in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.5 Property, plant and equipment

(a) Recognition and measurement

Property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(b).

Cost of assets, other than bearer plants, includes expenditures that are directly attributable to the acquisition of the asset and any other costs that are directly attributable to bringing the asset to working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. The cost of self-constructed assets also includes cost of materials, direct labour, and any other direct attributable costs but excludes internal profits. For qualifying assets, borrowing costs are capitalised in accordance with the accounting policy on borrowing costs in Note 3.24.

Cost of bearer plants consists of plantation development costs incurred from the commencement of planting of oil palm seedlings up to the maturity of the crop cultivated. Capitalisation of plantation development and other operating costs ceases upon the commencement of commercial harvesting of the agricultural produce.

Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

(b) Subsequent costs

The cost of replacing a part of an item of property, plant and equipment, other than bearer plants, is included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the part will flow to the Group or the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the profit or loss as incurred.

When bearer plants reached the end of its useful life and is replanted, the carrying amount of the old bearer plants are derecognised.

3.5 Property, plant and equipment (continued)

(c) Depreciation

Freehold land has an unlimited useful life and therefore is not depreciated. Assets under construction included in property, plant and equipment are not depreciated as these assets are not yet available for use.

All other property, plant and equipment are depreciated on straight-line basis by allocating their depreciable amounts over their remaining useful lives.

	Useful lives (years)
Buildings	50 years
Manufacturing plant	•
- Bare plant	30 years
- Significant components	5-8 years
Machinery and equipment	5-10 years
Motor vehicles	5 years
Furniture, fixtures and fittings	3-5 years
Bearer plants (oil palm trees)	25 years
Spare parts, stand-by equipment and servicing equipment	XX years

The residual values, useful lives and depreciation methods are reviewed at the end of each reporting period and adjusted as appropriate.

(d) Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is recognised in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
 - 3.5 Property, plant and equipment (continued)

Commentary:

In accordance with MFRS 116, an entity has a policy choice for the measurement of property, plant and equipment after initial recognition. An entity may choose either the cost model or the revaluation model for entire classes of property, plant and equipment.

For revaluation surplus that is included in equity, it is the Company's policy choice to either:

- transfer the revaluation reserve in full directly to retained earnings when the asset is derecognised; or
- transfer the revaluation reserve to retained earnings as the asset is being used, where the
 amount of revaluation reserve transferred would be the difference between depreciation based
 on the revalued carrying amount of the asset and depreciation based on the asset's original cost.

Illustrative accounting policy where the entity accounts for certain class of property, plant and equipment at revaluation model

Property, plant and equipment (other than land and buildings) are measured at cost less accumulated depreciation and any accumulated impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(b).

Freehold land and buildings are measured at fair value, based on valuations by external independent valuers, less accumulated depreciation on buildings and any accumulated impairment losses recognised after the date of revaluation. Valuations are performed with sufficient regularity to ensure that the fair value of the freehold land and buildings does not differ materially from the carrying amount. Any accumulated depreciation as at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.

A revaluation surplus is recognised in other comprehensive income and credited to the revaluation reserve. However, the increase shall be recognised in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss. If an asset's carrying amount is decreased as a result of a revaluation, the decrease shall be recognised in profit or loss. However, the decrease shall be recognised in other comprehensive income to the extent of any credit balance existing in the revaluation reserve in respect of that asset.

The revaluation reserve is transferred to retained earnings as the assets are used. The amount of revaluation reserve transferred is the difference between depreciation based on the revalued carrying amount of the asset and depreciation based on the asset's original cost.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.6 Leases

(a) Definition of lease

At inception of a contract, the Group and the Company assess whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group and the Company assess whether:

- the contract involves the use of an identified asset;
- the Group and the Company have the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Group and the Company have the right to direct the use of the asset.

(b) Lessee accounting

At the lease commencement date, the Group and the Company recognise a right-of-use asset and a lease liability with respect to all lease agreements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets.

The Group and the Company present right-of-use assets that do not meet the definition of investment property in Note 5 and lease liabilities in Note 23. [or The Group and the Company present right-of-use assets and lease liabilities as separate lines in the statements of financial position.]

Right-of-use asset

The right-of-use asset is initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently measured at cost less accumulated depreciation and any accumulated impairment losses, and adjust for any remeasurement of the lease liabilities 2 The right-of-use asset is depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of- use asset or the end of the lease term. If the Group and the Company expect to exercise a purchase option , the right-of-use asset is depreciated over the useful life of the underlying asset . The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(b).

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.6 Leases (continued)

(b) Lessee accounting (continued)

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Group and the Company use their incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- fixed lease payments (including in-substance fixed payments), less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the lessee under residual value guarantees;
- the exercise price of a purchase option, if the lessee is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability and by reducing the carrying amount to reflect the lease payments made.

The Group and the Company remeasure the lease liability (and make a corresponding adjustment to the related right-of-use asset) whenever:

- the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- a lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.

Variable lease payments that do not depend on an index or a rate are not included in the measurement of the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in the line "other expenses" in the statements of comprehensive income.

The Group and the Company have elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.6 Leases (continued)

(b) Lessee accounting (continued)

Short-term leases and leases of low value assets

The Group and the Company have elected not to recognise right-of-use assets and lease liabilities for short-term leases and leases of low value assets. The Group and the Company recognise the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

(c) Lessor accounting

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. All other leases that do not meet this criterion are classified as operating leases.

When the Group and the Company are intermediate lessors, they account for the head lease and the sublease as two separate contracts. The sublease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease. If a head lease is a short-term lease to which the Group applies the exemption described in Note 3.6(b), then it classifies the sub-lease as an operating lease.

If an entity in the Group is a lessor in a finance lease, it derecognises the underlying asset and recognises a lease receivable at an amount equal to the net investment in the lease. Finance income is recognised in profit or loss based on a pattern reflecting a constant periodic rate of return on the lessor's net investment in the finance lease.

If an entity in the Group is a lessor in an operating lease, the underlying asset is not derecognised but is presented in the statements of financial position according to the nature of the asset. Lease income from operating leases is recognised in profit or loss on a straight-line basis over the lease term, unless another systematic basis is more representative of the time pattern in which use benefit derived from the leased asset is diminished.

When a contract includes lease and non-lease components, the Group and the Company apply MFRS 15 to allocate the consideration under the contract to each component.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.6 Leases (continued)

Commentary:

According to MFRS 16.52, a lessee shall disclose information about its leases for which it is a lessee in a single note or separate section in its financial statements. However, a lessee need not duplicate information that is already presented elsewhere in the financial statements, provided that the information is incorporated by cross-reference in the single note or separate section about leases.

2 After the commencement date, a lessee shall measure the right-of-use asset applying a cost model, unless it applies either fair value model or the revaluation model.

If a lessee applies the fair value model in MFRS 140 *Investment Property* to its investment property, the lessee shall also apply that fair value model to right-of-use assets that meet the definition of investment property in MFRS 140.

If right-of-use assets relate to a class of property, plant and equipment to which the lessee applies the revaluation model in MFRS 116, a lessee may elect to apply that revaluation model to all of the right-of-use assets that relate to that class of property, plant and equipment.

3.7 Investment properties

Investment properties are properties held to earn rental income or for capital appreciation or both.

Investment properties are initially measured at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at fair value. Gains and losses arising from changes in the fair values of investment properties are recognised in profit or loss for the period in which they arise.

Cost includes purchase price and any directly attributable costs incurred to bring the property to its present location and condition intended for use as an investment property. The cost of a self-constructed investment property includes the cost of material, direct labour and any other direct attributable costs. For qualifying assets, borrowing costs are capitalised in accordance with the accounting policy on borrowing costs in Note 3.24.

An investment property is derecognised on its disposal or when it is permanently withdrawn from use and no future economic benefits are expected from its disposal. Any gains and losses arising from derecognition of the asset is recognised in the profit or loss.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property carried at fair value to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. For a transfer from owner-occupied property to investment property, any difference arising on the date of change in use between the carrying amount of the item immediately prior to the transfer and its fair value is recognised directly in equity as a revaluation of property, plant and equipment.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.7 Investment properties (continued)

Commentary:

In accordance with MFRS 140, an entity has a policy choice to account for investment properties either in accordance with the fair value model or the cost model. The model selected is applied to all investment properties (subject to exception cases when the entity is unable to determine fair value reliably on certain property – See Paragraph 53 and 54 of MFRS 140).

When a lessee uses the fair value model to measure an investment property that is held as a right-of-use asset, it shall measure the right-of-use asset, and not the underlying property, at fair value.

If the entity accounts for investment property using cost model, then it discloses the depreciation method and the useful lives or the depreciation rates used, as well as the fair value of such investment property.

Illustrative accounting policy where the entity accounts the entire investment properties at cost model

The Group uses the cost model to measure its investment properties after initial recognition. Accordingly, investment properties are stated at cost less accumulated depreciation and any accumulated impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(b).

3.8 Goodwill and other intangible assets

(a) Goodwill

Goodwill arising from business combinations is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. After initial recognition, goodwill is measured at cost less any accumulated impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(b).

In respect of equity-accounted associates and joint venture, goodwill is included in the carrying amount of the investment and is not tested for impairment individually. Instead, the entire carrying amount of the investment is tested for impairment as a single asset when there is objective evidence of impairment.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.8 Goodwill and other intangible assets (continued)

(b) Research and development costs

Research costs are recognised in profit or loss as incurred.

An intangible asset arising from development is recognised when the following criteria are met:

- it is technically feasible to complete the intangible asset so that it will be available for use or sale;
- management intends to complete the intangible asset and use or sell it;
- there is an ability to use or sell the asset;
- it can be demonstrated how the intangible asset will generate probable future economic benefits;
- adequate resources to complete the development and to use or sell the intangible asset are available; and
- the expenditures attributable to the intangible asset during its development can be reliably measured.

Other development costs that do not meet these criteria are recognised in profit or loss as incurred. Development costs previously recognised as an expense are not recognised as an intangible asset in a subsequent period.

Capitalised development costs are measured at cost less accumulated amortisation and accumulated impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(b).

(c) Licenses

Licenses acquired in a business combination are recognised at fair value at the acquisition date. The licenses have been acquired with the option to renew at little or no cost to the Group. As a result, those licenses are assessed as having an indefinite useful life. The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(b).

(d) Computer software

Computer software that are acquired by the Group and the Company, which have finite useful lives, are measured at cost less any accumulated amortisation and any accumulated impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(b).

(e) Concession rights

Service concession arrangements are recognised using the intangible assets model as the Company receives a right to charge users of the public service. The policy for the recognition and measurement of service concession arrangements are disclosed in Note 3.11.

(f) Amortisation

The amortisation methods used and the estimated useful lives are as follows:

	Method	Useful lives
Development costs	Units of production	(years) 5 years
Computer software	Straight-line	4 years

The residual values, useful lives and amortisation methods are reviewed at the end of each reporting period.

3.9 Biological assets

The biological assets of the Group include produce growing on bearer plants, which are the fresh fruit bunches of the oil palm trees, are measured at fair value less costs to sell and changes in fair value less costs to sell are recognised as gain and loss in profit or loss.

3.10 Inventories

Inventories are measured at the lower of cost and net realisable value.

Costs incurred in bringing the inventories to their present location and condition are accounted for as follows:

- raw materials: purchase costs on a first-in first-out basis.
- finished goods and work-in-progress: costs of direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. These costs are assigned on a weighted average cost basis.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.10 Inventories (continued)

Property under development

Cost includes:

- freehold and leasehold rights for land
- amounts paid to contractors for construction
- borrowing costs, planning and design costs, costs for site preparation, professional fees for legal services, property transfer taxes, construction overheads and other related costs

The cost of inventory recognised in profit or loss is determined with reference to the specific costs incurred on the property sold and an allocation of any non-specific costs based on the relative sale value of the property sold.

Produce stocks

The costs of produce stocks comprise agricultural produce transferred from biological assets is its fair value less costs to sell at the point of harvest. The fair value less costs to sell is treated as deemed cost for the purpose of subsequent processing of the agricultural produce into final agricultural commodities.

3.11 Service concession arrangements

The Company entered into various public-to-private service concession arrangements to construct, operate and maintain infrastructures used to provide a public service for a specified period of time. Under these concession arrangements, the grantor controls significant residual interest in the infrastructure at the end of the concession period.

The Company accounts for the construction services under the service concession arrangements using the intangible asset model as the Company receives a right to charge users of the public service.

The Company measures the consideration indirectly by reference to the stand-alone selling price of the construction services by reference to the costs of providing such services plus a reasonable profit margin.

The Company amortises its concession intangible asset using straight-line method over its expected useful lives of twenty-five years in a way that reflects the pattern in which the asset's economic benefits are consumed by the Company, starting from the date when the right to operate begins. Based on these principles, the intangible asset is amortised in line with the actual usage of the specific public facility, up to the maximum of the duration of the concession.

Any asset carried under concession arrangements is derecognised upon disposal or when no future economic benefits are expected from its future use or disposal.

102.23

141.13

IC Int 12.5

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.11 Service concession arrangements (continued)

Commentary:

The service concession arrangements are accounted for based on the nature of the consideration as follows:

- The intangible asset model is used to the extent that the Group receives a right (a license) to charge users of the public service;
- The financial asset model is used when the Group has an unconditional right to receive cash or another financial asset from or at the direction of the grantor for the construction services; or
- When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for each component.

Illustrative accounting policy where the entity accounts for its service concession arrangements under the financial asset model

The Company accounts for its service concession arrangements under the financial asset model as the Company has an unconditional right to receive cash or another financial asset from or at the direction of the grantor for the construction services. The consideration received and receivable is allocated by reference to the relative stand alone selling price of the various services delivered, when the amounts are separately identified. The Company estimates the relative stand alone selling price of the services by reference to the costs of providing each service plus a reasonable profit margin.

In the financial asset model, the amount due from the grantor meets the definition of a receivable which is measured at the amount of consideration to which the Company expects to be entitled. It is subsequently measured at amortised cost. The amount initially recognised plus the cumulative interest on that amount is calculated using the effective interest method.

Any asset carried under concession arrangements is derecognised when the contractual rights to the financial asset expire.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.12 Contract assets/(liabilities)

Contract asset is the right to consideration in exchange for goods or services transferred to the customers when that right is conditioned on something other than the passage of time (for example, the Company's future performance). The policy for the recognition and measurement of impairment losses is in accordance with Note 3.16(a).

Contract liability is the obligation to transfer goods or services to customers for which the Group and the Company have received the consideration or have billed the customers.

3.13 Non-current assets or disposal groups held for sale

Non-current assets or disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. The criteria for held for sale classification is regarded as met only when:

- the asset or disposal group is available for immediate sale in its present condition;
- the management is committed to a plan to sell the asset and the asset or disposal group is actively marketed for sale at a price that is reasonable in relation to its current fair value: and
- the sale is expected to be completed within one year from the date of classification and actions required to complete the plan indicates that it is unlikely that significant changes to the plan will be made or that the sale will be withdrawn.

Immediately before classification as held for sale, the assets, or components of a disposal group, are remeasured in accordance with the Group's accounting policies. Thereafter, generally the assets or disposal groups are measured at the lower of carrying amount and fair value less costs to sell.

Any impairment loss on the disposal group is first allocated to goodwill, and then to remaining assets and liabilities on pro-rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets and investment property that is measured at fair value, which continue to be measured in accordance with the Group's accounting policies. Impairment losses on initial classification as held for sale and subsequent gains or losses on remeasurement are recognised in profit or loss. A gain for any subsequent increase in fair value less costs to sell of an asset is recognised but not in excess of the cumulative impairment loss that has been recognised.

Intangible assets and property, plant and equipment once classified as held for sale are not amortised or depreciated. In addition, equity accounting of equity-accounted associates and joint venture ceases once classified as held for sale.

Assets and liabilities classified as held for sale are presented separately as current items in the statements of financial position.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)
 - 3.13 Non-current assets or disposal groups held for sale (continued)

Commentary:

- 1 The r
 - The measurement provisions of MFRS 5 Non-current Assets Held for Sale and Discontinued Operations do not apply to the following non-current assets whether individually or as part of a disposal group:
 - (a) Deferred tax assets (MFRS 112 Income Taxes)
 - (b) Assets arising from employee benefits (MFRS 119 Employee Benefits)
 - (c) Financial assets within the scope of MFRS 9 Financial Instruments
 - (d) Non-current assets that are accounted for in accordance with the fair value model in MFRS 140 *Investment Property*
 - (e) Non-current assets that are measured at fair value less costs to sell in accordance with MFRS 141 Agriculture
 - (f) Contractual rights under insurance contracts as defined in MFRS 4 Insurance Contracts

On remeasurement of a disposal group, an entity must remeasure those non-current assets listed above, current assets and all liabilities in accordance with applicable MFRSs.

3.14 Discontinued operation

A disposal group qualifies as discontinued operation if it is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- represents a separate major line of business or geographical area of operations;
- is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or
- is a subsidiary acquired exclusively with a view to resale.

Classification as a discontinued operation occurs upon disposal or when the operation meets the criteria to be classified as held for sale. When an operation is classified as a discontinued operation, the comparative statements of profit or loss and other comprehensive income is re-presented as if the operation has been discontinued from the start of the comparative period.

3.15 Cash and cash equivalents

For the purpose of the statements of cash flows, cash and cash equivalents comprise cash on hand, bank balances and deposits and other short-term, highly liquid investments with a maturity of three months or less, that are readily convertible to known amount of cash and which are subject to an insignificant risk of changes in value. Cash and cash equivalents are presented net of bank overdrafts.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.16 Impairment of assets

(a) Impairment of financial assets and contract assets

Financial assets measured at amortised cost, financial assets measured at fair value through other comprehensive income ("FVOCI"), lease receivables, contract assets, a loan commitment and financial guarantee contracts will be subject to the impairment requirement in MFRS 9 which is related to the accounting for expected credit losses on the financial assets. Expected credit losses are the weighted average of credit losses with the respective risks of a default occurring as the weights.

The Group and the Company measure loss allowance at an amount equal to lifetime expected credit losses, except for the following, which are measured as 12-month expected credit losses:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

For trade receivables, contract assets and lease receivables, the Group and the Company apply the simplified approach permitted by MFRS 9 to measure the loss allowance at an amount equal to lifetime expected credit losses.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Group and the Company consider reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's and the Company's historical experience and informed credit assessment and including forward-looking information.

The Group and the Company assume that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Group and the Company consider a financial asset to be in default when:

- the borrower is unable to pay its credit obligations to the Group and the Company in full, without taking into account any credit enhancements held by the Group and the Company; or
- the contractual payment of the financial asset is more than 90 days past due unless the Group and the Company have reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

The Group and the Company consider a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Group and the Company consider this to be BBB. The Group and the Company use the ratings from the [Agency X] to determine whether the debt instrument has significantly increased in credit risk and to estimate expected credit losses.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.16 Impairment of assets (continued)

(a) Impairment of financial assets and contract assets (continued)

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument.

12-month expected credit losses are the portion of lifetime expected credit losses that represent the expected credit losses that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

The maximum period considered when estimating expected credit losses is the maximum contractual period over which the Group and the Company are exposed to credit risk.

Expected credit losses are a probability-weighted estimate of credit losses (i.e. the present value of all cash shortfalls) over the expected life of the financial instrument. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

Expected credit losses are discounted at the effective interest rate of the financial assets.

