

Economic Stimulus Package 2020

**“Bolstering Confidence, Stimulating Growth & Protecting
Jobs”**

“

Malaysia recorded economic growth of 4.3% in 2019, its weakest since 2009. The combined effects of the economic slowdown, coupled with the US-China tariff wars, depressed economic growth and trade performance for over a year. The outbreak of the COVID-19 epidemic in China will significantly impact the global supply chain in several key sectors for Malaysia, namely, manufacturing, trade, tourism and key investments from China, and further weaken our domestic economy.

The Government has announced a RM20 billion fiscal stimulus package as a ‘stop-gap’ measure to aid the economy and Malaysians in this time of stress and uncertainty. Some of these measures are short-term but there are also some that could assist in the medium term. As much as it is a welcome move by the Government, it is left to be seen in the next 6 months to a year whether the package was sufficient to avoid potential further shrinkage of the economy and job-loss. The question of how these measures will be financed is inevitable, given the current fiscal deficit of 3.2%. This deficit is expected to increase by a modest 0.2% to 3.4% as a result of this stimulus package, and to my mind is worthwhile given the anticipated boost to GDP growth of something closer to 4.2% expected to be achieved by virtue of the stimulus. The thrust of this lies in the fact that the RM20 billion will mainly be contributed by the reduction in the EPF employee contribution rate and Bank Negara soft-loans funding to SME’s and targeted sectors.

”

We laud the Government’s efforts, and pray for the victims of the COVID-19 outbreak.
