

Environmental, Social & Governance (ESG)

Internal Audit & Risk Advisory

Sustainability and climate change are among the most pressing problems facing the world today and have moved to the top of the agenda for many organizations. Investors, regulators, and stakeholders across society are demanding increasingly high quality and further transparency of ESG information from organizations to facilitate decisions about investment, assess long term value, and evaluate joint efforts to overcome global challenges.

Through Baker Tilly's suite of ESG services, we aim to enable our clients to build, manage and report on their ESG journey to provide trust and confidence to stakeholders and to future proof their business.

Now, for tomorrow

ESG Advisory

Stakeholder Engagement, Materiality Assessment & Prioritization

- Stakeholder engagement to perform ESG risk assessment in order to identify the top ESG factors relevant to the organization.
- KPIs target setting, measuring, and monitoring of performance.
- Operationalize ESG through templates for repeatable data collection, compilation and calculation.
- Board awareness training on ESG.
- Assist understanding on how business operations may be exposed to climate related physical risks or the impact of regulatory and compliance risks under transition to a low carbon economy.

ESG Report Development

- Prepare a sustainability report for the organization, reporting your company's ESG performance in a standalone sustainability report within the annual report or integrated report.
- Prepare the ESG report to align and comply with regulatory requirements and guidelines including Bursa indicators, GRI, TCFD, SDG etc.
- Support submissions to sustainability indices by assisting to interpret the questionnaire before submission.

ESG Strategy & Transformation Development

- Develop ESG policies, procedures, and framework.
- Assess, design, and implement your ESG strategy.
- Embed ESG across your organization.
- Tell and report on your ESG story.

ESG Review

With organizations now facing demands for clear, relevant, and reliable disclosures of information on ESG from stakeholders – audit has an important role to play. Baker Tilly provides independent assurance services to enhance the credibility and quality of ESG information disclosed by a company.

Bursa Malaysia has also made it compulsory for listed companies to incorporate a Sustainability Statement in their annual reports, recommending that companies get an independent assurance on their reported sustainability matters.

Baker Tilly can assist to:

Evaluate the scope of information for sustainability reporting to ensure relevant sustainability information is provided to stakeholders.

Review your ESG reporting processes including materiality assessment, data collection process, report content and disclosure methods in fulfilling current reporting requirements or adoption of international reporting frameworks such as GRI.

Undertake internal audits to assess the effectiveness of the organizations process, systems, and controls to support the accurate, complete, and reliable reporting of ESG information.

Provide advise, on the credibility and integrity of the data in your sustainability report.

Review your current reporting against best practices, identify operational improvements to move it beyond compliance to include future looking strategies.

ESG Reporting Software

Digitalised ESG Journey

The entire journey leading up to report generation is powered by a digital platform that allows you to fully and efficiently manage ESG data and take control of your narratives and strategies to deliver compelling reports.

Compliant Reports

The digital platform is built to generate reports that are compliant with current mandatory requirements and continuously adapt to increasingly demanding ESG provisions.

End-To-End Digital Data Management

Easily plug in your data once in a single central location and you are free to use and repurpose the same set of data for multiple types of reporting.

Readily Available Sustainable Report

Download Sustainability Report templates from the platform. You can also custom-design the template to add in more metrics and incorporate your own branding.

Address evolving standards

Generate reports that will continue to evolve with the requirements of Bursa Malaysia and GRI.

Simplifying Your ESG Reporting

Maintain visibility and drive your sustainability strategies

Maintain oversight and drive strategy

Having your data on one platform means better governance and oversight of goals, data collection workflow and benchmarking (among others). The prevents greenwashing and effectively enables the board to prepare for future mandatory reviews.

Traceable record of all data

Monitor and access clear and consolidated records of all ESG data and updates on one platform, allowing for easier tracking and auditing.

One secure and resilient data hub

Continue to have full ownership of your data and store the data in a secure and organised digital repository, with primary and backup data stored in AWS Data Centre.