At each reporting date, the Group and the Company assess whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired include observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default of past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- the disappearance of an active market for that financial asset because of financial difficulties; or
- the purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

The amount of impairment losses (or reversal) shall be recognised in profit or loss, as an impairment gain or loss. For financial assets measured at FVOCI, the loss allowance shall be recognised in other comprehensive income and shall not reduce the carrying amount of the financial asset in the statements of financial position.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.16 Impairment of assets (continued)

(a) Impairment of financial assets and contract assets (continued)

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Group and the Company determine that the debtor does not have assets or source of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's and the Company's procedure for recovery of amounts due.

(b) Impairment of non-financial assets

The carrying amounts of non-financial assets (except for inventories, contract assets, deferred tax assets, assets arising from employee benefits, investment properties measured at fair value, biological assets and non-current assets or disposal groups classified as held for sale) are reviewed at the end of each reporting period to determine whether there is any indication of impairment. If any such indication exists, the Group and the Company make an estimate of the asset's recoverable amount. For goodwill and intangible assets that have indefinite useful life and are not yet available for use, the recoverable amount is estimated at each reporting date.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of non-financial assets or cash-generating units ("CGUs"). Subject to an operating segment ceiling test, for the purpose of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment testing is performed reflects the lowest level at which goodwill is monitored for internal reporting purposes. The goodwill acquired in a business combination, for the purpose of impairment testing, is allocated to a CGU or a group of CGUs that are expected to benefit from the synergies of business combination.

The recoverable amount of an asset or a CGU is the higher of its fair value less costs of disposal and its value-in-use. In assessing value-in-use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. In determining the fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

Where the carrying amount of an asset exceeds its recoverable amount, the carrying amount of asset is reduced to its recoverable amount. Impairment losses recognised in respect of a CGU or groups of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to those units or groups of units and then, to reduce the carrying amount of the other assets in the unit or groups of units on a pro-rata basis.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.16 Impairment of assets (continued)

(b) Impairment of non-financial assets (continued)

Impairment losses are recognised in profit or loss, except for assets that were previously revalued with the revaluation surplus recognised in other comprehensive income. In the latter case, the impairment is recognised in other comprehensive income up to the amount of any previous revaluation.

Impairment losses in respect of goodwill are not reversed. For other assets, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. An impairment loss is reversed only if there has been a change in the estimates used to determine the assets recoverable amount since the last impairment loss was recognised. Reversal of impairment loss is restricted by the asset's carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in profit or loss unless the asset is measured at revalued amount, in which case the reversal is treated as a revaluation increase.

3.17 Share capital

(a) Ordinary shares

Ordinary shares are equity instruments. An equity instrument is a contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Ordinary shares are recorded at the proceeds received, net of directly attributable incremental transaction costs. Dividends on ordinary shares are recognised in equity in the period in which they are declared.

(b) Preference shares

Preference shares are classified as equity if it is non-redeemable, or is redeemable but only at the Company's option, and any dividend payments are discretionary. Dividends thereon are recognised as distributions within equity.

Preference shares are classified as financial liability if it is redeemable on a specific date or at the option of the equity holders, or if dividend payments are not discretionary. Dividends thereon are recognised as interest expense in profit or loss as accrued.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.17 Share capital (continued)

(c) Treasury shares

When share capital recognised as equity is repurchased, the amount of consideration paid is recognised directly in equity. Repurchased shares that have not been cancelled including any attributable transaction costs are classified as treasury shares and presented as a deduction from total equity.

When treasury shares are sold or reissued subsequently, the difference between the sales consideration and the carrying amount is presented as a movement in equity.

3.18 Compound financial instruments

Compound financial instruments issued by the Company comprise convertible notes that can be converted to share capital at the option of the holder, and the number of shares to be issued does not vary with changes in their fair value.

The liability component of a compound financial instrument is recognised initially at the fair value of a similar liability that does not have an equity conversion option. The equity component is recognised initially as the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any transaction costs that are directly attributable are allocated to the liability and equity components in proportion to the allocated proceeds.

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortised cost using the effective interest method. The equity component of a compound financial instrument is not remeasured subsequent to initial recognition except on conversion or expiry.

3.19 Employee benefits

(a) Short-term employee benefits

Short-term employee benefit obligations in respect of wages, salaries, social security contributions, annual bonuses, paid annual leave, sick leave and non-monetary benefits are recognised as an expense in the financial year where the employees have rendered their services to the Group and the Company.

(b) Defined contribution plans

As required by law, the Group and the Company contribute to the Employees Provident Fund ("EPF"), the national defined contribution plan. Such contributions are recognised as an expense in the profit or loss in the period in which the employees render their services.

119.11(b)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.19 Employee benefits (continued)

(c) Defined benefit plans

The Group operates defined benefit pension plans (funded) and provides a postemployment healthcare benefit (unfunded) plan to employees as provided in the employment agreements between the companies in the Group and their employees.

The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related defined benefit obligation. In countries where there is no deep market in such bonds, the market rates on government bonds are used.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding amounts included in net interest on the net defined benefit liability) and the effect of the asset ceiling (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in other comprehensive income. Remeasurements are not reclassified to profit or loss in subsequent periods.

The net interest is calculated by applying the discount to the net balance of the defined benefit obligation and fair value of plan assets.

The Group recognises the following costs in profit or loss:

- Service costs comprising current service costs, past service costs, gains and losses on curtailments and non-routine settlements
- Net interest expense or income

(d) Other long-term employee benefits

The Group's and the Company's other long-term employee benefits include long term paid absences, long term disability benefits and other long service benefits.

Liability recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Group and the Company in respect of services provided by employees up to the reporting date. The net total of the following amounts should be recognised in profit or loss, except to the extent that another MFRS requires or permits their inclusion in the cost of an asset:

- service cost;
- net interest on the net defined benefit liability or asset; and
- remeasurements of the net defined benefit liability or asset.

Commentary:

In the case of where the Group and the Company provide termination benefits, the illustrative disclosure is as follows:

(e) Termination benefits

119.165

2 10

2.46

2.7

2.13

Termination benefits are expensed at the earlier of when the Group and the Company can no longer withdraw the offer of those benefits and when the Group and the Company recognise costs for restructuring. If benefits are not expected to be settled wholly within 12 months of the end of the reporting period, then they are discounted.

3.20 Share-based payments

(a) Equity-settled share-based payment

The cost of equity-settled share-based payment is determined by the fair value at the date when the grant is made using an appropriate valuation model. Details regarding the determination of the fair value of equity-settled share-based payments are set out in Note 22(d).

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the share option reserve.

Equity-settled share-based payments with parties other than employees are measured at the fair value of the goods and services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted at the date the Company obtains the goods or the counterparty renders the service.

Commentary:

In cases where the Company provides cash-settled share-based payment, the illustrative disclosure is as follows:

2.30

For cash-settled share-based payment, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in the fair value recognised in profit or loss for the financial year.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.21 Provisions

Provisions are recognised when the Group and the Company have a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be estimated reliably.

If the effect of the time value of money is material, provisions that are determined based on the expected future cash flows to settle the obligation are discounted using a current pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. When discounting is used, the increase in the provisions due to passage of time is recognised as finance costs.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provision is reversed.

(a) Warranties

Provision related to assurance-type warranty cost for expected warranty claim is recognised when the product is sold or service is provided to the customer. Initial recognition is based on historical experience of the level of repairs and returns within the warranty period.

(b) Site restoration costs

In accordance with the Group's published environmental policy and applicable legal requirements, a provision for site restoration in respect of contaminated land, and the related expense, is recognised when the land is contaminated.

(c) Legal claims

For lawsuit provisions, a probability-weighted expected outcome is applied in the measurement, taking into account past court judgements made in similar cases and advice of legal experts.

Commentary:

Other illustrative accounting policy for provisions:

Illustrative accounting policy for decommissioning liability

The Group records a provision for decommissioning costs of a manufacturing facility for the production of retardant materials. Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows and are recognised as part of the cost of the particular asset. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.21 Provisions (continued)

Commentary (continued):

Other illustrative accounting policy for provisions (continued):

Illustrative accounting policy for onerous contracts

A provision for onerous contracts is recognised when the expected benefits to be derived by the Group from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the lower of the present value of the expected cost of terminating the contract and the present value of the expected net cost of continuing with the contract. Before a provision is established, the Group recognises any impairment loss on the assets associated with that contract.

Illustrative accounting policy for restructuring

A provision for restructuring is recognised when the Group has approved a detailed formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating losses are not provided for.

Illustrative accounting policy for contingent liabilities acquired in a business combination

A contingent liability acquired in a business combination is initially measured at fair value at the acquisition date. Subsequently, it is measured at the higher of the amount that would be recognised in accordance with MFRS 137 and the amount initially recognised less, if appropriate, cumulative amount of income recognised in accordance with the principles of MFRS 15.

3.22 Revenue and other income 1

The Group and the Company recognise revenue that depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the Group and the Company expect to be entitled in exchange for those goods or services.

Revenue recognition of the Group and the Company are applied for each contract with a customer or a combination of contracts with the same customer (or related parties of the customer). For practical expedient, the Group and the Company applied revenue recognition to a portfolio of contracts (or performance obligations) with similar characteristics if the Group and the Company reasonably expect that the effects on the financial statements would not differ materially from recognising revenue on the individual contracts (or performance obligations) within that portfolio.

15.2

15.7

15.48-49

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.22 Revenue and other income (continued)

The Group and the Company measure revenue at its transaction price, being the amount of consideration to which the Group and the Company expect to be entitled in exchange for transferring promised good or service to a customer, excluding amounts collected on behalf of third parties, adjusted for the effects of any variable consideration, constraining estimates of variable consideration, significant financing components, non-cash consideration and consideration payable to customer. If the transaction price includes variable consideration, the Group and the Company use the expected value method by estimating the sum of probability-weighted amounts in a range or possible consideration amounts, or the most likely outcome method, depending on which method the Group and the Company expect to better predict the amount of consideration to which it is entitled.

For contract with separate performance obligations, the transaction price is allocated to the separate performance obligations on the relative stand-alone selling price basis. If the stand-alone selling price is not directly observable, the Group and the Company estimate it by using the expected cost plus margin approach [or adjusted market assessment approach or residual approach].

Revenue from contracts with customers is recognised by reference to each distinct performance obligation in the contract with customer, i.e. when or as a performance obligation in the contract with customer is satisfied. A performance obligation is satisfied when or as the customer obtains control of the good or service underlying the particular performance obligation, which the performance obligation may be satisfied at a point in time or over time.

A contract modification is a change in the scope or price (or both) of a contract that is approved by the parties to the contract. A modification exists when the change either creates new or changes existing enforceable rights and obligations of the parties to the contract. The Group and the Company have assessed the type of modification and accounted for as either creates a separate new contract, terminates the existing contract and creation of a new contract; or forms a part of the existing contracts.

Financing components 2

The Group and the Company have applied the practical expedient for not to adjust the promised amount of consideration for the effects of a significant financing components if the Group and the Company expect that the period between the transfer of the promised goods or services to the customer and payment by the customer will be one year or less.

Reference

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.22 Revenue and other income (continued)

(a) Sale of goods - manufacturing

The Group manufactures and sells a range of plastic mould products to local customers. Revenue from sale of manufactured goods are recognised at a point in time when control of the products has been transferred, being when the customer accepts the delivery of the goods [Revenue from sale of goods is recognised at a point in time when control of goods is transferred to the customer, generally on the delivery of goods].

Sales are made with a credit term of 30 days, which is consistent with market practice, therefore, no element of financing is deemed present. A receivable is recognised when the customer accepts the delivery of the goods as the consideration is unconditional other than the passage of time before the payment is due.

The manufactured goods are often sold with volume discounts based on aggregate sales over a 12-month period. Revenue is recognised based on the price specified in the contract, net of the estimated volume discounts. Accumulated experience with the customer's purchasing pattern is used to estimate and provide for the discounts, using the expected value method. [The Group uses the expected value method because it is the method that the Group expects to better predict the estimated volume discounts to which it will be provided to the customers.] The estimated volume discounts recognised is constrained to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

The Group's customary business practice is to allow a customer to return any unused product within 30 days and receive a full refund. The Group uses its experience in estimating returns for this product and customer class. [The Group uses the expected value method because it is the method that the Group expects to better predict the amount of consideration to which the products will be refunded.] With that, upon transfer the control of the product, the Group does not recognise revenue for products that it is highly probable to be returned.

A contract liability is recognised for expected volume discounts payable to customers and for products expected to be returned from customers in relation to sales made until the end of the reporting period.

A right to recover goods from customer on settling the refund liability is recognised as an asset and included as part of inventories for the goods expected to be returned.

Where consideration is collected from customer in advance for sale of manufactured good, a contract liability is recognised for the customer deposits. Contract liability would be recognised as revenue upon sale of manufactured goods to the customer.

The Group's obligation to provide a refund for faulty products under the standard warranty terms is recognised as a provision in Note 26.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.22 Revenue and other income (continued) 1

(b) Property development

The Group and the Company develop and sell residential and commercial properties. Contracts with customers may include multiple distinct promises to customers and therefore accounted for as separate performance obligations. In the contract with customer contains more than one performance obligation, when the stand-alone selling price are not directly observable, they are estimated based on expected cost plus margin approach.

Revenue from residential and commercial properties are recognised as and when the control of the asset is transferred to the customer. Based on the terms of the contract and the laws that apply to the contract, control of the asset is transferred over time as the Group's and the Company's performance do not create an asset with an alternative use to the Group and the Company and the Group and the Company have an enforceable right to payment for performance completed to date. Revenue is recognised over the period of the contract by reference to the progress towards complete satisfaction of that performance obligation. The progress towards complete satisfaction of a performance obligation is determined by the proportion of property development costs incurred for work performed to date bear to the estimated total property development costs (an input method).

Revenue from commercial properties are recognised as and when the control of the asset is transferred to the customer. Based on the terms of the contract and the laws that apply to the contract, control of the asset is transferred at a point in time as the Group's and the Company's performance do not create an asset with an alternative use to the Group and the Company but the Group and the Company do not have an enforceable right to payment for performance completed to date. Revenue is recognised at a point in time when the properties have been completed and delivered to the customers.

Revenue from other promises such as club house/club membership are recognised over time over the membership period.

The consideration is due based on the scheduled payments in the contract, therefore, no element of financing is deemed present. When a particular milestone is reached in excess of the scheduled payments, a contract asset will be recognised for the excess of revenue recognised to date under the input method over the progress billings to-date and include deposits or advances received from customers. When the progress billings to-date and include deposits or advances received from customers exceeds revenue recognised to date then the Group and the Company recognise a contract liability for the difference.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.22 Revenue and other income (continued) 1

(b) Property development (continued)

Consistent with market practice, the Group and the Company collect deposit from customers for sale of properties. A contract liability is recognised for the customer deposits as the Group and the Company have obligations to transfer the goods or services to the customer in respect of deposits received. Customer deposits would be recognised as revenue upon transfer of goods or services to the customer.

[Based on the Group's and the Company's customary business practice, the customers' legal fees are borne by the Group and the Company. Revenue is recognised based on the transaction price agreed in the contracts, net of the customers' legal fees. The Group and the Company use its experience in estimating the legal fees to be incurred. The Group and the Company use the expected value method because it is the method that the Group and the Company expect to better predict the amount of consideration to which they will be entitled. The amount of revenue recognised does not include any customers' legal fees which is constrained].

For residential properties, as part of the statutory requirements, the Group's and the Company's obligations to repair and made good of any defect, shrinkage or other faults in the building or in the common property which have become apparent within a period of 24 months after the customer takes vacant possession of the building are recognised as a provision in Note 26.

(c) Construction contracts

The Group and the Company construct commercial and industrial properties under long-term contracts with customers. Construction service contracts comprise multiple deliverables that require significant integration service and therefore accounted as a single performance obligation.

Under the terms of the contracts, control of the commercial and industrial properties is transferred over time as the Group and the Company create or enhance an asset that the customer controls as the asset is created or enhanced. Revenue is recognised over the period of the contract by reference to the progress towards complete satisfaction of that performance obligation. The progress towards complete satisfaction of a performance obligation is determined by the proportion of construction costs incurred for work performed to date bear to the estimated total construction costs (an input method).

Billings are made with a credit term of 30 days, which is consistent with market practice, therefore, no element of financing is deemed present. The Group and the Company become entitled to invoice customers for construction of commercial and industrial properties based on achieving a series of performance-related milestones.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.22 Revenue and other income (continued) 1

(c) Construction contracts (continued)

The Group and the Company recognised a contract asset for any excess of revenue recognised to date over the billings-to-date. Any amount previously recognised as a contract asset is reclassified to trade receivables at the point when invoice is issued or timing for billing is due to passage of time. If the milestone billing exceeds the revenue recognised to date and any deposit or advances received from customers then the Group and the Company recognise a contract liability for the difference.

Defect liability period is usually XX months from the date of Certificate of Practical Completion as provided in the contracts with customers.

(d) Sale of agricultural commodities

The Group sells a range of agricultural commodities such as crude palm oil and palm kernel. Revenue from sale of agricultural commodities is recognised net of discount and taxes collected on behalf at a point in time when control of the agricultural commodities has been transferred to the customer. The control transfers upon delivery of the agricultural commodities to a location specified by the customer and acceptance of the agricultural commodities by the customer.

Sales are made with a credit term of 30 days and no element of financing is present. A receivable is recognised when the customer accepts the delivery of the goods as the consideration is unconditional other than the passage of time before the payment is due.

(e) Service concession

Revenue related to construction service under service concession arrangement is recognised over time, consistent with the Company's accounting policy on construction contracts as disclosed in (c) above. Operation or service revenue is recognised in the period in which the services are provided by the Company. If the service concession arrangement contains more than one performance obligation, then the consideration received is allocated with reference to the relative stand-alone selling prices of the services delivered.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.22 Revenue and other income (continued) 1

(f) Interest income

Interest income is recognised using the effective interest method.

(g) Dividend income

Dividend income is recognised when the right to receive payment is established.

(h) Rental income

Rental income from investment property is recognised on a straight-line basis over the term of the lease. Lease incentive granted is recognised as an integral part of the total rental income, over the term of the lease.

(i) Rendering of services

Revenue from a contract to provide services is recognised over time as the services are rendered because the customer receives and uses the benefits simultaneously. This is determined based on the time elapsed (output method).

Commentary:

0

An entity shall disclose information about its performance obligations in contracts with customers, including a description of all of the following:

- (a) when the entity typically satisfies its performance obligations (e.g. upon shipment, upon delivery, as services are rendered or upon completion of service), including when performance obligations are satisfied in a bill-and-hold arrangement;
- (b) the significant payment terms (e.g. when payment is typically due, whether the contract has a significant financing component, whether the consideration amount is variable and whether the estimate of variable consideration is typically constrained in accordance with MFRS 15 paragraphs 56–58);
- (c) the nature of the goods or services that the entity has promised to transfer, highlighting any performance obligations to arrange for another party to transfer goods or services (i.e. if the entity is acting as an agent);
- (d) obligations for returns, refunds and other similar obligations; and
- (e) types of warranties and related obligations.

15.129

15.119

If an entity elects to use the practical expedient in MFRS 15.63 (about the existence of a significant financing component), the entity shall disclose that fact.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.22 Revenue and other income (continued)

Commentary (continued):

- Control of an asset refers to the ability to direct the use of, and obtain substantially all of the remaining benefits from, the asset. Control includes the ability to prevent other entities from directing the use of, and obtaining the benefits from, an asset. The benefits of an asset are the potential cash flows (inflows or savings in outflows) that can be obtained directly or indirectly in many ways, such as by:
 - (a) using the asset to produce goods or provide services (including public services);
 - (b) using the asset to enhance the value of other assets;
 - (c) using the asset to settle liabilities or reduce expenses;
 - (d) selling or exchanging the asset;
 - (e) pledging the asset to secure a loan; and
 - (f) holding the asset.

To determine the point in time at which a customer obtains control of a promised asset and the entity satisfies a performance obligation, entity shall consider indicators of the transfer of control, which include, but are not limited to, the following:

- (a) The entity has a present right to payment for the asset
- (b) The customer has legal title to the asset
- (c) The entity has transferred physical possession of the asset
- (d) The customer has the significant risks and rewards of ownership of the asset
- (e) The customer has accepted the asset

MIA issued FRSIC Consensus 23, 24 and 25 to address the timing of revenue recognition for residential properties in Malaysia which states that entities which enter into SPAs with purchasers in the prescribed form required by the Housing Development Regulation in Malaysia satisfy the criteria of paragraph 35(c) of MFRS 15 and accordingly revenue from the sale of residential properties shall be recognised over time.

However, for sale of commercial properties, assessment shall be on contract-by-contract basis to determine if the contract meets the 2 conditions for revenue to be recognised over time:

- (a) Performance does not create an asset with an alternative use to the entity; and
- (b) The entity has an enforceable right to payment for performance completed to date.

3.23 Government grants

Government grants are recognised when there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

Where the grant relates to an asset, it is recognised as deferred income in the statements of financial position and transferred to profit or loss over the expected useful life of the related asset. Where the grant relates to an expense item, it is recognised in profit or loss, under the heading of "other income", on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.23 Government grants (continued)

The benefit derived from a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

3.24 Borrowing costs

Borrowing costs are interests and other costs that the Group and the Company incur in connection with borrowing of funds.

Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

The Group and the Company begin capitalising borrowing costs when the Group and the Company have incurred the expenditures for the asset, incurred related borrowing costs and undertaken activities that are necessary to prepare the asset for its intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

3.25 Income tax

Income tax expense in profit or loss comprises current and deferred tax. Current and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or other comprehensive income.

(a) Current tax

Current tax is the expected taxes payable or receivable on the taxable income or loss for the financial year, using the tax rates that have been enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous financial years.

123.12

112.6

112.58

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.25 Income tax (continued)

(b) Deferred tax

Deferred tax is recognised using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts in the statements of financial position. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences, unused tax losses and unused tax credits, to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised.

Deferred tax is not recognised if the temporary differences arise from the initial recognition of assets and liabilities in a transaction which is not a business combination and that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, branches, associates and interests in joint ventures, except where the Group is able to control the reversal timing of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be utilised.

Deferred tax is measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Where investment properties are carried at fair value in accordance with the accounting policy as disclosed in Note 3.7, the amount of deferred tax recognised is measured using the tax rates that would apply on sale of those assets at their carrying value at the reporting date unless the property is depreciable and is held within the business model whose objective is to consume substantially all the economic benefits embodied in the property over time, rather than through sale.

3.25 Income tax (continued)

(b) Deferred tax (continued)

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on the same taxable entity, or on different tax entities, but they intend to settle their income tax recoverable and income tax payable on a net basis or their tax assets and liabilities will be realised simultaneously.

(c) Sales and services tax

Revenue, expenses and assets are recognised net of the amount of sales and services tax except:

- where the sales and services tax incurred in a purchase of assets or services is not recoverable from the taxation authority, in which case the sales and services tax is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables that are stated with the amount of sales tax included.

The net amount of sales and services tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statements of financial position.

3.26 Earnings per share

The Group presents basic and diluted earnings per share ("EPS") data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held, for the effects of all dilutive potential ordinary shares.

112.71

112.61A

133.10

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.27 Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The Chief Executive Officer of the Group, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the chief operating decision-maker that makes strategic decisions.

3.28 Fair value measurements

Fair value of an asset or a liability, except for share-based payment and lease transactions, is determined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The measurement assumes that the transaction to sell the asset or transfer the liability takes place either in the principal market or in the absence of a principal market, in the most advantageous market.

For a non-financial asset, the fair value measurement takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

When measuring the fair value of an asset or a liability, the Group and the Company use observable market data as far as possible. Fair value is categorised into different levels in a fair value hierarchy based on the input used in the valuation technique as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group and the Company can access at the measurement date.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Unobservable inputs for the asset or liability.

The Group and the Company recognise transfers between levels of the fair value hierarchy as of the date of the event or change in circumstances that caused the transfers.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.29 Contingencies

A contingent liability or asset is a possible obligation or asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of uncertain future event(s) not wholly within the control of the Group and of the Company.

Contingent liability is also referred as a present obligation that arises from past events but is not recognised because:

- (a) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
- (b) the amount of the obligation cannot be measured with sufficient reliability.

Contingent liabilities and assets are not recognised in the statements of financial position.

3.30 Contract costs

(a) Recognition and measurement

Contract costs include costs of obtaining and fulfilling a contract.

The incremental costs of obtaining a contract are those costs that the Group and the Company incur to obtain a contract with a customer which they would not have incurred if the contract had not been obtained. The incremental costs of obtaining a contract with a customer are recognised as part of contract costs when the Group and the Company expect those costs are recoverable.

The costs incurred in fulfilling a contract with a customer which are not within the scope of another MFRSs, such as MFRS 102 *Inventories*, MFRS 116 *Property, Plant and Equipment* or MFRS 138 *Intangible Assets*, are recognised as part of contract costs when all of the following criteria are met:

- (a) the costs relate directly to a contract or to an anticipated contract that can be specifically identified;
- (b) the costs generate or enhance resources of the Group and of the Company that will be used in satisfying (or in continuing to satisfy) performance obligations in the future; and
- (c) the costs are expected to be recovered.

(b) Amortisation

The costs of obtaining and fulfilling a contract are amortised on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the asset relates. The amortisation shall be updated subsequently to reflect any significant change to the expected timing of transfer to the customer of the goods or services to which the asset relates in accordance with MFRS 108 Accounting Policies, Changes in Accounting Estimate and Errors.

137.27 137.31

137.10

15.99-100

15 101-104

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

3.30 Contract costs (continued)

(c) Impairment

Impairment loss is recognised in profit or loss to the extent that the carrying amount of the contract cost exceeds:

- (a) the remaining amount of consideration that the Group and the Company expect to receive in exchange for the goods or services to which the asset relates; less
- (b) the costs that relate directly to providing those goods or services and that have not been recognised as expenses.

Before an impairment loss is recognised for contract costs, the Group and the Company shall recognise any impairment loss for assets related to the contract that are recognised in accordance with another MFRSs, such as MFRS 102, MFRS 116 and MFRS 138. The Group and the Company shall include the resulting carrying amount of the contract costs in the carrying amount of the cash-generating unit to which it belongs for the purpose of applying MFRS 136 Impairment of Assets to that cash-generating unit.

An impairment loss is reversed when the impairment conditions no longer exist or have improved. Such reversal is recognised in profit or loss.

The Group and the Company have applied the practical expedient to recognise the incremental costs of obtaining contracts as an expense when incurred if the amortisation periods of the asset that the Group and the Company otherwise would have recognised are one year or less.

Commentary:

U

If an entity elects to use the practical expedient in MFRS 15.94 (about the incremental costs of obtaining a contract), the entity shall disclose that fact.

15.94 15.129

4. SIGNIFICANT ACCOUNTING JUDGEMENTS. ESTIMATES AND ASSUMPTIONS

The preparation of financial statements in conformity with MFRSs requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of the revenue and expenses during the reporting period. It also requires directors to exercise their judgement in the process of applying the Group's and the Company's accounting policies. Although these estimates and judgement are based on the directors' best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity that have the most significant effect on the Group's and the Company's financial statements, or areas where assumptions and estimates that have a significant risk of resulting in a material adjustment to the Group's and the Company's financial statements within the next financial year are disclosed as follows:

(a) Determining the functional currency

Certain subsidiaries of the Group operate in overseas jurisdictions but conduct sales, purchases and other transactions in multiple currencies. Judgement is applied in determining the functional currency wherever the indications are mixed. The Group uses, in a hierarchy, sale indicators as the primary basis, followed by purchase and operating expense indicators, and in the event that those indicators are not conclusive, the currency in which borrowings and other funds are raised for financing the operations.

(b) Classification between investment properties and property, plant and equipment

Certain property comprises a portion that is held to earn rental income or capital appreciation, or for both, whilst the remaining portion is held for use in the production or supply of goods and services or for administrative purposes. If the portion held for rental and/or capital appreciation could be sold separately (or leased out separately as a finance lease), the Group and the Company account for that portion as an investment property. If the portion held for rental and/or capital appreciation could not be sold or leased out separately, it is classified as an investment property only if an insignificant portion of the property is held for use in the production or supply of goods and services or for administrative purposes. Management uses judgement to determine whether any ancillary services are of such significance that a property does not qualify as an investment property.

(c) Classification of a service concession asset

The Company has entered into service concession arrangements with the Governments of Malaysia and China to construct and operate public infrastructures (a convention center in Malaysia and a power plant in China). In an arrangement where the consideration is in cash receivable or a guaranteed purchase of the output produced by the infrastructure, the amount receivable will be accounted for using the financial asset model. If the consideration is in the form of a license to charge the public for use of the infrastructure, the amount receivable will be accounted for using intangible asset model. Management uses judgement in deciding the appropriate classification.

As disclosed in Note 9, the management has accounted the two service concession arrangements using intangible assets model.

140.75(c)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

101.122 101.125

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(d) Control over an investee

As disclosed in Note 10, the Company holds a 40% equity interest in Ding Berhad, a company listed on the Bursa Malaysia Securities Berhad. The Company is the single largest shareholder of Ding Berhad. The other shareholders of Ding Berhad are thinly spread out among the investing public shareholders and none of the other shareholders have any agreement to make collective decisions. In applying judgement, the Company assesses and concludes that it has the power to direct the relevant activities of Ding Berhad. The Company is able to appoint, remove and set compensation of the key management personnel of Ding Berhad and actively dominates the decision-making process of Ding Berhad through its board representations. Accordingly, Ding berhad has been treated as a subsidiary of the Company.

(e) Joint control or significant influence over the investee

As disclosed in Note 11, the Company holds 20% equity interest in Slime Sdn Bhd. The Company has no representation on the Board of Directors of Slime Sdn Bhd but actively participates in the strategic policy decisions in the latter's Executive Committee meetings. For mutual benefits, the Company and Slime Sdn Bhd undertake significant sales and purchases of goods and services, and there are frequent interchanges of managerial personnel. On the basis of these fact patterns, the Company concludes that it exercises significant influence over Slime Sdn Bhd and thus treats the latter as an associate.

As disclosed in Note 12, the Company and another investor hold 25% and 50% respectively in the equity shares of Argus Sdn Bhd. The balance of the equity shares of Argus Sdn Bhd is evenly spread out among five other investors, each holding 5%. In the arrangement, decisions about the relevant activities of Argus Sdn Bhd require 75% of voting rights of shareholders. The Company determines that on the basis of the terms in the arrangement, the Company has joint control in Argus Sdn Bhd and thus treats it as a joint arrangement.

(f) Determination of lease term

The Group and the Company determine the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

As disclosed in Note XX, the Group and the Company have several lease contracts that include extension and termination options. The Group and the Company apply judgement in evaluating whether they are reasonably certain to exercise the option to renew or terminate the lease. The Group and the Company consider all relevant factors that create an economic incentive for them to exercise the renewal or termination. After the commencement date, the Group and the Company reassess the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(g) Transfer of control in property development

The Group's and the Company's property development activities comprises both "sell and build" model and "build and sell" model. For the purpose of revenue recognition, the directors use their judgement to determine whether control of residential and commercial properties under development is transferred to customers over time or at a point in time. The Group and the Company use the criterion of control from the perspective of a customer, judged in relation to the customer's ability to obtain economic benefits of the asset under development. The Group and the Company consider that if the asset under development has been assigned to a customer and the asset has no alternative use to the Group and the Company and the Group and the Company have enforceable rights to payments, control of the asset is transferred over time to the customer. Revenue is recognised over time based on the progress towards complete satisfaction of performance obligation. If a customer does not obtain control when the asset is under development, such as in build and sell units, revenue is recognised at a point in time when the construction of the asset is completed and handed over to the customer.

The carrying amounts of the assets arising from property development activities are disclosed in Note 8 and Note 15A.

(h) Disposal group classified as held for sale

As disclosed in Note 19(a), on 30 September 2022, the Board of Directors approved and announced a plan to sell a subsidiary, PT BLK Construction, which operates in Indonesia. The Board of Directors considered that the subsidiary met the criteria to be classified as disposal group classified as held for sale at that date for the following reasons:

- PT BLK Construction is available for immediate sale and can be sold to a potential buyer in its current condition:
- The Board of Directors had entered into preliminary negotiations with a potential buyer.
 Should negotiations with the party not lead to a sale, a number of other potential buyers have been identified; and
- The Board of Directors expects negotiations to be finalised and the sale to be completed by June 2023.

The disposal group held for sale is measured at the lower of carrying amount and fair value less costs to sell. The calculation for the fair value less costs to sell is subject to judgement due to a range of potential sales prices and assumptions around the method are involved.

The carrying amounts of the disposal group held for sale are disclosed in Note 19(a).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

101.122 101.125

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(i) Provision

The Group and the Company use a "best estimate" as the basis for measuring a provision. Management evaluates the estimates based on the Group's and the Company's historical experience and other inputs or assumptions, current developments and future events that are reasonably possible under the particular circumstances. In the case when a provision relates to large population of customers (such as a warranty provision), a probability-weighted estimate of the outflows required to settle the obligation is used. In the case of a single estimate (such as a provision for site restoration costs), a reference contractor's price or market price is used as the best estimate. If an obligation is to be settled over time, the expected outflows are discounted at a rate that takes into account the time value of money and the risk that the actual outcome might differ from the estimates made.

The carrying amounts of the Group's and the Company's provisions are disclosed in Note 26.

(j) Depreciation and useful lives of property, plant and equipment

As disclosed in Note 3.5, the Group and the Company review the residual values, useful lives and depreciation methods at the end of each reporting period. Estimates are applied in the selection of the depreciation method, the useful lives and the residual values. The actual consumption of the economic benefits of the property, plant and equipment may differ from the estimates applied and therefore, future depreciation charges could be revised.

The carrying amounts of the Group's and the Company's property, plant and equipment are disclosed in Note 5.

(k) Fair value of biological assets

The Group's consumable biological assets (produce growing on bearer plants) are measured at fair value less costs to sell. In measuring the fair value of fresh fruit bunches ("FFBs") growing on oil palms, management uses estimates of cash flows using inputs or assumptions about expected yield of FFBs and the observable market price of FFBs. The expected yield of FFBs is based on the Group's past experience and taking into consideration of the effects of adverse weather conditions that may affect productivity. As prices in agricultural business are volatile, the actual cash flows may not coincide with the estimates made and this may have a significant effect on the Group's financial position and results.

The carrying amount of the Group's biological assets and the key assumptions used to determine the fair value less costs to sell are disclosed in Note 7.

Reference

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

101.122 101.125

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(I) Impairment of goodwill

Goodwill is tested for impairment annually and at other times when such indicators exist. This requires an estimation of the value-in-use of the cash generating units to which goodwill is allocated. When value-in-use calculations are undertaken, the Group uses its judgement to decide the discount rates to be applied in the recoverable amount calculation and assumptions supporting the underlying cash flow projections, including forecast growth rates, inflation rates and gross profit margin. Cash flows that are projected based on those inputs or assumptions may have a significant effect on the Group's financial position and results if the actual cash flows are less than the expected.

The carrying amount of the Group's goodwill and key assumptions used to determine the recoverable amount for different cash-generating units, including sensitivity analysis, are disclosed in Note 9(e).

(m) Impairment of financial assets and contract assets

The impairment provisions for financial assets and contract assets are based on assumptions about risk of default and expected loss rate. The Group and the Company use judgement in making these assumptions and selecting inputs to the impairment calculation, based on the Group's and the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

The Group and the Company use a provision matrix to calculate expected credit losses for trade receivables and contract assets. The provision rates are depending on the number of days that a trade receivable is past due. The Group and the Company use the grouping according to the customer segments that have similar loss patterns. The criteria include geographical region, product type, customer type and rating, collateral or trade credit insurance.

The provision matrix is initially based on the Group's and the Company's historical observed default rates. The Group and the Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forward-looking estimates and expected credit losses is a significant estimate. The amount of expected credit losses is sensitive to changes in circumstances and forecast of economic conditions over the expected lives of the financial assets and contract assets. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

The information about the impairment losses on the Group's and the Company's financial assets and contract assets are disclosed in Note 39(b).

7.35F(c)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

101.122 101.125

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(n) Measurement of income taxes

The Group and the Company operate in various jurisdictions and are subject to income taxes in each jurisdiction. Significant judgement is required in determining the Group's and the Company's estimation for current and deferred taxes because the ultimate tax liability for the Group as a whole is uncertain. When the final outcome of the tax payable is determined with the tax authorities in each jurisdiction, the amounts might be different from the initial estimates of the tax payables. Such differences may impact the current and deferred taxes in the period when such determination is made. The Group and the Company will make adjustments for current or deferred taxes in respect of prior years in the current period on those differences arise.

The income tax expense of the Group and the Company are disclosed in Note 35.

(o) Deferred tax assets

Deferred tax assets are recognised for deductible temporary differences, unused tax losses and unabsorbed capital allowances based on the projected future profits of the subsidiaries to the extent that is probable that taxable profit will be available against which the temporary differences can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based on the future performance and taxable profits of the subsidiaries.

The carrying amount of the Group's recognised deferred tax assets is disclosed in Note 13.

(p) Defined benefit liabilities

The Group has defined benefit plans for their employees. The measurement of the present value of defined benefit obligations is based on a number of assumptions and factors that are determined on an actuarial basis. The assumptions used in the measurement of the defined benefit costs and the related liabilities or assets include projected employee salaries, employee turnover, inflation, interest cost and an appropriate discount rate using yields of high qualify corporate bonds in each jurisdiction. Any changes in these assumptions will have an impact on the carrying amount of the defined benefit obligations.

The carrying amount of the Group's employee benefits and the details of these actuarial assumptions and the sensitivity of the changes in key assumptions are disclosed in Note 24.

Reference

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

101.122 101.125

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(q) Share-based payments

The Company grants share options to directors who have met the specified conditions. The share options granted are measured at fair value at grant date using a binomial option pricing model. The key assumptions or inputs used in the binomial option pricing model include: (a) the current price, (b) the exercise price, (c) the risk-free rate, (d) the volatility of the share price (e) the dividend yield and (f) the time period to maturity, and with an adjustment for an early exercise of option based on the Group's and the Company's past experience with earlier exercises. As the volatility of the share price is estimated based on past price movements, the actual volatility may not coincide with the estimates made. Similarly, the actual early exercise of options granted may not coincide with the estimates made. These differences may affect the fair value measurement of the options granted but they are not adjusted retrospectively because the equity component of the options granted is not remeasured to fair value subsequent to their initial recognition.

The carrying amount of share option reserve and assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 22(d).

(r) Write-down of obsolete or slow moving inventories

The Group and the Company write down their obsolete or slow moving inventories based on the assessment of their estimated net selling price. Inventories are written down when events or changes in circumstances indicate that the carrying amounts may not be recoverable. The management specifically analyses sales trend and current economic trends when making a judgement to evaluate the adequacy of the write-down of obsolete or slow moving inventories. Where expectations differ from the original estimates, the differences will impact the carrying amount of inventories.

The carrying amounts of the Group's and the Company's inventories are disclosed in Note 8.

(s) Useful lives of other intangible assets

The Group and the Company estimate the useful lives to amortise other intangible assets based on the future performance of the assets acquired and management's judgement of the period over which economic benefits will be derived from the assets. The estimated useful lives of other intangible assets are reviewed periodically, taking into consideration factors such as changes in technology. The amount and timing of recorded expenses for any period would be affected by changes in the estimates.

The carrying amounts of the other intangible assets are disclosed in Note 9.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

101.122 101.125

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(t) Impairment of non-financial assets

The Group and the Company assess impairment of non-financial assets whenever the events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable i.e. the carrying amount of the asset is more than the recoverable amount.

Recoverable amount is measured at the higher of the fair value less costs of disposal for that asset and its value-in-use. The value-in-use is the net present value of the projected future cash flows derived from that asset discounted at an appropriate discount rate. The Group and the Company use their judgement to decide the discount rates applied in the recoverable amount calculation and assumptions supporting the underlying cash flow projections, including forecast growth rates, inflation rates and gross profit margin. Cash flows that are projected based on those inputs or assumptions may have a significant effect on the Group's and the Company's financial positions and results if the actual cash flows are less than the expected.

The carrying amounts of the non-financial assets are disclosed in Notes 5, 9, 10, 11 and 12.

(u) Classification of equity and liability component of convertible bond

The Company has recognised the compound instruments consisting of an equity and liability component. At the issue date, the value of the liability component is determined using a prevailing market interest rate. Judgement is made on the market interest rate used for classification of equity and liability component.

The carrying amounts of the equity and liability component of convertible bond are disclosed in Notes 22 and 23.

(v) Fair value of investment properties

The Group and the Company carry their investment properties at fair value, with changes in fair values being recognised in profit or loss. The Group and the Company engaged external valuer to determine the fair values. The valuation methods adopted by the valuer include sales comparison method, being comparison of current prices in an active market for similar properties in the same location and condition and where necessary, adjusting for location, accessibility, visibility, time, terrain, size, present market trends and other differences; income approach, being the projected net income and other benefits that are the subject property can generate over the life of the property capitalised at market derived yields to arrive at the present value of the property. Judgement is made in determining the appropriate valuation methods and the key assumptions used in the valuations. Any changes in these assumptions will have an impact on the carrying amounts of the investment properties.

The carrying amounts of the investment properties are disclosed in Note 6.

Reference

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

101.122 101.125

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(w) Fair value of derivatives and other financial instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group and the Company use their judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Any changes in these assumptions will have an impact on the carrying amounts of the derivatives and other financial instruments.

The carrying amounts of the derivatives and other financial instruments are disclosed in Note 39(a).

(x) Contingent liabilities

The Group exercises judgement in measuring and recognising provisions and the exposures to contingent liabilities related to pending litigation or other outstanding claims subject to negotiated settlement, arbitration or government regulation. Judgement is required to assess the likelihood that a pending claim will succeed, or a liability will arise, and to quantify the possible range of any financial settlement. The inherent uncertainty of such matters means that actual losses may materially differ from estimates.

(y) Business combination

When the Group purchased PT Halia Palm Oil through a transaction with another corporate entity, a judgement was made as to whether the transaction should be accounted for as a business combination or as a separate purchase of assets. In making this judgement, the Group assessed the assets, liabilities, operations and processes that were the subject of the transaction against the definition of a business in MFRS 3. The Group assessed that the acquisition of PT Halia Palm Oil qualifies as a business combination by applying the definition in MFRS 3.

In accounting for the PT Halia Palm Oil under MFRS 3, the fair values of the identifiable assets and liabilities acquired, including intangible assets, are recognised. The determination of the fair values of acquired assets and liabilities assumed is based on directors' judgement. Any changes in these assumptions will have an impact on the carrying amounts of the acquired assets and liabilities assumed.

The fair values of the acquired assets and liabilities assumed are disclosed in Note 10(a).

(z) Property development revenue

The Group and the Company recognised property development revenue in profit or loss by using the progress towards complete satisfaction of performance obligation. The progress towards complete satisfaction of performance obligation is determined by the proportion that property development costs incurred for work performed to date bear to the estimated total property development costs.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

101.122 101.125

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(z) Property development revenue (continued)

Significant judgement is required in determining the progress towards complete satisfaction of performance obligation, the extent of the property development costs incurred, the estimated total property development revenue and costs, as well as the recoverability of the development projects. In making the judgement, the Group and the Company evaluate based on past experience and by relying on the work of specialists.

The carrying amounts of property development costs, contract assets and contract liabilities are disclosed in Notes 8 and 16.

(aa) Construction revenue

The Group and the Company recognised construction revenue in profit or loss by using the progress towards complete satisfaction of performance obligation. The progress towards complete satisfaction of performance obligation is determined by the proportion that construction costs incurred for work performed to date bear to the estimated total construction costs.

Significant judgement is required in determining the progress towards complete satisfaction of performance obligation, the extent of the construction costs incurred, the estimated total construction revenue and costs, as well as the recoverability of the construction projects. In making the judgement, the Group and the Company evaluate based on past experience and by relying on the work of specialists.

The carrying amounts of contract assets and contract liabilities are disclosed in Note 16.

(bb) Construction revenue recognition in relation to Concession Agreement

In accordance with IC Interpretation 12 Service Concession Arrangements, revenue associated with construction works under the Concession Agreement shall be recognised and measured in accordance with MFRS 15. The consideration received or receivable from construction work rendered by the Group and the Company are measured in accordance with MFRS 15, i.e. based on the allocated transaction price.

In order to determine the construction revenue to be recognised, the directors have estimated and recognised a construction margin in the construction of the infrastructure asset. The estimated margin is based on relative comparison with general industry trend although actual margins may differ.

The construction revenue arising from concession agreement that recognised during the year is disclosed in Note 28.

(cc) Revenue recognition in relation to sale of manufactured goods 1

15.126(a)

The Group has recognised revenue amounting to RM10 million for sale of manufactured goods to a new customer for the financial year ended 31 December 2022. The customer has the right to return any unused product within 30 days and receive a full refund.

Reference

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

(cc) Revenue recognition in relation to sale of manufactured goods (continued)

Although the returns are outside the Group's influence, the Group has significant experience in estimating returns for this product and customer class. In addition, the uncertainty will be resolved within a short time frame (i.e. the 30-day return period). Thus, the Group has determined that it is highly probable that a significant reversal in the cumulative amount of revenue recognised will not occur as the uncertainty is resolved (i.e. over the return period). It is therefore appropriate to recognise revenue on this transaction during 2022 as control of the product is transferred to the customer.

The revenue recognised for manufactured goods during the year is disclosed in Note 28.

Commentary:

1 Significant judgement, and changes in the judgements, made in the applying MFRS 15

An entity shall disclose the judgements, and changes in the judgements, made in applying this Standard that significantly affect the determination of the amount and timing of revenue from contracts with customers. In particular, an entity shall explain the judgements, and changes in the judgements, used in determining both of the following:

- (a) the timing of satisfaction of performance obligations (see MFRS 15.124-125); and
- (b) the transaction price and the amounts allocated to performance obligations (see MFRS 15.126).

Disclosure requirements	Entity shall disclose:
Judgement to determine the timing of satisfaction of performance obligations	 For performance obligation satisfied over time: The methods used to recognise revenue; and An explanation of why the methods used provide a faithful depiction of the transfer of goods or services
	 For performance obligations satisfied at a point in time: Significant judgements made in evaluating when a customer obtains control of promised goods or services
Judgement to determine the transaction price	Information about methods, inputs and assumptions used for all of the following: • Estimating variable consideration (and its constraint); • Considering the effects of time value of money; • Measuring non-cash consideration; and • Measuring obligations for returns, refunds and other similar obligations
Judgement to determine the amounts allocated to performance obligations	 Information about methods, inputs and assumptions used for all of the following: Estimating stand-alone selling prices of promised goods or services; and Allocating discounts or variable considerations to a specific part of the contract (if applicable)
Judgement to determine the contract costs	Entity shall describe the judgement to determine the amount of the costs incurred to obtain or fulfil a contract with a customer

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

Commentary (continued):

1 Significant judgement, and changes in the judgements, made in the applying MFRS 15 (continued)

Illustrative of additional significant judgements made in applying MFRS 15:

Judgements in determining the timing of satisfaction of performance obligations

The Group provides rectification work for goods supplied to customers. There are goods delivered to one of the Group's major customers in the months of January to July 2022, and shortly thereafter defects were identified by the customer. Following negotiations, a schedule of works was agreed, which will involve expenditure by the Group until 2023. In the light of the problems identified, the directors were required to consider whether it was appropriate to recognise the revenue from these transactions of RMXX million in the current year, in line with the Group's policy of recognising revenue for the sale of goods when those goods are delivered to the customer, or whether it would be more appropriate to defer recognition until the rectification work was complete.

In making their judgement, the directors considered the detailed criteria for the recognition of revenue set out in MFRS 15 and, in particular, whether the Group had transferred control of the goods to the customer. Following the detailed quantification of the Group's liability in respect of rectification work, and the agreed limitation on the customer's ability to require further work or to require replacement of the goods, the directors are satisfied that control has been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate warranty provision for the rectification costs.

The revenue recognised during the year is disclosed in Note XX.

Judgements in allocating the transaction price for material right to customers

The Group operates a loyalty programme where retail customers accumulate points for purchases made which entitle them to discount on future purchases. Revenue from the award points is recognised when the points are redeemed or when they expire XX months after the initial sale. The points provide a material right to customers that they would not receive without entering into a contract. Therefore, the promise to provide points to the customer is a separate performance obligation.

The transaction price is allocated to the product and the points on a relative stand-alone selling price basis. The stand-alone selling price per point is estimated on the basis of the discount granted when the points are redeemed and on the basis of the likelihood of redemption, based on past experience. The stand-alone selling price of the product sold is estimated on the basis of the retail price.

The revenue recognised during the year for redemption of customer loyalty points is disclosed in Note XX.

Commentary (continued):

2 Significant judgement, estimates and assumptions in respect of revaluation of property, plant and equipment

Illustrative of additional significant judgements made when the Group and the Company have measured the land and buildings at revaluation model:

Valuation of property, plant and equipment

Freehold land, leasehold land and buildings are carried at revalued amount. Revaluation of these assets is based on valuation performed by independent professional property valuers. The independent professional property valuers may exercise judgement in determining discount rates, estimates of future cash flows, capitalisation rate, terminal year value, market freehold rental and other factors used in their valuation process. Judgement has been applied in estimating prices for less readily observable external parameters. Other factors such as model assumptions, market dislocations and unexpected correlations may materially affect these estimates and the resulting valuation estimates.

The carrying amounts of the Group's and the Company's property, plant and equipment are disclosed in Note XX.

3 Significant judgement in respect of preparation of the financial statements as a going concern

Illustrative of additional significant judgements made when there are significant doubts about going concern of a reporting entity:

When there are significant doubts about going concern but mitigating actions judged sufficient to make going concern appropriate and the entity determines no material uncertainties

Close call

Funding requirements and ability to meet short term obligations

The Group applies judgement in determining the funding requirements and its ability to meet short term obligations. The Group considers the facts and circumstances and makes assumptions about the future, including the cash flows to be generated from the operations of the Group and the available financing facilities.

The details of funding requirements and ability to meet short term obligations are disclosed in Note 39(b)(ii).

101.122 101.125 4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONTINUED)

Commentary (continued):

3 Significant judgement in respect of preparation of the financial statements as a going concern (continued)

Illustrative of additional significant judgements made when there are significant doubts about going concern of a reporting entity (continued):

When there are significant doubts about going concern but mitigating actions judged sufficient to make going concern appropriate and material uncertainties about going concern remain after considering mitigating actions.

Material Uncertainty Related to Going Concern

Going concern

The Group applies judgement and assumptions in determining its ability to continue as a going concern of at least 12 months from the end of the financial year which is subject to material uncertainty. The Group considers the facts and circumstances and makes assumptions about the future, including its plan to realise its assets and discharge its liabilities in the normal course of business. The directors are confident that the plan would be implemented successfully without any material modifications and within the anticipated time frame.

The details of material uncertainty related to going concern are disclosed in Note 2.X.

5. PROPERTY, PLANT AND EQUIPMENT (CONTINUED)

(a) Assets held for sale

Property, plant and equipment transferred to the disposal group classified as held for sale amounting to RM10,400,000 relate to assets that are used by PT BLK Construction (part of the construction business segment). See Note 19(a) for further details on the disposal group classified as held for sale.

(b) Land title restriction

116.74(a)

A freehold land with a carrying amount of RM1,000,000 (31.12.2021: RM1,000,000) has been alienated to the Company by a State Government in exchange for construction services provided by the Company. The Company has yet to obtain title to this land as it is being processed by the Land Office.

(c) Assets pledged as security

Freehold land and building with a carrying amount of RM3,000,000 (31.12.2021: RM2,500,000) has been pledged as security to secure term loans of the Group and of the

Company as disclosed in Note 23(a).

Leased assets are pledged as security for the related lease liabilities as disclosed in Note 23(b).

Motor vehicles with carrying amount of RMXXX (31.12.2021: RMXXX) have been pledged as security for hire purchase arrangement as disclosed in Note 23(x).

(d) Impairment loss

During the financial year, an impairment loss of RM1,000,000 was recognised in profit or loss under other expenses, representing the impairment of certain machinery and equipment in the manufacturing segment, as a result of technological obsolescence. The recoverable amount of RM28,800,000 as at 31 December 2022 was based on value-in-use and was determined at the level of cash generating unit. In determining the value-in-use for the cash generating unit, the cash flows were discounted at a rate of 8% on a pre-tax basis.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5. PROPERTY, PLANT AND EQUIPMENT (CONTINUED)

Commentary (continued):

1 Illustrative additional disclosure of property, plant and equipment (continued)

Illustrative additional disclosures if items of property, plant and equipment or right-ofuse assets are stated at revalued amount in accordance with MFRS 116.77. For disclosures required by MFRS 13 *Fair Value Measurement*, refer to Note 6 Investment Properties.

116.77(a) & (b) (a) Level 2 fair value

Level 2 fair values of buildings were revalued on XXX using the sales comparison approach based on the valuation performed by independent firms of professional valuers. Sales prices of comparable buildings in close proximity are adjusted for differences in key attributes such as property size. The most significant input into this valuation approach is price per square foot of comparable buildings.

(b) Had the revalued land and buildings and right-of-use assets been carried at historical cost less accumulated depreciation, the net carrying amount of the land and buildings and right-of-use assets that would have been included in the financial statements of the Group are as follows:

	Gro	Group		
	31.12.2022 RM'000	31.12.2021 RM'000		
Freehold land	XXX	XXX		
Leasehold land	XXX	XXX		
Buildings	XXX	XXX		
Right-of-use assets:				
- Leasehold land	XXX	XXX		
- Buildings	XXX	XXX		

If a lessee measures right-of-use assets at revalued amounts applying MFRS 116, the lessee shall disclose the information required by paragraph 77 of MFRS 116 for those right-of-use assets.

Illustrative disclosure when there are restrictions or covenants imposed by leases

Restrictions

The Group is restricted from assigning and subleasing the leased assets and some lease contracts require the Group to maintain certain financial ratios.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5. PROPERTY, PLANT AND EQUIPMENT (CONTINUED)

Commentary (continued):

1 Illustrative additional disclosure of property, plant and equipment (continued)

Illustrative disclosure when the lease contracts contain variable lease payment terms

Some of the property leases in which the Group and the Company are the lessees contain variable lease payment terms that are linked to sales generated from the leased stores. Variable lease payment terms are used to link rental payments to store cash flows and reduce fixed cost. Fixed and variable lease payments for the year ended 31 December 2022 were as follows:

	Fixed payments RM'000	Variable payments RM'000	Total payments RM'000	annual impact on rent of a 1% increase in sales RM'000
Leases with lease payments based on				
sales	XXX	XXX	XXX	XXX

The Group and the Company expect the relative proportions of fixed and variable lease payments to remain broadly consistent in future years.

Illustrative disclosure when the lease contracts contain residual value guarantees

The Group guarantees the residual value of certain leased assets at the end of the contract term. It monitors the use of these leased assets, and reassesses the estimated amount payable under the residual value guarantees at the reporting date to remeasure lease liabilities and right-of-use assets. As at 31 December 2022, the Group estimates that the expected amount payable under the residual value guarantees is RMXXX.

Illustrative disclosure for sales-and-leaseback transactions

In year 20XX, the Group sold one of its office buildings and leased the building back for 30 years. The Group has an option to repurchase the building for its market value at the end of the contract term. This sale-and-leaseback transaction enabled the Group to access more capital while continuing to use the office. The rent is adjusted every five years to reflect increase in local market rents for similar properties.

- 2 Included in this are motor vehicles under hire purchase arrangements.
- 3 Included in this are motor vehicles under leasing arrangements.

As at the reporting date, titles to the investment properties with carrying amount of RM35,500,000 (31.12.2021: RM18,500,000) have yet to be registered under the subsidiaries' name.

The Group's and the Company's investment properties comprise a number of commercial properties that are leased to third parties. Each lease contains an initial non-cancellable period of 10 years with option to renew for subsequent 5 years. Subsequent renewals are negotiated with the lessee.

An investment property of a subsidiary with a carrying fair value of RM10,000,000 (31.12.2021: RM9,000,000) has been pledged as security to secure term loans and revolving credit granted to the Group and the Company as disclosed in Note 23(a) and Note 23(g). Approval of the lender is required for any disposal of the investment property. The proceeds from disposal can only be remitted to the Group and the Company after full repayment of the term loan.

The following are recognised in profit or loss in respect of investment properties:

Fair value information (continued)

Level 2 fair value

13.93(d)

Level 2 fair values of buildings have been derived using the sales comparison approach. Sales prices of comparable buildings in close proximity are adjusted for differences in key attributes such as property size. The most significant input into this valuation approach is price per square foot of comparable buildings.

Level 3 fair value

13.93(e)

The following table shows a reconciliation of Level 3 fair values:

	Group	
	31.12.2022 RM'000	31.12.2021 RM'000

Fair value information (continued)

Level 3 fair value (continued)

The following table shows the valuation techniques used in the determination of fair values within Level 3, as well as the significant unobservable inputs used in the valuation models.

Description	Valuation technique	Significant unobservable inputs	Relationship of unobservable inputs to fair value
Land and buildings	Sales comparison approach	Price per square feet RM1,102 (31.12.2021: RM1,000)	The higher the price per square feet, the higher the fair value
Land and buildings	Income approach	Estimated average rental rate per square feet per month RM1.35-RM12.95 (31.12.2021: RM1.45-RM11.45)	•
		Estimated average outgoings per square feet per month RM4.50 (31.12.2021: RM4.00)	The lower the estimated outgoings per square feet per month, the higher the fair value

Valuation processes applied by the Group and the Company

The Group's and the Company's finance department includes a team that performs valuation analysis of land and buildings required for financial reporting purposes, including Level 3 fair values. This team reports directly to the chief financial officer.

The fair value of investment properties is determined by external independent property valuers, Messrs Surveyor & Co., a member of the Institute of Valuers in Malaysia, with appropriate recognised professional qualifications and recent experience in the location and category of property being valued. The valuation company provides the fair value of the Group's and the Company's investment property portfolio every six months. Changes in Level 3 fair values are analysed by the team every six months after obtaining the valuation report from the valuation company. There has been no change to the valuation technique during the financial year.

Highest and best use

In estimating the fair value of the properties, the highest and best use of the properties is their current use.

6. INVESTMENT PROPERTIES (CONTINUED)

Commentary:

- 1 For disclosure requirements on paragraph 91 to 99 under MFRS 13, refer commentary under Note 39(d).
- MFRS 140 permits investment properties to be carried at historical cost less accumulated depreciation and any accumulated impairment losses. If the Group accounted for investment properties at cost, information about the cost basis and depreciation rates (similar to the requirement under MFRS 116) would be required. MFRS 140.79(e) requires disclosure of fair value of the properties. For the purpose of this disclosure, the fair value is required to be determined in accordance with MFRS 13. Also, in addition to the disclosures under MFRS 140, MFRS 13.97 requires disclosure of:
 - the level at which fair value measurement is categorised i.e., Level 1, Level 2 or Level 3;
 - a description of valuation technique and inputs, for Level 2 or Level 3 fair value measurement;
 and
 - if the highest and best use differs from the current use of the asset, disclose that fact and the reason.
- If right-of-use assets meet the definition of investment property, a lessee shall apply the disclosure requirements in MFRS 140. In that case, pursuant to MFRS 16.56, a lessee is required to provide the following disclosures for those right-of-use assets.
 - interest expense on lease liabilities;
 - expense relating to short-term leases (exclude expense relating to leases with a lease term of one month or less);
 - expense relating to leases of low-value assets (exclude expense relating to short-term leases of low-value assets included above);
 - expense relating to variable lease payments not included in the measurement of lease liabilities;
 - total cash outflow for leases; and
 - gains or losses arising from sale and leaseback transactions.
- In determining the carrying amount of investment property under the fair value model, an entity does not double-count assets or liabilities that are recognised as separate assets or liabilities. Accordingly, the fair value of investment property is recognised at the amount determined in the valuation minus/(plus) amount allocated to other assets/(liabilities), if any, such as accrued or prepaid operating lease income recognised as a separate asset or liability.

When a valuation obtained for investment property carried at fair value is adjusted significantly for the purpose of the financial statements, the entity shall disclose a reconciliation between the valuation obtained and the adjusted valuation included in the financial statements, showing separately the aggregate amount of any recognised lease obligations that have been added back, and any other significant adjustments.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

9. INTANGIBLE ASSETS (CONTINUED)

(a) Amortisation

138.118(d)

The amortisation of development costs and computer software (partially) of the Group and the Company amounting to RM3,000,000 (2021: RM4,000,000) and RM1,500,000 (2021: RM1,500,000) respectively are included in cost of sales; computer software (remaining) is included in administrative expenses. The amortisation of the concession rights of the Group and the Company of RM4,000,000 (2021: Nil) is included in cost of sales.

(b) Concession rights

IC Int 129.6

During the financial year, the Company entered into two material service concession arrangements, one is with the State Government of Penang in Malaysia to construct and operate the convention center and the other is with the State Government of Shenzhen in China to build and operate a power plant to supply electricity to consumers in a designated area. The Company is granted a right to intangible assets or a license to charge public customers for the use of the public infrastructure and the concession rights have been granted for a period of twenty-five years.

The initial cost of concession rights has been measured at the amount of consideration to which the Company expects to be entitled in relation to the construction services rendered to the State Governments using an expected cost plus profit margin method.

During the financial year, the amount of revenue and cost of sales recognised in profit or loss are as follows:

IC Int 129.6A IC Int 129.7

(c) Development cost

Development costs principally comprise internally generated expenditure on major projects where it is reasonably anticipated that the costs will be recovered through future commercial activities.

(d) Computer software

During the financial year, an impairment loss of RM500,000 was recognised in profit or loss of the Group as other expenses, representing the impairment of the computer software in the manufacturing segment to its recoverable amounts due to technological obsolescence. The recoverable amount of RM5,100,000 as at 31 December 2022 was based on value-in-use and the cash flows were discounted at a rate of 8% on a pre-tax basis.

(e) Impairment of goodwill and licenses

Management reviews the business performance based on the type of products and services of the strategic business units which represent its reportable operating segments. For the purpose of impairment testing, goodwill acquired through business combinations is allocated to the following Group's cash generating units ("CGUs") which are also reportable operating segments, which represent the lowest level within the Group at which the goodwill is monitored for internal management purposes.

The carrying amounts of goodwill allocated to the CGUs are as follows:

	31.12.2022 RM'000	31.12.2021 RM'000
Construction - CGU 1	33,200	4,400
Manufacturing - CGU 2	16,500	16,500
Plantation - CGU 3	19,700	19,700
	69,400	40,600
Multiple units without significant goodwill	1,900	1,900
	71,300	42,500

The licenses to operate the oil palm plantation are allocated to the plantation segment. Goodwill and licenses are assessed at each reporting date regardless of any indication of impairment by comparing the carrying amount with the recoverable amount of each CGU.

The recoverable amount of CGUs has been determined based on value-in-use calculations using cash flows projection from financial budgets and forecasts approved by management covering a five-year period. The same method has also been used in the previous financial year.

(e) Impairment of goodwill and licenses (continued)

CGU₁

Based on the sensitivity analysis performed, management believes that there is no reasonably possible change in key assumptions that would cause the carrying values of the CGU to exceed its recoverable amounts. The estimated recoverable amount of the CGU 1 significantly exceeds the carrying amount of the CGU 1. As a result of the analysis, management did not identify an impairment for this CGU.

CGU₂

In current financial year, the estimated recoverable amount of the CGU 2 significantly exceeds the carrying amount of the CGU 2. As a result of the analysis, management did not identify an impairment for this CGU. Based on the sensitivity analysis performed, management believes that there is no reasonably possible change in key assumptions that would cause the carrying values of the CGU to exceed its recoverable amounts.

CGU₃

Based on the sensitivity analysis performed, management believes that there is no reasonably possible change in key assumptions that would cause the carrying value of the CGU to exceed its recoverable amount. The estimated recoverable amount of the CGU 3 significantly exceeds the carrying amount of the CGU 3. As a result of the analysis, management did not identify an impairment for this CGU.

Commentary:

136.135(e)

If there is a reasonably change in the key assumption(s) that would cause the aggregate of the units' (groups of units') carrying amounts to exceed the aggregate of their recoverable amounts, the entity shall make the following disclosures:

- (i) the amount by which the aggregate of the units' (groups of units') recoverable amounts exceeds the aggregate of their carrying amounts.
- (ii) the value(s) assigned to the key assumption(s).
- (iii) the amount by which the value(s) assigned to the key assumption(s) must change, after incorporating any consequential effects of the change on the other variables used to measure recoverable amount, in order for the aggregate of the units' (group of units') recoverable amounts to be equal to the aggregate of their carrying amounts.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

9. INTANGIBLE ASSETS (CONTINUED)

31.12.2022

(e) Impairment of goodwill and licenses (continued)

For each of the CGUs with significant amount of goodwill, the value-in-use calculation is most sensitive to the following key assumptions:

CGU 1

0111212022	555 .		000
Sales volume (% of annual growth rate)	3.8%	2.9%	4.1%
Sales price (% of annual incremental rate)	5.0%	4.0%	3.0%
Gross margin (% of revenue)	25%	20%	35%
Long-term growth rate	5%	6%	4%
Discount rate	9%	8%	7%
31.12.2021	CGU 1	CGU 2	CGU 3
31.12.2021 Sales volume (% of annual growth rate)	CGU 1 2.1%	CGU 2 3.8%	CGU 3 4.1%
Sales volume (% of annual growth rate)	2.1%	3.8%	4.1%
Sales volume (% of annual growth rate) Sales price (% of annual incremental rate)	2.1% 5.0%	3.8% 4.0%	4.1% 3.0%

[The cash flows projections and forecasts have been updated to reflect the decreased demand for products and services.] These key assumptions have been used for the analysis of each CGU within the operating segments. The values assigned to the key assumptions represent management's assessment of future trends in the respective industry and are based on both external sources and internal sources (historical data).

Sales volume is the forecasted annual growth rate over the five-year projection period. It is based on the average growth levels experienced over the past five years.

Sales price is the forecasted annual incremental rate over the five-year projection period. It is based on current industry trends and includes long-term inflation forecasts for each territory.

Gross margin is the forecasted margin as a percentage of revenue over the five-year projection period. These are increased over the projection period for anticipated efficiency improvements.

Long-term growth rate does not exceed the long-term average growth rates for the industries relevant to the CGU. Cash flows beyond the five-year projection period are extrapolated using the long-term growth rates.

Discount rate was estimated based on the industry weighted average cost of capital. The discount rate applied to the cash flow projections is pre-tax and reflects management's estimate of the risks specific to the CGU at the date of assessment.

10. INVESTMENT IN SUBSIDIARIES (CONTINUED)

(a) Acquisition of PT Halia Palm Oil

On 31 March 2022, the Company acquired 80% controlling interest in the equity shares of PT Halia Palm Oil. PT Halia Palm Oil operates in the agriculture industry, with oil palm cultivation and palm oil milling as its core businesses. Its businesses are conducted mainly in Indonesia. As a result of the acquisition, the Group has become a significant producer of crude palm oil and palm kernel in the oil palm business. By combining the plantation operations of PT Halia Palm Oil, the Group expects to extract synergies for the combined operations, which would lead to cost reductions and other economies of scale.

(i) Fair value of consideration transferred:

(a) Cash consideration	25,000
(b) 25 million ordinary shares of the Company	50,000
(c) Liability for contingent consideration	5,000

80,000

RM'000

The fair value of the 25,000,000 ordinary shares issued as part of the consideration paid for PT Halia Palm Oil was determined on the basis of the closing market price of the Company's ordinary shares of RM2 per share on the acquisition date.

As at the acquisition date, the fair value of the contingent consideration was estimated to be RM5,000,000. As part of the purchase agreement, there will be additional cash payments of RM5,350,000 to the former shareholders of PT Halia Palm Oil on 31 October 2023 if the acquiree achieves the guaranteed maintainable profits after tax of RM30,000,000 for the 12-month period ending 31 October 2023. If the actual profit is above or below the guaranteed level, the amount payable increase or decrease by the excess or shortfall in profit. The contingent amount payable is probably in the range of RM4,000,000 to RM6,000,000. The fair value is measured based on discounted cash flows method. The discount rate applied was 7%.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

10. INVESTMENT IN SUBSIDIARIES (CONTINUED)

(a) Acquisition of PT Halia Palm Oil (continued)

(ii) Fair value of the identifiable assets acquired and liabilities recognised:

	RM'000
Assets	
Property, plant and equipment (Note 5)	31,500
Investment properties (Note 6)	20,000
Inventories	14,600
Trade and other receivables	8,700
Cash and cash equivalents	5,000
Total assets	79,800
Liabilities	
Term loans	(4,000)
Trade and other payables	(4,600)
Total liabilities	(8,600)
Total identifiable net assets acquired	71,200
Goodwill arising on acquisition (Note 9)	28,800
Non-controlling interest at fair value	(20,000)
Fair value of consideration transferred	80,000

The fair value of the non-controlling interest was measured by valuing the acquiree's ordinary shares using a price-earnings ratio technique. The key model inputs used in the valuation were the estimated maintainable equity earnings of RM15,000,000, a reference industry quoted price-earnings ratio of 10 times with a 1/3 reduction for the illiquidity and other risks of unquoted shares.

The fair value of the trade and other receivables was an undiscounted amount after adjustment for probable uncollectibility. The gross contractual amount of the receivables was RM10,000,000 of which RM1,300,000 was not expected to be collected.

Provisional fair values were assigned to the property, plant and equipment, pending receipts of the final valuation of those assets. A professional consultant has been commissioned to undertake valuation of those assets. The initial accounting for this subsidiary is expected to be completed by the second quarter of the following financial year.

10. INVESTMENT IN SUBSIDIARIES (CONTINUED)

(a) Acquisition of PT Halia Palm Oil (continued)

(ii) Fair value of the identifiable assets acquired and liabilities recognised (continued):

Goodwill

Goodwill comprises the value of expected synergies arising from the acquisition and non-identifiable intangible assets which are not separately recognised.

Non-identifiable intangible assets comprise a customer list and substantial non-contractual customer relationships with its overseas buyers. Due to the contractual terms imposed on acquisition, the customer list is not separable. Whilst, substantial non-contractual customer relationships with its overseas buyers was not identifiable at the acquisition date because it was neither separable from the business as a whole nor could it be controlled through legal or other contractual rights. Therefore, these assets did not meet the recognition criteria as an intangible asset under MFRS 138. Hence, these intangible assets were subsumed in the amount determined for goodwill. None of the goodwill recognised is expected to be deductible for income tax purposes.

Included in the administrative expenses of the Group and the Company for the financial year ended 31 December 2022 was an amount of RM1,000,000 that represented a severance payment made to the former chief executive officer ("CEO") of PT Halia Palm Oil, following the request of the Company to terminate the employment of the CEO. This amount was excluded from the business combination accounting.

Acquisition-related costs

Acquisition-related costs of the business combination amounted to RM1,000,000, of which RM900,000 was recognised in profit or loss as administrative expense and RM100,000 relating to share issue was charged directly to equity.

(iii) Effects of acquisition on cash flows:

	KIVI UUU
Fair value of consideration transferred	80,000
Less: Non-cash consideration	(55,000)
Consideration paid in cash	25,000
Less: Cash and cash equivalents of a subsidiary acquired	(5,000)
Net cash outflows on acquisition	20,000

Commentary:

12.22(c)

Any entity shall disclose the unrecognised share of losses of an associate, both for the reporting period and cumulatively, if the entity has stopped recognising its share of losses of the associate when applying the equity method. The illustrative disclosure is as follows:

The Group has not recognised its share of losses of XXX Ltd amounting to RMXXX (2021: RMXXX) because the Group's cumulative share of losses has exceeded its interest in that associate and the Group has no obligation in respect of these losses. The Group's cumulative accumulated losses not recognised were RMXXX (31.12.2021: RMXXX).

136.130(a)

2 An entity shall disclose the events and circumstances that led to the recognition or reversal of the impairment losses.

12.21(a)

An entity shall disclose the information as required by MFRS 12.21(a) for each associate that is material to the Group.

12.21(a)(iv)

4 Disclosure of the proportion of the voting rights is required if it is different from the ownership interest.

12.21(a)(ii)

For each associate that is material to the Group, an entity shall disclose the nature of the entity's relationship with the associate (e.g. describing the nature of activities of the associate and whether they are strategic to the entity's activities).

12.7(b) 12.9(d)-(e) The entity shall disclose significant judgements and assumptions made in determining the existence of significant influence over another entity even though it holds less than 20% of the voting rights of the other entity or non-existence of significant influence over another entity even though it holds 20% or more of the voting rights of the other entity.

13.91-99

For disclosure requirements on paragraph 91 to 99 under MFRS 13, refer commentary under Note 39(d).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

11. INVESTMENT IN ASSOCIATES (CONTINUED)

Commentary (continued):

12.B14

The summarised financial information presented shall be the amounts included in the MFRS financial statements of the associate (and not the entity's share of those amounts).

12.22(b)

Illustrative disclosure where an entity has the financial year end which is different from the Group

The financial year end of XXX Ltd is 31 October and change of reporting date is not permitted in Country A. For the purpose of applying equity method of accounting, the financial statements of XXX Ltd for the financial year ended 31 October 2022 have been used and appropriate adjustments have been made to account for significant transactions from XXX Ltd's financial year end to 31 December 2022.

Illustrative disclosure where an entity's associates are restricted to transfer funds to the entity in the form of cash dividends, or to repay loans or advances made by the entity

Significant restrictions

Country A imposed a restriction on its financial control where XXX Ltd is restricted from transferring funds to the Group in the form of cash dividends or repay loans or advances made by the Group.

	31.12.2022 RM'000	31.12.2021 RM'000
nused tax losses	5,000	-
nabsorbed capital allowance	5,000	5,000
	10,000	5,000

The availability of unused tax losses for offsetting against future taxable profits of the respective subsidiaries in Malaysia are subject to requirements under the Income Tax Act, 1967 and guidelines issued by the tax authority.

<u>Unrecognised temporary differences relating to investments in subsidiaries, associates and joint ventures</u>

At the reporting date, the Group has unrecognised taxable temporary differences associated with undistributed profits of certain of the Group's foreign subsidiaries, associates and joint ventures amounted to RMXXX (2021: RMXXX) which would result in estimated tax payable of RMXXX (2021: RMXXX) for which deferred tax liabilities have not been recognised as:

- (a) The Group has determined that undistributed earnings of its subsidiaries, associates or joint ventures will not be distributed in the foreseeable future;
- (b) The joint ventures of the Group cannot distribute its earnings until it obtains the consent of both venturers. At the reporting date, the Group does not foresee giving such consent; and
- (c) The Group has an agreement with its associates that the profits of the associates will not be distributed until it obtains the consent of the Group. The Group does not foresee giving such a consent at the reporting date.

(d) Finance lease receivables

Included in the Group's finance lease receivables are leases on certain items of equipment amounting to RM8,500,000 (31.12.2021: RM7,500,000) under finance lease expiring from one to five years. At the end of the lease term, the Group has given the lessee the option to purchase the equipment at 50% of the market value, a price deemed to be a bargain purchase option. There are no contingent rents in the lease.

Gross investment under finance leases together with the present value of minimum lease payments receivable are as follows:

investment securities	81,400	76,810	53,300	19,800

The Group and the Company hold non-controlling interests (between 2% and 9%) in equity securities designated at fair value through other comprehensive income. These investments were irrevocably designated at fair value through other comprehensive income as the Group and the Company consider these investments as strategic long-term investments and the volatility of market prices of these investments would not affect profit or loss. 2

Debt instruments at fair value through other comprehensive income include investments in quoted government and corporate bonds. Fair values of these debt instruments are determined by reference to published price quotations in an active market. The Group and the Company recognised the impairment losses on its debt instruments at fair value through other comprehensive income amounting to RMXXX in 2022.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16. CONTRACT ASSETS 1 /(LIABILITIES) (CONTINUED)

Commentary:

15.108 15.BC323 A right to consideration is unconditional if only the passage of time is required before payment of that consideration is due. However, in other cases, an entity satisfies a performance obligation but does not have an unconditional right to consideration, for example, because it first needs to satisfy another performance obligation in the contract, an entity should recognise a contract asset in accordance with MFRS 15. Making the distinction between a contract asset and a receivable is important because doing so provides users of financial statements with relevant information about the risks associated with the entity's rights in a contract. That is because although both would be subject to credit risk, a contract asset is also subject to other risks, for example, performance risk.

15.118

An entity shall provide an explanation of the significant changes in the contract asset and contract liability balances during the reporting period. The explanation shall include qualitative and quantitative information.

Revenue recognised during the year	XXX	xxx	xxx	XXX	
Progress billings issued during the year	XXX	XXX	xxx	XXX	
Exchange differences	XXX	XXX	XXX	XXX	
At 31 December	xxx	xxx	xxx	xxx	

15.118(b)

3 Cumulative catch-up adjustments to revenue that affect the corresponding contract asset or contract liability, including adjustments arising from a change in the measure of progress, a change in an estimate of the transaction price (including any changes in the assessment of whether an estimate of variable consideration is constrained) or a contract modification.

15.116(c) 15.BC347 An entity shall disclose the amount of revenue recognised in the period that relates to amounts allocated to performance obligations that were satisfied (or partially satisfied) in previous periods (for example, as a result of a change in transaction price or estimates related to the constraint on revenue recognised). Disclosing those amounts provides relevant information about the timing of revenue recognition that was not a result of performance in the current period and thus provides useful information about the current period operating results and on predicting future revenues.

- sell contracts	1,500	(1,500)	1,000	(500)
	4,200	(1,500)	5,000	(500)

Interest rate swap is used to achieve an appropriate mix of fixed and floating interest rate exposure within the Group's and the Company's policy. The notional principal amounts of the Group's and the Company's outstanding interest rate swap as at 31 December 2022 were RM230,000,000 (31.12.2021: RM160,000,000) and RM80,000,000 (31.12.2021: RM70,000,000) respectively.

Forward exchange contracts are used to manage the foreign currency exposures arising from the Group's and the Company's receivables and payables denominated in currencies other than the functional currencies of Group entities. Most of the forward exchange contracts have maturities of less than one year after the end of the reporting period. Where necessary, the forward contracts are rolled over at maturity.

Included in the deposits placed with licensed banks of the Group, RM1,000,000 (31.12.2021: RM500,000) is pledged for revolving credit granted to a subsidiary as disclosed in Note 23(g).

Included in cash and bank balances of the Group and the Company are amount of RM9,350,000 (31.12.2021: RM5,380,000) and RM3,290,000 (31.12.2021: RM1,340,000) respectively held pursuant to Section 7A of the Housing Development (Control and Licensing) Act, 1966 and therefore restricted from use in other operations.

Commentary:

FRSIC Consensus 22 107.7

107.8

7.14

107.48

MIA issued FRSIC Consensus 22 Classification of Fixed Deposits and Similar Instruments as Cash and Cash Equivalents to address the issue on the classification of fixed deposits as cash equivalents. As stated in MFRS 107.7, an investment is qualified as cash equivalents only when it has a short maturity of, say three month or less from the date of acquisition. "Short-term" is not defined in MFRS 107, but the standard indicates a three-month maturity cut-off. Therefore, it is pertinent and relevant to take into account of this three-month presumption when considering whether the fixed deposit is classified as cash equivalents or for investment purposes.

18. CASH AND SHORT-TERM DEPOSITS (CONTINUED)

Commentary (continued):

FRSIC Consensus 3

- In our view, as fixed deposits held on lien are not held for the purpose of meeting short-term cash commitments, it will be excluded from the cash and cash equivalents. However, the entity may adopt the policy of including fixed deposits held on lien in determining the composition of cash and cash equivalents provided there are adequate disclosure which includes the policy adopted by the entity, the balances that are not available for use by the entity, together with a commentary by the management on the nature of the restriction.
- IFRS Interpretation Committee ("IFRIC") published an Agenda Decision, namely *Demand Deposits* with Restrictions on Use arising from a Contract with a Third Party (IAS 7 Statement of Cash Flows) to provide further clarification on demand deposit as a component of cash and cash equivalents in its statement of cash flows and financial position when demand deposit is subject to contractual restrictions on use agreed with third party.

The IFRIC Committee concluded that restrictions on the use of a demand deposit arising from a contract with a third party do not result in the deposit no longer being cash, unless those restrictions change the nature of the deposit in a way that it would no longer meet the definition of cash in IAS 7. As stated in MFRS 107.6, cash comprises cash on hand and demand deposits.

(ii) During the financial year, the Group and the Company made the following cash payments to purchase property, plant and equipment.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

19. ASSETS/(LIABILITIES) OF A DISPOSAL GROUP CLASSIFIED AS HELD FOR SALE AND DISCONTINUED OPERATION 1

(a) Assets/(liabilities) of a disposal group classified as held for sale

On 30 September 2022, the Board of Directors approved and announced a plan to sell a subsidiary, PT BLK Construction, which operates in Indonesia. The assets and liabilities related to PT BLK Construction (part of the construction business segment) have been presented as held for sale. The completion date for the transaction is expected by June 2023.

Assets of a disposal group classified as held for sale

	Group
	31.12.2022
	RM'000
Property, plant and equipment (Note 5)	10,400
Inventories	8,000
Trade and other receivables	4,000
Other assets	3,000
	25,400
Liabilities of a disposal group classified as held for sale	
	Group
	31.12.2022
	RM'000
Trade and other payables	16,500

In accordance with MFRS 5, the assets and liabilities held for sale of the above disposal group had been written down to their fair value less costs to sell. This is a non-recurring fair value which has been measured using observable inputs, being the prices for recent sales of similar businesses, and is therefore within Level 2 of the fair value hierarchy. The fair value has been measured by calculating the ratio of transaction price to annual revenue for the similar businesses and applying the average to PT BLK Construction.

- (1) The entity shall include any required adjustment to the carrying amount of a non-current asset that ceases to be classified as held for sale in profit or loss from continuing operations in the period in which the criteria for classification as held for sale are no longer met.
- (2) Pursuant to MFRS 128.20, an entity shall apply MFRS 5 to an investment, or a portion of an investment, in an associate or a joint venture that meets the criteria to be classified as held for sale and cease equity accounting on that investment, or a portion of that investment which classified as held for sale. Any retained portion of an investment in an associate or a joint venture that has not been classified as held for sale shall be accounted for using the equity method until disposal of the portion that is classified as held for sale takes place.
- (3) Financial statements for the periods since classification as held for sale shall be amended from the date of its classification as held for sale accordingly if the disposal group or non-current asset that ceases to be classified as held for sale is a subsidiary, joint operation, joint venture, associate, or a portion of an interest in a joint venture or an associate. Accordingly, the investment, or the portion of an investment, in associate or joint venture shall be accounted retrospectively using the equity method for the period from the date of its classification as held for sale until it ceases to be classified as held for sale.

The holders of ordinary shares (except treasury shares) are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company. All ordinary shares rank equally with regard to the Company's residual assets.

During the financial year, the Company:

- (i) issued 25,000,000 new ordinary shares at a price of RM2 per ordinary share as partial discharge of the purchase consideration for the acquisition of the 80% equity interest in PT Halia Palm Oil pursuant to a share sale agreement dated 20 January 2022; and
- (ii) issued 75,000,000 new ordinary shares at a price of RM2 per ordinary share for working capital purposes.

The new ordinary shares issued during the financial year rank pari passu in all respects with the existing ordinary shares of the Company.

101.78(e)

21. TREASURY SHARES

101.79(a)(vi) 101.79(b) Treasury shares relate to ordinary shares of the Company that are repurchased and held by the Company. The Company's share buyback scheme was first approved by the Company's shareholders in the Annual General Meeting held on 30 May 2019 for the Company to repurchase 10% of its issued ordinary shares within a 5-year period. The directors of the Company believe that the repurchase plan are applied in the best interests of the Company and its shareholders. The mandate for share buybacks was renewed in each subsequent Annual General Meeting of shareholders. The share repurchases made to date were financed by internally generated funds and are being held as treasury shares in accordance with the requirement of Section 127 of the Companies Act 2016 in Malaysia.

For the financial year ended 31 December 2021, the Company repurchased 5,000,000 shares of its issued shares from the open market. The average price paid for the shares repurchased was RM2.00.

Reference

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

21. TREASURY SHARES (CONTINUED)

At 31 December 2022, the Company's treasury shares are held at a carrying amount of RM20,000,000 (31.12.2021: RM20,000,000).

There was no repurchase of the Company's issued ordinary shares, nor any resale, cancellation or distribution of treasury shares during the financial year. 1

(a) Equity component of convertible bonds

This represents the residual amount of convertible bonds after deducting the fair value of the liability component. This amount is presented net of transaction costs and deferred tax liability arising from convertible bonds. Further details on the convertible bonds are disclosed in Note 23(d).

Commentary:

1

When shares repurchased were cancelled, the costs of the shares to cancel the treasury shares shall be applied in the reduction of the retained earnings in accordance with the requirement of Section 127(13) of the Companies Act 2016 ("the Act").

Cancellation of shares shall not be deemed to be a reduction of share capital in accordance with the requirement of Section 127(15) of the Act.

Illustrative disclosure if there is subsequent cancellation of treasury shares

The shares repurchased were cancelled and the costs of the shares to cancel the treasury shares were applied in the reduction of the retained earnings in accordance with the requirement of Section 127(13) of the Companies Act 2016 ("the Act").

S127(13)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

22. OTHER RESERVES (CONTINUED)

101.79(b)

(b) Fair value reserve of financial assets at FVOCI

This reserve comprises the cumulative net change in the fair value of financial assets at fair value through other comprehensive income ("FVOCI") until the investments are derecognised or impaired.

The Group and the Company have elected to recognise changes in the fair value of certain investments in equity securities in other comprehensive income, as explained in Note 15. These changes are accumulated within the fair value reserve of financial assets at FVOCI. The Group and the Company transfer amounts from this reserve to retained earnings when the relevant equity securities are derecognised.

The Group and the Company also have certain debt investments measured at FVOCI, as explained in Note 15. For these investments, changes in fair value are accumulated within the fair value reserve of financial assets at FVOCI. The accumulated changes in fair value are transferred to profit or loss when the investment is derecognised or impaired.

101.79(b)

101.79(b)

5Sch(I)(5)

5Sch(I)(6) 2.45(a)

(c) Cash flow hedge reserve

This reserve comprises the effective portion of the cumulative net change in the fair value of hedging instruments entered into for cash flow hedges of forecast transactions.

(d) Share option reserve

The share option reserve comprises the cumulative value of director services received for the issue of share options. The reserve is recorded over the vesting period commencing from the grant date and is reduced by the expiry or exercise of the share options. When the option is exercised, the amount from the share option reserve is transferred to share capital. When the share options expire, the amount from the share option reserve is transferred to retained earnings.

Share options are granted to directors who have rendered services of three years and above. The options granted are vesting immediately and settlement is by issuance of fully paid ordinary shares. The exercise price in each grant is set 10% below the weighted average of the market prices of the Company's ordinary shares in the last five trading days before the grant date. The contractual term of each option granted is five years. There are no cash settlement alternatives. The options carry neither rights to dividends nor voting rights. Options may be exercised any time from the date of vesting to the date of expiry.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

22. OTHER RESERVES (CONTINUED)

(d) Share option reserve (continued)

Movement of share options during the financial year

The following table illustrates the number and weighted average exercise prices ("WAEP") of, and movement in, share options:

	Number	WAEP	Number	WAEP
	2022	2022	2021	2021
	'000		'000	
At 1 January	10,000	RM1.80		
Granted on 30 June 2021	10,000	- TAIVI 1.00	5,000	RM1.75
Granted on 31 October 2021	-	-	5,000	RM1.85
Exercised during the year	XXX	XXX	XXX	XXX
Forfeited during the year	XXX	XXX	XXX	XXX
Expired during the year	XXX	XXX	XXX	XXX
At 31 December	10,000	RM1.80	10,000	RM1.80
Exercisable at 31 December	1,000	RM1.80	1,000	RM1.75

The options outstanding at 31 December 2022 have exercise prices range from RM1.75 to RM1.85 (31.12.2021: RM1.75 to RM1.85) and the weighted average remaining contractual life for the share options outstanding as at 31 December 2022 was 3.8 years (31.12.2021: 4.5 years).

The fair values of the share options granted were determined using a binomial option pricing model, and the inputs were:

	31.12.2021
Fair value of share options and assumptions Weighted average fair value of share option at grant date (RM)	0.86
Weighted average share price (RM)	2
Option life (years)	4.8
Risk-free rate (%)	4.5
Expected dividends (%)	3
Expected volatility (%)	25

The expected volatility is based on the historical share price volatility over the last 3 years. When determine the fair value, the management has also taken into consideration of the exercise restrictions and exercise behaviour. It was assumed that the directors would exercise the options after the vesting date when the share price is three times of the exercise price.

23. LOANS AND BORROWINGS (CONTINUED)

(a) Term loans

Term loan 1 of a subsidiary of RM40,483,000 (31.12.2021: RM44,485,000) bears interest at 6.85% (31.12.2021: 6.85%) per annum and is repayable by quarterly instalments of RM1,737,000 over ten years commencing from the day of first drawdown and is secured and supported as follows:

- (i) Legal charge over the freehold land and building of a subsidiary;
- (ii) Legal charge over the investment properties of a subsidiary;
- (iii) Legal charge over the biological assets of a subsidiary;
- (iv) Legal charge over the freehold land held for development; and
- (v) Corporate guarantee of the Company.

Term loan 2 of a subsidiary of RM31,572,000 (31.12.2021: RM43,815,000) bears interest at 6.85% (31.12.2021: 6.85%) per annum and is repayable by monthly instalments of RM1,223,000 over five years commencing from the day of first drawdown and is secured and supported as follows:

- (i) Legal charge over the investment properties of a subsidiary;
- (ii) Legal charge over the biological assets of a subsidiary;
- (iii) Legal charge over the freehold land held for development; and
- (iv) Corporate guarantee of the Company.

Term loan 3 of a subsidiary of RM11,480,000 (31.12.2021: Nil) bears interest at 7.15% (31.12.2021: Nil) per annum and is repayable by monthly instalments of RM1,223,000 over ten years commencing from the day of first drawdown and is secured and supported as follows:

- (i) Legal charge over the investment properties of a subsidiary;
- (ii) Legal charge over the biological assets of a subsidiary;
- (iii) Legal charge over the freehold land held for development; and
- (iv) Corporate guarantee of the Company.

Term loan 4 of the Company of RM19,675,000 (31.12.2021: RM22,379,000) bears interest at 6.85% (31.12.2021: 6.85%) per annum and is repayable by quarterly instalments of RM1,042,000 over ten years commencing from the day of first drawdown and is secured and supported as follows:

- (i) Legal charge over the investment properties of the Company;
- (ii) Legal charge over freehold land and building of the Company; and
- (iii) Legal charge over the freehold land held for development of the Company.

Term loan 5 of the Company of RM13,820,000 (31.12.2021: RM15,021,000) bears interest at 6.85% (31.12.2021: 6.85%) per annum and is repayable by bi-monthly instalments of RM370,000 over ten years commencing from the day of first drawdown and is secured and supported as follows:

- (i) Legal charge over the freehold land and building of the Company;
- (ii) Legal charge over the investment properties of the Company; and
- (iii) Legal charge over the freehold land held for development of the Company.

(a) Term loans (continued)

Term loan 6 of the Company of RM14,970,000 (31.12.2021: Nil) bears interest at 7.15% (31.12.2021: Nil) per annum and is repayable by bi-monthly instalments of RM434,000 over eight years commencing from the day of first drawdown and is secured and supported as follows:

- (i) Legal charge over the freehold land and building of the Company;
- (ii) Legal charge over the investment properties of the Company; and
- (iii) Legal charge over the freehold land held for development of the Company.

Breach of loan covenants 2

According to the terms of the agreement, the secured Term loan 3 contains a debt covenant that at the end of reporting period, the subsidiary shall maintain a debt to equity ratio of 0.5 as disclosed in Note 43. As at 31 December 2022, the subsidiary's debt to equity ratio was 0.7, resulting in the entire loan to be classified as current liability. The management is currently negotiating with the bank to amend the terms of the covenants.

(b) Lease liabilities

Future minimum lease payments together with the present value of net minimum lease payments are as follows:

(x) Hire purchase payables

Hire purchase payables of the Group of RMXXX (31.12.2021: RMXXX) bears interest ranging from xx% to xx% (31.12.2021: xx% to xx%) per annum and are secured by the Group's motor vehicles under hire purchase arrangements as disclosed in Note 5(c).

(c) Government loan

On 31 December 2022, the Group received an interest-free loan of RM12,000,000 from the Malaysian government to finance a research project on the refinery of oil palm over a period of 5 years. The loan is repayable in full at the end of the fifth year. Using prevailing market interest rate of 5.4% for an equivalent loan, the fair value of the loan is estimated to be RM8,000,000. The difference of RM4,000,000 between the gross proceeds and the fair value of the loan is recognised as deferred income as disclosed in Note 25. Interest expense of RM120,000 shall be recognised in the financial year ending 31 December 2023.

(d) Convertible bonds

Group and Company:	RM'000
Proceeds from issue of 100,000,000 convertible bonds Transaction costs	105,000 (5,500)
Fair value of convertible bonds issued on 10 September 2022 Equity component (Note 22(a))	99,500 (28,100)
Liability component on initial recognition on 10 September 2022 Interest expense	71,400 500
	71,900

During the financial year, the Company issued 100,000,000 units of convertible bonds at a price of RM1.05 per unit. Each bond is convertible at any time up to maturity into 10,000,000 ordinary shares at the conversion price of RM2 each, which is at a rate of one ordinary share for every ten convertible bonds held. Unconverted bonds shall become repayable on demand. The bonds mature ten years from the issue date and carry a coupon interest rate of 6.5% payable on 31 December each year.

The amount of the convertible bonds classified as equity is net of attributable transaction costs. Deferred tax liability of RM6,700,000 has been recognised directly to statements of changes in equity.

(e) Medium-term notes

The Company and a wholly-owned subsidiary of the Company, HHH Development Sdn Bhd ("HHH") established a multi-currency Medium-Term Notes ("MTN") Programme arranged by Credit Diners (M) Sdn Bhd with the purpose to issue MTN up to RM10,000,000 and RM30,000,000 respectively. The MTN programme can be utilised during the 10-year tenure commencing from the date of the first issue under the MTN programme on 1 June 2020. The net proceeds from the issuance of the MTN is expected to be utilised for general corporate purposes, which include financing on potential acquisition, strategic expansion, general working capital and capital expenditures.

The salient features of the MTN Programme are as follows:

- (i) The Company and HHH may, subject to compliance with all the relevant laws and regulations, from time to time, issue MTN in series or tranches with aggregate nominal value of the outstanding MTN not exceeding RM10,000,000 and RM30,000,000 respectively and agreed between the relevant dealer(s) and the Company and HHH;
- (ii) Each series or tranche of MTN may be issued in various amounts and tenors, and may bear fixed, floating, variable or hybrid rates of interest ranging from 7.1% to 7.5% (31.12.2021: 7.0% to 7.35%);
- (iii) The payment obligations of HHH under the MTN and certain other obligations under the documents pursuant to the MTN Programme ("Programme Documents") will be unconditionally and irrevocably guaranteed by the Company in accordance with the provisions of the applicable Programme Documents; and
- (iv) The Company and HHH shall maintain their debts to equity ratio of not more than 1.25 times.

(f) Redeemable preference shares

On 1 June 2020, 40,000,000 redeemable preference shares of RM1 each were issued by the Company at an issue price of RM1 per share. The salient features of the redeemable preference shares are as follows:

- They do not carry the right to vote;
- They carry a fixed cumulative dividend of 5% per annum;
- They are not convertible to ordinary shares; and
- They are redeemable at the option of the holders on or after 31 December 2023 at RM1.25 each.

(g) Revolving credit

The revolving credit of the Group and the Company are secured by way of:

- (i) a pledge of short-term deposits;
- (ii) legal charge over the investment properties of a subsidiary; and
- (iii) legal charge over the biological assets of a subsidiary.

23. LOANS AND BORROWINGS (CONTINUED)

Commentary:

An entity shall consider the following factors in determining the classification of loans and borrowings:

Unconditional right to defer settlement of the liability for at least 12 months after the reporting period? (MFRS 101.69(d))

A right is **NOT CREATED** as at the end of the reporting period by agreement entered into **AFTER** the reporting period. Circumstances include:

- The liabilities are due to be settled within 12 months after the reporting date even if the original term was for a period longer than 12 months and an agreement to refinance, or to reschedule payments, on a long-term basis is completed after the reporting period and before the financial statements are authorised for issue. (MFRS 101.72)
- Refinancing on a long-term basis is agreed after the reporting period. (MFRS 101.76(a))

A right is <u>CREATED</u> as at the end of the reporting period by agreement entered into <u>BEFORE</u> the reporting period. Circumstances include:

- An agreement to refinance or roll over a liability is in place at the end of the reporting period and the entity expects and has discretion to refinance or roll over the obligation for at least 12 months after the reporting period under an existing loan facility. (MFRS101.73)
- N/A

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

23. LOANS AND BORROWINGS (CONTINUED)

Commentary (continued):

- An entity shall consider the following factors in determining the classification of loans and borrowings (continued):
 - The borrower breaches a provision of a long-term arrangement on or before the end of reporting period with the effect that the liabilities becomes repayable on demand, even if the lender agrees after the reporting period not to demand payment, as a consequences of the breach. (MFRS101.74)
 - A period of grace is granted after the reporting period. (MFRS101.76(c))
 - The breach is rectified after the reporting period. (MFRS101.76(b))

- The borrower breaches a provision of a long-term arrangement on or before the end of reporting period with the effect that the liabilities becomes repayable on demand, but, the lender agrees by the end of the reporting period to provide a period of grace of at least 12 months after the reporting period within which the entity can rectify the breach and during which the lender cannot demand immediate repayment.

(MFRS101.75)

- N/A

- N/A

Classify the liability as CURRENT

Classify the liability as **NON-CURRENT**

If, during the period, there were breaches of loan agreement terms other than those described in Paragraph 18 of MFRS 7 *Financial Instruments: Disclosures*, an entity shall disclose the same information as required by Paragraph 18 if those breaches permitted the lender to demand accelerated repayment (unless the breaches were remedied, or the terms of the loan were renegotiated, on or before the end of the reporting period).

Amongst others, those information are:

- (a) Details of any breaches of loan agreement terms during the period;
- (b) The carrying amount of the loan payables where the Company has breached the terms of the agreement at the end of the reporting period; and
- (c) Whether the breaches of loan agreement terms were renegotiated before the financial statements were authorised for issue.

(a) Defined benefit pension plan

The Group's defined benefit pension plan requires contributions to be made to a separately administered fund. This plan provides benefits to members in the form of a guaranteed level of pension payable in perpetuity. The level of benefits provided depends on members' length of service and their salary in the final years leading up to retirement.

The funding requirements are based on the pension fund's actuarial measurement framework set out in the funding policies of the plan. Employees are not required to contribute to the plans.

The amounts recognised in the statements of financial position are as follows:

Components of plan assets

The plan assets comprise:

	Gro	oup
	31.12.2022 RM'000	31.12.2021 RM'000
Equity investments:		
- Quoted equity investments in Singapore:		
(a) bank sector investments	700	600
(b) trading sector investments	800	600
- Quoted equity investments in China:		
(a) telecommunication sector investments	500	680
(b) manufacturing sector investments	500	420
- Equity investment funds	300	750
	2,800	3,050
Debt investments:		
- Quoted foreign government bonds	4,000	4,500
- Structured debts	1,000	1,050
	5,000	5,550
Cash and cash equivalents	200	200
	8,000	8,800

All equity and debts investments are quoted in active markets. All government bonds are issued by Malaysian government and are rated AAA or AA, based on Synergy's ratings. In general, the Group maintains a mix portfolio of 35-65 in equity and debt instruments respectively.

The defined benefit plans expose the Group to actuarial risks, includes longevity risk, currency risk, interest rate risk and equity market risk. The Group does not use derivatives to manage its risk. The Group actively monitors how the duration and the expected yield of the investments are matched with the expected cash outflows.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

24. EMPLOYEE BENEFITS (CONTINUED)

(b) Post-employment healthcare benefit plan

The method of accounting and significant assumptions is similar to those used for defined benefit pension plan set out above with addition of actuarial assumptions relating to the long-term increase in healthcare costs of 6% (31.12.2021: 5.8%).

Movement in the defined benefit liability

The following table illustrates a reconciliation of the net defined benefit liability and its components:

	Defined
	benefit
	obligation
	RM'000
At 1 January 2021	400
Current service cost	600
Interest expense	370
Benefit payments	(349)
Effects of changes in foreign exchange rates	80
At 31 December 2021	1,101
Current service cost	730
Interest expense	340
Benefit payments	(920)
Effects of changes in foreign exchange rates	(100)
At 31 December 2022	1,151

Significant actuarial assumptions

The significant actuarial assumptions applied in the measurement of defined benefit pension plan and post-employment healthcare benefit plan are as follows:

	31.12	2.2022	31.12.2021	
	China	Singapore	China	Singapore
	%	%	%	%
Discount rate	4.7	4.0	4.8	4.1
Future salary growth	5.0	5.0	4.5	4.5
Future increases in employee benefits	3.2	3.1	3.2	3.1
Future increases in healthcare costs	2.7	2.3	2.4	2.2

Assumptions on future mortality are determined based on the published past statistics and actual experience in each jurisdiction. The measurements assume an average life expectancy of 23 years for an employee retiring at age 60.

197

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

24. EMPLOYEE BENEFITS (CONTINUED)

119.145(a)

Sensitivity analysis

The sensitivity of the defined benefit obligation to the significant actuarial assumptions at the end of reporting period are shown below:

	Reasonably possible change in assumption	Effect on benefit ob	
Group	%	RM'000	RM'000
31.12.2022			
Discount rate	1.0	(2,850)	2,940
Future salary growth	1.0	1,320	(1,210)
Future increases in employee benefits	1.0	3,300	(3,080)
Future increases in healthcare costs	1.0	1,580	(1,370)
31.12.2021			
Discount rate	1.0	(2,650)	2,835
Future salary growth	1.0	1,220	(1,091)
Future increases in employee benefits	1.0	3,078	(2,880)
Future increases in healthcare costs	1.0	1,465	(1,284)

The sensitivity analysis above has been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in significant actuarial assumptions occurring at the end of reporting period.

119.145(b)

119.145(c)

Commentary:

An entity shall disclose changes from the previous period in the methods and assumptions used in preparing the sensitivity analysis and the reason for such change.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

25. DEFERRED INCOME (CONTINUED)

120.39(b)

120.39(b)

(a) Government grants relates to assets

Government grants have been received for the purchase of certain items of property, plant and equipment. There are no unfulfilled conditions or contingencies attached to these grants.

(b) Government loan

On 31 December 2022, the Group received an interest-free loan of RM12,000,000 from the Malaysian government to finance a research project on the refinery of oil palm over a period of 5 years. The loan is repayable in full at the end of the fifth year. Using the prevailing market interest rate of 5.4% for an equivalent loan, the fair value of the loan is estimated to be RM8,000,000 as disclosed in Note 23(c). The difference of RM4,000,000 from the net of the gross proceeds and the fair value of the loan is recognised as above. Interest expense of RM120,000 shall be recognised in financial year ending 31 December 2023.

0''

The deferred income is offset against the research costs when incurred.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

26. PROVISIONS (CONTINUED)

(a) Warranties

The provision for warranties represents the present value of the directors' best estimates of future economic obligation that will be required under the Group's obligation for warranties on plastic mould sold during the last two financial years. The provision is recognised based on estimation made from historical warranty data associated with similar products.

(b) Site restoration costs

A provision of RM2,500,000 was made during the financial year ended 31 December 2022 in respect of the Company's obligation to dismantle and remove the items and restore the site on which the plant is located in China after the end of six tenure periods. The Company has estimated a range of reasonably possible outcomes of the total cost of RM3,250,000, reflecting different assumptions about the pricing of the individual components of cost. The provision has been calculated using a discount rate of 4.5%, which is the risk-free rate in the jurisdiction of the liability.

(c) Legal claims

The provisions relate to a legal action by a former employee on his retrenchment issue and legal claims brought against the Group by its customers of the manufacturing operating segment. In the directors' opinion, after taking appropriate legal advice, the outcome of these legal claims will not give rise to any significant loss beyond the amounts as provided in the financial statements.

The Group and the Company apply the practical expedient in paragraph 121(a) of MFRS 15 and do not disclose information about remaining performance obligations that have original expected durations of one year or less.

15.121(a) 15.122

Commentary:

IC Int 22

1 IC Interpretation 22 Foreign Currency Transaction and Advance Consideration clarified the date of the transaction for the purpose of determining exchange rate to be used on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration in a foreign currency. The exchange rate should be based on the rate at the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration.

15.B89

- 2 Examples of categories that might be appropriate include, but are not limited to, all of the following:
 - (a) type of good or service (for example, major product lines);
 - (b) geographical region (for example, country or region);
 - (c) market or type of customer (for example, government and non-government customers);
 - (d) type of contract (for example, fixed-price and time-and-materials contracts);
 - (e) contract duration (for example, short-term and long-term contracts);
 - (f) timing of transfer of goods or services (for example, revenue from goods or services transferred to customers at a point in time and revenue from goods or services transferred over time); and
 - (g) sales channels (for example, goods sold directly to consumers and goods sold through intermediaries).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

28. REVENUE (CONTINUED) 1

Commentary (continued):

15.120

- An entity shall disclose the following information about its remaining performance obligations:
- (a) the aggregate amount of the transaction price allocated to the performance obligations that are unsatisfied (or partially unsatisfied) as of the end of the reporting period; and
- (b) an explanation of when the entity expects to recognise as revenue the amount disclosed in accordance with paragraph 120(a), which the entity shall disclose in either of the following ways:
 - (i) on a quantitative basis using the time bands that would be most appropriate for the duration of the remaining performance obligations; or
 - (ii) by using qualitative information.

Illustration of qualitative disclosure

"As of 31 December 2022, the aggregate amount of the transaction price allocated to the remaining performance obligation for property development contracts is RM6.8 million and the entity will recognise this revenue as the building is completed, which is expected to occur over the next 12—18 months."

15.121

15 IF220-221

- 4 Entity may apply the practical expedient for need not to disclose the information about the remaining obligations for a performance obligation that are unsatisfied (or partially unsatisfied) if either of the following conditions is met:
 - (a) the performance obligation is part of a contract that has an original expected duration of one year or less; or
 - (b) the entity recognises revenue from the satisfaction of the performance obligation when the entity has a right to consideration from a customer in an amount that corresponds directly with the value to the customer of the entity's performance completed to date.

If an entity elects to use the practical expedient, it shall disclose the fact.

15.122

Entity shall disclose whether any consideration from contracts with customers is not included in the transaction price and, therefore, not included in the information disclosed for the remaining obligations of performance obligation that are unsatisfied (or partially unsatisfied).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

37. EARNINGS/(LOSS) PER SHARE (CONTINUED)

Commentary:

133.12133.66

- An entity shall present in the statement of comprehensive income basic and diluted earnings per share for:
 - (1) profit or loss from continuing operations attributable to the <u>ordinary equity holders</u> of the parent entity; and
 - (2) profit or loss attributable to the ordinary equity holders of the parent entity for the period <u>for</u> <u>each class of ordinary shares that has a different right to share</u> in profit for the period.

Accordingly, for the purpose of basic and diluted earnings/(loss) per ordinary share calculation, an entity shall adjust the profit or loss attributable to the parent entity for the after-tax amounts of preference dividends, differences arising on the settlement of preference shares, and other similar effects of preference shares classified as equity.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39. FINANCIAL INSTRUMENTS (CONTINUED)

(b) Financial risk management

The Group's and the Company's activities are exposed to a variety of financial risks arising from their operations and the use of financial instruments. The key financial risks include credit risk, liquidity risk, foreign currency risk, interest rate risk and market price risk. The Group's and the Company's overall financial risk management objective is to optimise value for their shareholders. The Group and the Company use derivative financial instruments, such as, foreign exchange contracts to hedge certain exposures. The Group and the Company do not trade in financial instruments.

The Board of Directors reviews and agrees to policies and procedures for the management of these risks, which are executed by the Group's senior management. The audit committee provides independent oversight to the effectiveness of the risk management process.

(i) Credit risk

Credit risk is the risk of financial loss to the Group and the Company that may arise on outstanding financial instruments should a counterparty default on its obligations. The Group and the Company are exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments. The Group and the Company have a credit policy in place and the exposure to credit risk is managed through the application of credit approvals, credit limits and monitoring procedures. Credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment.

Trade receivables and contract assets

As at the end of the reporting period, the maximum exposure to credit risk arising from trade receivables and contract assets is represented by the carrying amounts in the statements of financial position.

The carrying amount of trade receivables and contract assets are not secured by any collateral or supported by any other credit enhancements. In determining the recoverability of these receivables, the Group and the Company consider any change in the credit quality of the receivables from the date the credit was initially granted up to the reporting date. The Group and the Company have adopted a policy of dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39. FINANCIAL INSTRUMENTS (CONTINUED)

- (b) Financial risk management (continued)
 - (i) Credit risk (continued)

Trade receivables and contract assets (continued)

The Group and the Company apply the simplified approach to provide for impairment losses prescribed by MFRS 9, which permits the use of the lifetime expected credit losses provision for all trade receivables and contract assets. To measure the impairment losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The impairment losses also incorporate forward looking information. Forward-looking information considered includes consideration of various external sources of actual and forecast economic information that relate to the Group's and the Company's core operations.

The information about the credit risk exposure on the Group's and Company's trade receivables and contract assets using provision matrix are as follows:

		Trade receivables				
Group	Contract	Current	> 30 days past due	> 60 days	> 90 days past due	Total

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39. FINANCIAL INSTRUMENTS (CONTINUED)

- (b) Financial risk management (continued)
 - (i) Credit risk (continued)

Trade receivables and contract assets (continued)

For construction contracts, as there are only a few customers, the Group and the Company assessed the risk of loss of each customer individually based on their financial information, past trend of payments and external credit ratings, where applicable.

The significant changes in the gross carrying amounts of trade receivables and contract assets contributed to the changes in the impairment loss allowance during the financial year 2022 is due to the growth of the Group's business in Asian resulted in increase in trade receivables of RMXXX and increase in the Group's impairment losses in the financial year 2022 of RM XXX.

Other receivables and other financial assets

For other receivables and other financial assets (including investment securities, cash and cash equivalents and derivatives), the Group and the Company minimise credit risk by dealing exclusively with high credit rating counterparties. At the reporting date, the Group's and the Company's maximum exposure to credit risk arising from other receivables and other financial assets is represented by the carrying amount of each class of financial assets recognised in the statements of financial position.

The Group and the Company consider the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk, the Group and the Company compare the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forward-looking information. Especially the following indicators are incorporated:

- internal credit rating
- external credit rating (as far as available)
- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the borrower's ability to meet its obligations
- actual or expected significant changes in the operating results of the borrower
- significant increases in credit risk on other financial instruments of the same borrower
- significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements
- significant changes in the expected performance and behaviour of the borrower, including changes in the payment status of borrowers in the group and changes in the operating results of the borrower

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39. FINANCIAL INSTRUMENTS (CONTINUED)

- (b) Financial risk management (continued)
 - (i) Credit risk (continued)

Other receivables and other financial assets (continued)

Macroeconomic information (such as market interest rates or growth rates) is incorporated as part of the internal rating model.

Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than 30 days past due in making a contractual payment.

Some intercompany loans between entities within the Group are repayable on demand. For loans that are repayable on demand, impairment losses are assessed based on the assumption that repayment of the loan is demanded at the reporting date. If the borrower does not have sufficient highly liquid resources when the loan is demanded, the Group and the Company will consider the expected manner of recovery and recovery period of the intercompany loan.

As at the end of the reporting date, the Group and the Company consider the other receivables and other financial assets as low credit risk and any loss allowance would be negligible. Refer to Note 3.16(a) for the Group's and the Company's other accounting policies for impairment of financial assets.

Finance lease receivables 2

The credit risk associated with finance lease receivables is mitigated by way of obtaining security over the leased equipment. At the reporting date, the Group's maximum exposure to credit risk is represented by the carrying amounts recognised in the statements of financial position.

As at the end of the reporting date, the Group and the Company consider the finance lease receivables as low credit and any loss allowance would be negligible.

Financial guarantee contracts

The Company is exposed to credit risk in relation to financial guarantees given to banks in respect of loans granted to certain subsidiaries. The Company monitors the results of the subsidiaries and their repayment on an on-going basis. The maximum exposure to credit risks amounts to RM83,535,000 (31.12.2021: RM88,300,000) representing the maximum amount the Company could pay if the guarantee is called on as disclosed in Note 39(b)(ii). As at the reporting date, there was no loss allowance for impairment as determined by the Company for the financial guarantee.

The financial guarantees have not been recognised since the fair value on initial recognition was not material as the guarantee is provided as credit enhancement to subsidiaries' secured borrowings.

Commentary:

7.35F(a)(ii)

An entity shall explain if the presumption in MFRS 9.5.11, that there have been significant increases in credit risk since initial recognition when financial assets are more than 30 days past due, has been rebutted.

9.5.5.15(b)

An entity has an accounting policy choice to measure the loss allowance using simplified or general approach. That accounting policy shall be applied to all lease receivables but may be applied separately to finance and operating lease receivables.

Illustrative disclosure where there is impairment loss recognised for financial assets using general approach

A summary of the assumptions underpinning the Company's expected credit loss model is as follows:

7.35F(b) 7.35F(d)-(e) 7.35G(a)

Category	Definition of category	Basis of recognition of expected credit loss provision
Performing	Customers have a low risk of default and a strong capacity to meet contractual cash flows	12 month expected loss. Where the expected lifetime of an asset is less than 12 months, expected losses are measured at its expected lifetime.
Underperforming	Loans for which there is a significant increase in credit risk; as significant increase in credit risk is presumed if interest and/or principal repayments are 30 days past due (see above in more detail)	Lifetime expected loss
Non-performing	Interest and/or principal repayments are 60 days past due	Lifetime expected loss
Write-off	Interest and/or principal repayments are 120 days past due and there is no reasonable expectation of recovery.	Asset is written off

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39. FINANCIAL INSTRUMENTS (CONTINUED)

- (b) Financial risk management (continued)
 - (ii) Liquidity risk 12

Liquidity risk is the risk that the Group or the Company will encounter difficulty in meeting financial obligations when they fall due. The Group's and the Company's exposure to liquidity risk arise primarily from mismatches of the maturities between financial assets and liabilities. The Group's and the Company's exposure to liquidity risk arise principally from trade and other payables, loans and borrowings.

The Group's and the Company's objective is to maintain a balance between continuity of funding and flexibility through the use of stand-by facilities. The Group and the Company maintain sufficient liquidity and available funds to meet daily cash needs, while maintaining controls and security over cash movements. The Group and the Company use a series of processes to obtain maximum benefits from its flow of funds, such that they are efficiently managed to maximise income from investment and minimise cost on borrowed funds. The Group's and the Company's treasury department also ensure that there are sufficient unutilised stand-by facilities, funding and liquid assets available to meet both short-term and long-term funding requirements.

Maturity analysis

The maturity analysis of the Group's and the Company's financial liabilities by their relevant maturity at the reporting date based on contractual undiscounted repayment obligations are as follows:

Group		Conf	tractual cash f	lows	
At 31 December 2022	Carrying amount RM'000	On demand or within 1 year RM'000	Between 1 and 5 years RM'000	More than 5 years RM'000	Total RM'000

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39. FINANCIAL INSTRUMENTS (CONTINUED)

(b) Financial risk management (continued)

(iii) Foreign currency risk

Foreign currency risk is the risk of fluctuation in fair value or future cash flows of a financial instrument as a result of changes in foreign exchange rates. The Group's and the Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's and the Company's operating activities (when sales, purchases and borrowings that are denominated in a foreign currency) and the Group's net investments in foreign subsidiaries.

Management has set up a policy that requires all companies within the Group and the Company to manage their treasury activities and exposures. The Group's and the Company's policy is to hedge all material foreign currency exposures arising from its transactions and balances using derivative instruments that have maturity periods that match the corresponding maturity periods of the hedged items. In addition, the Group and the Company also takes advantage of any natural effects of its foreign currencies revenues and expenses by maintaining current accounts in foreign currencies.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39. FINANCIAL INSTRUMENTS (CONTINUED)

(b) Financial risk management (continued)

(iv) Interest rate risk

Interest rate risk is the risk of fluctuation in fair value or future cash flows of the Group's and the Company's financial instruments as a result of changes in market interest rates. The Group's and the Company's exposure to interest rate risk arises primarily from their long-term loans and borrowings with floating interest rates. The Group's and the Company's policy to manage their interest rate risk is to hedge all material floating rate borrowings using interest rate swaps.

Sensitivity analysis for interest rate risk

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant on the Group's and the Company's total equity and profit for the financial year.

(v) Market price risk

Market price risk is the risk of fluctuation in fair value or future cash flows of the Group's financial instruments, agricultural produce stocks as a result of changes in market price (other than interest or exchange rates).

The Group's and the Company's investments in quoted equity instruments are subject to market price risk. Such exposures are not hedged as the investments are mostly stable blue chip companies and government securities, where the risks accepted are commensurate with the expected returns.

The Group's agricultural produce stocks are subject to price risk. The Group's strategy is to hedge forecast sales of expected production of crude palm oil and palm kernel in each quarter using the 3-month palm oil and palm kernel futures contracts. The Group does not anticipate that prices of other manufactured products will decline significantly in the foreseeable future and, therefore, has not entered into derivatives or other contracts to manage the risk of decline in prices of manufactured products.

Sensitivity analysis for equity price risk

The following table demonstrates the sensitivity to a reasonably change in the FTSE Bursa Malaysia KLCI ("FBM KLCI"), with all other variables held constant on the Group's and the Company's total equity and profit for the financial year.

(c) Hedging activities

7.21A

The Group and the Company are exposed to certain risks relating to its ongoing business operations. The primary risks managed using derivative instruments are foreign currency risk and interest rate risk.

The Group's and the Company's risk management strategy and how it is applied to manage risk are explained in Note 39(b).

(i) Fair value hedge

Foreign exchange forward contracts are designated as hedging instruments in fair value hedges of forecast sales and forecast purchases in USD. These forecast transactions are highly probable, and they comprise about xx% of the Group's total expected sales in USD and about xx% of its total expected purchases in USD. The foreign exchange forward contract balances vary with the level of expected foreign currency sales and purchases and changes in foreign exchange forward rates.

There is an economic relationship between the hedged items and the hedging instruments as the terms of the foreign exchange contracts match the terms of the expected highly probable forecast transactions (i.e. notional amount and expected payment rate). The Group has established a hedge ratio of 1:1 for the hedging relationships as the underlying risk of foreign exchange contracts are identical to the hedged risk components. To test the hedge effectiveness, the Group uses the hypothetical derivative method and compares the changes in the fair value of the hedging instruments against the changes in fair value of the hedged risks.

The hedged ineffectiveness can arise from:

- Differences in the timing of the cash flows of the hedged items and hedging instruments.
- Different indexes linked to the hedged risk of the hedged items and hedging instruments.
- The counterparties' credit risk differently impacting the fair value movements of the hedging instrument and hedged item.

			ххх	XXX	xxx	xxx	xxx	XXX

The hedged highly probable forecast transactions denominated in foreign currency are expected to occur at various dates during the next 12 months. Gains and losses recognised in the hedging reserve in equity on forward foreign exchange contracts as of 31 December 2022 are recognised in the profit or loss in the period or periods during which the hedged forecast transaction affects the profit or loss.

The cash flow hedges of the expected future purchases in 2023 were assessed to be highly effective, and as at 31 December 2022, a net unrealised loss of RM2,200,000 was included in other comprehensive income in respect of these contracts. Comparatively in prior financial year, the cash flow hedges of the expected future purchases in 2022 were also assessed to be highly effective and an unrealised profit of RM1,700,000 was included in other comprehensive income in respect of these contracts.

The amounts removed from other comprehensive income during the financial year and included in the carrying amount of the hedging items as a basis adjustment for 2022 are detailed in Note 36, totalling decrease of RM800,000 (2021: increase of RM400,000). The amounts retained in other comprehensive income at 31 December 2022 are expected to mature and affect the statement of profit or loss in 2023.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39. FINANCIAL INSTRUMENTS (CONTINUED)

(d) Fair value measurement (continued)

Level 2 fair value

13.93(d) Fair value of financial instruments carried at fair value

The fair value of interest rate swap contracts is calculated as the present value of the estimated future cash flows based on observable market based yield curves.

The fair value of forward foreign exchange contracts is estimated by discounting the difference between the contractual forward price and the current forward price for the residual maturity of the contract.

Fair value of financial instruments not carried at fair value

The fair value of liability component of convertible bonds is calculated based on the present value of future principal and interest cash flows, discounted at the market interest rate of similar liabilities that do not have a conversion option.

Level 3 fair value

Fair value of financial instruments carried at fair value

The fair value of unquoted equity investments has been estimated using a discounted cash flows model. The valuation requires management to make certain assumptions about the model inputs, including forecast cash flows, the discount rate, credit risk and volatility. The probabilities of the various estimates within the range can be reasonably assessed and are used in the management's estimate of fair value for these unquoted equity investments.

Fair value of financial instruments not carried at fair value

The fair value of unquoted debt securities, amount owing by immediate holding company, amount owing by subsidiaries, amount owing by related companies, finance lease receivables, bank borrowings, government loan, medium-term notes, redeemable preference shares, finance lease liabilities, amount owing to ultimate holding company, amount owing to subsidiaries and amount owing to related companies are determined using the discounted cash flows method based on discount rates that reflects the issuer's borrowing rate as at the end of the reporting period.

Commentary:

Disclosure of the fair values of financial instruments is not required:

- When the carrying amount is a reasonable approximation of fair value (e.g.: short-term trade receivables and payables); or
- For lease liabilities.

Level 3 fair value (continued)

13.93(e)

13.93(d)

The following table shows a reconciliation of fair value measurement of investment in unquoted equity securities classified as financial asset designated at fair value through other comprehensive income:

	31.12.2022 RM'000
At 1 January	1,600
Additions	100
Disposal	(xx)
Transfer into Level 3	XX
Transfer out of Level 3	(xx)
Gains and losses recognised in other comprehensive income	XX
Exchange differences	XX
At 31 December	1,700

The following table shows the valuation techniques used in the determination of fair values within Level 3, as well as the significant unobservable inputs.

Description	Valuation technique	Significant unobservable inputs	Relationship of unobservable inputs to fair value
Investment in unquoted equity securities	Discounted cash flows	Long-term growth rate for cash flows for subsequent years (31.12.2021: 3.5% - 4.5%)	rate would result in an
Sodimos		Long-term operating margin (31.12.2021: 5.0% - 10.0%)	Increase in margin would result in an increase in fair value.
		Weighted average cost of capital ("WACC") (31.12.2021: 11.0%-13.0%)	
		Discount for lack of marketability (31.12.2021: 5.0% - 12.0%)	Increase in the discount would result in a decrease in fair value.

Valuation processes applied by the Group 1

The Group's and the Company's finance department include a team that performs valuation analysis for unquoted equity securities required for financial reporting purposes, including Level 3 fair values. This team reports directly to the chief financial officer.

The main level 3 inputs used by the Group and the Company are derived and evaluated as follows:

- a) Discount rates for financial assets are determined using a capital asset pricing model to calculate a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the asset.
- b) Risk adjustments specific to the counterparties (including assumptions about credit default rates) are derived from credit risk grading determined by the Group's and the Company's internal credit risk management group.
- c) Growth rate for unquoted equity securities are estimated based on market information for similar types of companies.

Changes in Level 3 fair values are analysed by the team at the end of each reporting period. There has been no change to the valuation technique during the financial year.

Commentary:

Illustrative disclosure where the fair value of unquoted equity investment is determined by an external valuer

The Group's finance department includes a team that performs valuation analysis for unquoted equity securities required for financial reporting purposes, including Level 3 fair values. This team reports directly to the chief financial officer.

The fair value of unquoted equity securities is determined by external independent valuation company, Messrs Advisory & Co., a member of XXX, with appropriate recognised professional qualifications and recent experience in valuation of unquoted financial instruments. The valuation company provides the fair value of the Group's and the Company's unquoted financial instruments every year end. Changes in Level 3 fair values are analysed by the team after obtaining the valuation report from the valuation company. There has been no change to the valuation technique during the financial year.

(b) Contingent assets

Certain land of the Group has been a subject of a Government compulsory land acquisition. The Group has disputed the adequacy of the amount of compensation received and filed a claim against the Government in the High Court for an additional compensation of RM10,000,000. Based on past judgements by the Courts on similar cases and the advice of legal experts, the directors are of the opinion that it is probable the claim for additional compensation will succeed.

42. RELATED PARTIES

(a) Identity of related parties

Parties are considered to be related to the Group if the Group has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operational decisions, or vice versa, or where the Group and the party are subject to common control. Related parties may be individuals or other entities.

Related parties of the Group include:

- (i) Company's holding company;
- (ii) Entities having significant influence over the Group;
- (iii) Subsidiaries;
- (iv) Associates;
- (v) Joint ventures;
- (vi) Entities in which directors have substantial financial interests; and
- (vii) Key management personnel of the Group and the Company's holding company, comprise persons (including directors) having the authority and responsibility for planning, directing and controlling the activities directly or indirectly.

Transfer of a software system Company's holding company	*	*	*	*

* During the financial year ended 31 December 2022, the Group received a software system from its ultimate holding company, Flying Colours Holdings Sdn Bhd. The software system was transferred at nil consideration. The Group expects significant economic benefits to be derived from the use of this software system in the Group's operations but the amount of the benefits could not be reasonably quantified for reporting purposes.

43. CAPITAL MANAGEMENT

101.134 101.135 The primary objective of the Group's and the Company's capital management is to ensure that they maintain a strong credit rating and healthy capital ratio in order to support their business and maximise shareholder value. The Group and the Company manage their capital structure and make adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group and the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives, policies and processes during the financial years ended 31 December 2022 and 31 December 2021.

The Group and the Company monitor capital using debt to equity ratio. The debt to equity ratio is calculated as total debts divided by total equity. The Group's and the Company's policy is to keep the debt to equity ratio between 30% and 60%. The debt to equity ratio at 31 December 2022 and 31 December 2021 are as follows:

		Gro	up	Comp	pany
	Note	31.12.2022 RM'000	31.12.2021 RM'000	31.12.2022 RM'000	31.12.2021 RM'000

Loans and borrowings	23	290,200	204,200	168,800	84,700
Total debts		398,700	296,400	189,600	122,100
Total equity		881,800	535,200	512,100	264,000
Debt to equity ratio		45%	55%	37%	46%

101.135(e) 7.19 A subsidiary of the Group is required to maintain a debt to equity ratio of 0.5 to comply with a bank covenant. The subsidiary has breached this covenant as disclosed in Note 23(a).

44. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR

- (a) During the financial year, the Company has entered into two material service concession arrangements, one is with the State Government of Penang in Malaysia to construct and operate the State Government convention center and the other is with the State Government of Shenzhen in China to build and operate a power plant to supply electricity to consumers in a designated area. The Company is granted a right to intangible assets or a license to charge public customers for the use of the public infrastructure and the concession rights have been granted for a period of twenty five years. Further details are disclosed in Note 9(b).
- (b) On 31 March 2022, the Company acquired an 80% controlling interest in the equity shares of PT Halia Palm Oil for a total purchase consideration of RM80,000,000. Further details are disclosed in Note 10(a).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

44. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR (CONTINUED)

- (c) On 1 June 2022, the Company disposed its 70% equity investment in ABC Sdn Bhd for a total consideration of RM20,100,000. The Company classified its remaining 30% equity interest in ABC Sdn Bhd as associate given the Company has significant influence over the financial and operating policy decisions of ABC Sdn Bhd. Further details are disclosed in Note 10(b).
- (d) On 31 July 2022, the Company purchased an additional 10% equity interest (representing 5,000,000 ordinary shares) in XYZ Sdn Bhd, a subsidiary of the Group at a price of RM2 per share. Further details are disclosed in Note 10(c).
- (e) On 30 September 2022, the Board of Directors approved and announced a plan to sell a subsidiary, PT BLK Construction, which operates in Indonesia. The assets and liabilities related to PT BLK Construction (part of the construction business segment) have been presented as held for sale. The completion date for the transaction is expected by June 2023. Further details are disclosed in Note 19(a).
- (f) On 31 December 2022, the Group received an interest-free loan of RM12,000,000 from the Malaysian government to finance a research project on the refinery of oil palm over a period of 5 years. The loan is repayable in full at the end of the fifth year. Further details are disclosed in Note 23(c). The difference between the gross proceeds and the fair value of the loan is recognised as deferred income as disclosed in Note 25.

45. SIGNIFICANT EVENTS SUBSEQUENT TO THE END OF THE FINANCIAL YEAR

(a) Probable acquisition of a business

On 26 February 2022, the Company entered into a negotiation for an arrangement to acquire a 75% equity interest of XYZ Ltd from its controlling shareholder, PQR Ltd. XYZ Ltd is in the business of commodity marketing and trading in international markets. The directors of the Company believe that the acquisition of a controlling stake in XYZ Ltd would create synergies and increase the Group's market shares in agricultural business. Negotiation with the controlling shareholder is at the advanced stage and the Company expects to complete the agreement by end of November 2023. The estimated financial effects of this probable acquisition are as follows:

	RM'000
Cash consideration	120,000
Non-controlling interests at fair value	40,000
	160,000
Fair value of identifiable net assets acquired	(120,000)
Goodwill arising on acquisition	40,000

(b) Update of information about a lawsuit

A lawsuit was disclosed as a contingent liability at the end of the financial year 2022. The Group has, after the end of the reporting period, commenced negotiation with the plaintiff to settle the dispute out of court. Negotiation is in the advanced stage and it is possible that the claims by the plaintiff will be settled out of court by the end of financial year 2023. The amount of the possible settlement is not disclosed because any such disclosure may prejudice seriously the position of the Group in the negotiation with the plaintiff or the pending court hearing.

46. SEGMENT INFORMATION

8.20

The Group prepared the following segment information in accordance with MFRS 8 *Operating Segments* based on the internal reports of the Group's strategic business units which are regularly reviewed by the Group's Chief Executive Officer ("CEO") for the purpose of making decisions about resource allocation and performance assessment.

The five reportable operating segments are as follows:

Segments	Products and services
Plantation	Cultivation of oil palms, milling of fresh fruit bunches and production of crude palm oil and palm kernel.
Construction services	Construction of commercial and industrial building and provision of mechanical and engineering services.
Service concession	Construction and operation of public infrastructure.
Property development	Development and sales of residential, commercial and/or industrial buildings.
Manufacturing	Manufacturing and selling of plastic mould related products.
•	gments involved in business of fast-food operation and equipment leasing antitative thresholds for determining reportable segments.

8.16

8.27(a)

Inter-segment pricing is determined on negotiated basis.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

46. SEGMENT INFORMATION (CONTINUED)

8.22(a) Factors used to identify reportable segments

The oil palm business was developed internally whereas other businesses were acquired as individual units, and the management at the time of the acquisition was retained. The oil palm cultivation operating segment and the milling operating segment are aggregated into the reportable plantation operating segment due to the nature of the production process and they shared same methods of distribution and customers' base. The performance of the two separate operations is evaluated internally as a single business unit.

The service concession operating segment and the property development operating segment are organised and identified as separate reportable segments due to the regulatory environments in which the businesses operate.

The construction operating segment and the engineering service operating segment are aggregated into the reportable construction segment due to similar construction technology and long-term profit margins. The two operating segments are evaluated internally as a single business unit.

Segment profit

Segment performance is used to measure performance as Group's CEO believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries. Performance is evaluated based on operating profit or loss which is measured differently from operating profit or loss in the consolidated financial statements.

Segment assets

The total of segment asset is measured based on all assets (excluding investment in associates and joint ventures) of a segment, as included in the internal reports that are reviewed by the Group's CEO.

Segment liabilities

Segment liabilities are not included in the internal reports that are reviewed by the Group's CEO, hence no disclosures are made on segment liabilities.

Information about major customers 3

For construction segment, revenue from one customer represented approximately RM200,000,000 (2021: RM130,000,000) for the Group's total revenue.

Commentary:

1 If the Group operates predominantly in Malaysia, the illustrative disclosure is as follows:

The Group operates predominantly in Malaysia and hence, no geographical segment is presented.

- 2 Non-current assets exclude financial instruments, deferred tax assets, post-employment benefit assets and rights arising under insurance contracts.
- If revenues from transactions with a single external customer amount to 10% or more of an entity's revenues, the entity shall disclose that fact, the total amount of revenues from each such customer, and the identity of the segment or segments reporting the revenues.

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Flying Colours Berhad, which comprise the statements of financial position as at 31 December 2022 of the Group and of the Company, and the statements of comprehensive income, statements of changes in equity and statements of cash flows of the Group and of the Company for the financial year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages 13 to 273.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Group and of the Company as at 31 December 2022, and of their financial performance and their cash flows for the financial year then ended in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

Basis for Opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence and Other Ethical Responsibilities

We are independent of the Group and of the Company in accordance with the *By-Laws* (on *Professional Ethics, Conduct and Practice*) of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants* (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Material Uncertainty Related to Going Concern¹

We draw attention to Note X to the financial statements, which disclosed that the Group incurred a net loss of RMXXX during the financial year ended XXX and, as of that date, the Group's current liabilities exceeded its current assets by RMXXX and recorded a capital deficiency of RMXXX, thereby indicating the existence of a material uncertainty which may cast significant doubt about the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

¹ To be included when the use of going concern basis of accounting is appropriate but a material uncertainty exists.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the Group and of the Company for the current financial year. These matters were addressed in the context of our audit of the financial statements of the Group and of the Company as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. [In addition to the matter described in the Material Uncertainty Related to Going Concern section, we have determined the matters below to be the key audit matters to be communicated in our report]

<u>Group</u>

[Description of each key audit matter in accordance with ISA 701.]

Company

[Description of each key audit matter in accordance with ISA 701.]

Information Other than the Financial Statements and Auditors' Report Thereon

The directors of the Company are responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements of the Group and of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard. [or As described below, we have concluded that such a material misstatement of the other information exists.

Description of material misstatement of the other information.]

Responsibilities of the Directors for the Financial Statements

The directors of the Company are responsible for the preparation of financial statements of the Group and of the Company that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. The directors are also responsible for such internal control as the directors determine is necessary to enable the preparation of financial statements of the Group and of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and of the Company, the directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

The directors of the Company are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Group's and the Company's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's or the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements of the Group and
 of the Company, including the disclosures, and whether the financial statements of the Group and
 of the Company represent the underlying transactions and events in a manner that achieves fair
 presentation.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

Reference

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current financial year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

In accordance with the requirements of the Companies Act 2016 in Malaysia, we report that the subsidiaries of which we have not acted as auditors, are disclosed in Note 10 to the financial statements.

Other Matters

This report is made solely to the members of the Company, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the contents of this report.
